FIRE and EXPLOSION HAZARD DATA SECTION IV

EXTINGUISHING MEDIA: CARBON DIOXIDE, DRY CHEMICAL, REGULAR FOAM

WATER SPRAY.

SPECIAL FIRE FIGHTING PROCEDURES: USE SELF-CONTAINED BREATHING APPARATUS. UNSUAL FIRE and EXPLOSION HAZARDS: HEATING OF NON-VENTED CONTAINER MAY CAUSE EXPLOSION. KEEP SURROUNDING CONTAINERS;

COOL WITH WATER SPRAY.

SECTION V REACTIVITY DATA

STABILITY:

MATERIALS TO AVOID: CONDITIONS TO AVOID:

HAZARDOUS DECOMPOSITION PRODUCTS:

STABLE **OXIDIZING AGENTS**

CONTACT WITH OPEN FLAME

CARBON MONOXIDE and ASPHYXLANTS MAY BE

FORMED DURING COMBUSTION

Page 1 of 3

HAZARDOUS POLYMERIZATION:

WILL NOT OCCUR

SECTION VI

HEALTH HAZARD DATA

SIGNS and SYMPTOMS OF EXPOSURE:

EYES:

DERMAL

INHALATION:

INGESTION:

IRRITATION, REDNESS

DRYNESS, IRRITATION and REDNESS VAPORS MAY IRRITATE NOSE, THROAT and

RESPIRATORY TRACT

NAUSEA, VOMITING, DIZZINESS, HEADACHE

and VISION

EMERGENCY and FIRST AID PROCEDURES:

EYES:

DERMAL:

INHALATION:

INGESTION:

ACUTE HEALTH HAZARDS: CHRONIC HEALTH HAZARDS: FLUSH WITH LARGE AMOUNTS OF WATER FOR

15 MINUTES. GET MEDICAL ATTENTION. WASH WITH SOAP and WATER UNTIL NO ODOR

REMAINS. IF REDNESS OR SWELLING DEVELOPS, GET MEDICAL ATTENTION. IMMEDIATELY REMOVE SOAKED CLOTHING, and WASH BEFORE REUSE. REMOVE VICTIM TO FRESH AIR. IF NOT BREATHING,

GIVE ARTIFICIAL RESPIRATION PROVIDED A QUALIFIEDINDIVIDUAL IS AVAILABLE. GET MEDICAL

ATTENTION PROMPTLY.

DO NOT INDUCE VOMITING. DO NOT GIVE LIQUIDS.

OBTAIN EMERGENCY MEDICAL ATTENTION. SMALL AMOUNTS, WHICH ACCIDENTALLY ENTER MOUTH SHOULD BE RINSED OUT UNTIL TASTE IS GONE. MILD IRRITATION TO THE EYES and SKIN. NONE EXPECTED AT THE INDUSTRIAL LEVEL.

SECTION VII

SPILL OR LEAK PROCEDURES

STEPS TO BE TAKEN IN CASE MATERIAL IS RELEASED OR SPILLED:

DIKE OR CONTAIN THE SPILL AREA. REMOVE ALL SOURCES OF IGNITION. VENTILATE AREA IF NECESSARY. ABSORB FREE LIQUID WITH EARTH, SAND, CLAY, OR ABSORBENT PADS AND PLACE IN NON-LEAK CONTAINERS FOR DISPOSAL. FLUSH THE AREA FOR TRACE RESIDUE AND DISPOSE OF AS BELOW.

WASTE DISPOSAL METHOD:

IN ACCORDANCE WITH LOCAL, STATE and FEDERAL LAWS.

SECTION VIII

Bill Of Lading #:

81718

Folder ID : Internal Temp Paperwork		
Original – Shipper Provided Short Form Straight B	ill of Lading – Not Negotiable – Domestic	
SHIPPED FROM:	TRAILER #LT-878	
CES Environmental Services, Inc. (TSDF)	11a) HOU-2351	
4904 Griggs Road	11b)	
Houston, TX 77021	11c)	
(713) 676-1460	11c)	

The property described below, in apparent good order, except as noted (content and condition of packages unknown), marked, consigned, and destined as indicated below, wh said carrier (the word carrier being understood throughout this as meaning any person or corporation authorized to be in possession of the property under the contract) agrees t carry to its unusual place of delivery at said destination, if on its route, otherwise to deliver to another carrier on the route to said destination. This Bill of Lading is a receipt for goods; it is not of itself a contract of carriage. It is mutually agreed, as to each carrier of all or as to any said over all or any portion of said route to destination, and as to each pany time interested in all or any of said property, that every service to be performed hereunder shall be subject to all the terms and conditions contained in the applicable contract between shipper and carrier or intermediary.

For payment: Charges to be billed to Shipper or the "Billed to" party are set forth in the governing contract with Shipper. No charges other than those contained therein may be to Shipper or the "Billed to" party without prior written consent of Shipper. The extra copy of this Bill of Lading, furnished at the time of shipment, must be attached to the freight I submitted to Shipper or the "Billed to" party and sent to:

CONSIGNED TO:

CES Environmental Services, Inc. 4904 Griggs Rd.

Houston, TX 77021

CARRIER:

CES Environmental Services, Inc.

4904 Griggs Rd.

Houston, TX 77021

This is to certify that the product stated below are properly classified, described, packaged, marked and labeled and is in proper condition for transportation according to the applicable regulations of the Department of Transportation. If this Shipment moves between to ports by a carrier by water, the law requires that the Bill of Lading shall state whet it is "carrier's or shipper's weight."

Intermodal Certificate: All information required by Federal Highway Administration regulations at 49 CFR 390.54© implementing the Intermodal Safe Container Act of 1992 is set forth on the face of this bill of lading. The shipper name herein is the tendering party.

Emergency Contact:

(713) 676-1460

1. Product Identification

Synonyms:

Wood alcohol; methanol; carbinol

CAS No:

67-56-1 32.04

Molecular Weight: Chemical Formula:

CH3OH

2. Composition/Information on Ingredients

INGREDIENT	CAS NO.	PERCENT	<u>HAZARDOUS</u>
Methanol	67-56-1	80-85	Yes
Methylene Chloride	75-09-2	0.5-2.0	Yes
Water	7732-18-5	15-20	No

3. Hazards Identification

Emergency Overview:

POISON! DANGER! VAPOR HARMFUL, MAY BE FATAL OR CAUSE BLINDNESS IF SWALLOWED. HARMFUL IF INHALED OR ABSORBED THROUGH SKIN. CANNOT BE MADE NONPOISONOUS. FLAMMABLE LIQUID AND VAPOR. CAUSES IRRITATION TO SKIN, EYES, AND RESPIRATORY TRACT. AFFECTS CENTRAL NERVOUS SYSTEM AND LIVER

SAF-T-DATA (tm) Ratings (Provided here for your convenience)

3

Health Rating:

3 Severe (Poison)

Flammability Rating:

Severe (Flammable)

Reactivity Rating:

Slight 1

Contact Rating:

3 Severe (Life)

Lab Protective Equipment:

Goggles & Shield; Lab Coat & Apron; Vent Hood; Proper

Gloves; Class B Extinguisher

Storage Color Code:

Red (Flammable)

Disk23:62907

POTENTIAL HEALTH EFFECTS:

Inhalation:

A slight irritant to the mucous membranes. Toxic effects exerted upon nervous system, particularly the optic nerve. Once absorbed into the body, it is very slowly eliminated. Symptoms of overexposure may include headache, drowsiness, nausea, vomiting, blurred vision, blindness, coma, and death. A person may get better but then worse again up to 30 hours later.

Ingestion:

Toxic. Symptoms parallel inhalation. Can intoxicate and cause blindness. Usual fatal dose: 100-125 milliliters.

Skin Contact:

Methyl alcohol is de-fatting agent and may cause skin to become dry and cracked. Skin absorption can occur; symptoms may parallel inhalation exposure.

Eye Contact:

Irritant. Continued exposure may cause eye lesions.

Chronic Exposure:

Marked impairment of vision has been reported. Repeated or prolonged exposure may cause skin irritation..

Aggravation of Pre-existing Conditions:

Persons with pre-existing skin disorders, eye problems, impaired liver, kidney function may be more susceptible to the effects of the substance.

4. First Aid Measures

Inhalation:

Remove to fresh air. If not breathing, give artificial respiration. If breathing is difficult, give oxygen. Get medical attention.

Ingestion:

Induce vomiting immediately as directed by medical personnel. Never give anything by mouth to an unconscious person. Get medical attention immediately.

Skin Contact:

Immediately flush skin with plenty of water for at least 15 minutes while removing contaminated clothing and shoes. Get medical attention. Wash clothing before reuse. Thoroughly clean shoes before reuse.

Eye Contact:

Immediately flush eyes with plenty of water for at least 15 minutes, lifting lower and upper eyelids occasionally. Get medical attention immediately.

5. Fire Fighting Measures

FLAMMABLE PROPERTIES

Flash point:

12C (54F) CC

Autoignition temperature:

464C (867F)

Upper Flame Limit (volume % in air):

36%

Lower Flame Limit (volume % in air):

6%

OSHA Flammability Class:

ΙB

Fire Extinguishing Media:

Carbon dioxide, dry chemical or foam

Unusual fire and explosion hazards: Can burn with an invisible flame. Mixtures with high water content are still flammable.

Special fire fighting precaution/instructions: Wear full protective clothing and self contained breathing apparatus. Containers in fire conditions will pressurize and may rupture. Do not allow run off from fire fighting effort to enter sewer or waterway.

6. Accidental Release Measures

Ventilate area of leak or spill. (Always wear recommended personal protective equipment) Eliminate sources of ignition. Isolate the spill area. Stop leak in a safe and practical manner. (If leak cannot be stopped easily and safely, advise trained emergency response personnel of the situation). Using inert material (such as ground corncobs) dike the spilled solvent to prevent it from running into drains or waterways.

7. Handling and Storages

NORMAL HANDLING: (Always wear recommended personal protective equipment). Flammable liquids and vapors: Keep containers closed. Do not breathe vapors. Avoid contact with skin, eyes and mucous membranes. Keep away from heat, sparks, and flame. Electrically ground all handling equipment.

STORAGE RECOMMENDATIONS: Store in an area designed for storage of flammable liquids. (OSHA 29 CFR 1910.106)

Protect from temperature extremes and sunlight, and store away from incompatible substances and in accordance with 29 CFR 1910.106.

Flammable liquid and vapor. Once liquid solvent has been completely dispensed, containers which appear "empty" should be handled in the same manner as when they were "full" of liquid solvent.

8. Exposure Controls/Personal Protection

ENGINEERING CONTROLS:

Provide general or local exhaust ventilation systems to maintain airborne concentrations below OSHA PELs. Local exhaust ventilation is preferred because it prevents contaminant dispersion into the work area by controlling it at its source.

PERSONAL PROTECTIVE EQUIPMENT:

Skin Protection:

Wear chemically protective gloves, boots and aprons to prevent prolonged or repeated skin contact.

Eye Protection:

Wear protective eyeglasses or chemical safety goggles, per OSHA eye and face protection regulations (29 CFR 1910.133). Contact lenses are not eye protective devices. Full face shield recommended for conditions where liquid contact is possible. Contact lens should not be work when working with this chemical.

Respiratory Protection:

Seek professional advice prior to respirator selection and use. Follow OSHA respirator regulations (29 CFR 1910.134) and, if necessary, wear a MSHA/NIOSH approved respirator. For emergency or non-routine operations (cleaning spill, reactor vessels or storage tanks), wear an SCBA. Warning! Airpurifying respirators do not protect workers in oxygen deficient atmospheres.

ADDITIONAL RECOMMENDATIONS:

Make emergency eyewash stations and washing facilities available in work area. Separate contaminated work clothes from street clothes. Launder before reuse. Remove this material from your shoes and clean personal protective equipment. Never eat, drink, or smoke in work areas. Practice good personal hygiene after use.

Spills and releases may have to be reported to Federal and/or local authorities. See section 15 regrding reporting requirements.

EXPOSURE GUIDELINES

INGREDIENT NAME Methanol ACGIH TLV 200 ppm (skin) OSHA PEL 200 ppm (skin) OTHER LIMIT

9. Physical and Chemical Properties

Appearance: Clear, colorless liquid

Odor: Characteristic odor

Solubility: Miscible in water

Specific Gravity: 0.8 pH: No information found

% Volatiles by volume @ 21C (70F): 100

Boiling Point: 64.5C (147F)

Melting Point: -98C (-144F)

Vapor Density (Air = 1): 1.1

Vapor Pressure (mm Hg): 97 @ 20C (68F)

Evaporation Rate (BuAc = 1): 5.9

Disk23:62907

10. Stability and Reactivity

Stability:

Stable under ordinary conditions of use and storage

Hazardous Decomposition Products:

May form carbon dioxide, carbon monoxide, and formaldehyde when heated to decomposition

Hazardous Polymerization:

Will not occur

Incompatibilities:

Strong oxidizing agents such as nitrates, perchlorates or sulfuric acid. Will attack some forms of plastics, rubber, and coatings. May react with metallic aluminum and generate hydrogen gas.

Conditions to Avoid:

Heat, flames, ignition sources and incompatibles.

11. Toxicological Information

Toxicological Data:

Methyl alcohol (Methanol) Oral rat LD50: 5628 mg/kg; inhalation rat LC50: 64000 ppm/4H; skin rabbit LD50: 15800 mg/kg; Irritation data-standard Draize test: skin, rabbit: 20mg/24 hr. Moderate; eye, rabbit: 100 mg/24 hr. Moderate. Investigated as a mutagen, reproductive effector.

Reproductive Toxicity:

Dichloromethane has been linked to spontaneous abortions in humans.

Cancer Lists:

		NTP Carcinogo	en
INGREDIENT	<u>Known</u>	Anticipated	IARC Category
Methyl alcohol (67-56-1)	No	No	None

12. Ecological Information

Environmental Fate:

When released into the soil, this material is expected to readily biodegradable. When released into the soil, this material is expected to leach into groundwater. When released into the soil, this material is expected to quickly evaporate. When released into the water, this material is expected to have a half-life between 1 and 10 days. When released into water, this material is expected to readily biodegrade. When released into the air, this material is expected to exist in the aerosol phase with a short half-life. When released into the air, this material is expected to be readily degraded by reaction with photochemically produced hydroxyl radicals. When released into the air, this material is expected to have a half-life between 10 and 30 days. When released into the air, this material is expected to be readily removed from the atmosphere by wet deposition.

Disk23:62907 5

Environmental Toxicity:

This material is expected to be slightly toxic to aquatic life.

13. Disposal Considerations

Whatever cannot be saved for recovery or recycling should be handled as hazardous waste and sent to a RCRA approved incinerator or disposed in a RCRA approved waste facility. Processing, use or contamination of this product may change the waste management options. State and Local disposal regulations may differ from Federal disposal regulations. Dispose of container and unused contents in accordance with Federal, State, and Local requirements.

16. Other Information

NFPA Ratings: Health: 1 Flammability: 3 Reactivity: 0

Label Hazard Warning:

POISON! DANGER! VAPOR HARMFUL. MAY BE FATAL OR CAUSE BLINDNESS IF SWALLOWED. HARMFUL IF INHALED OR ABSORBED THROUGH SKIN. CANNOT BE MADE NONPOISONOUS. FLAMMABLE LIQUID AND VAPOR. CAUSES IRRITATION TO SKIN, EYES AND RESPIRATORY TRACT. AFFECTS CENTRAL NERVOUS SYSTEM AND LIVER.

Label Precautions:

- Do not breathe vapor.
- Keep container closed.
- Use only with adequate ventilation.
- Wash thoroughly after handling.
- Keep away from heat and flame.
- Do not get in eyes, on skin, or on clothing.

Label First Aid:

If inhaled, remove to fresh air, If not breathing, give artificial respiration. If breathing is difficult, give oxygen. If swallowed, induce vomiting immediately as directed by medical personnel. Never give anything by mouth to an unconscious person. In case of contact, immediately flush eyes or skin with plenty of water for at least 15 minutes while removing contaminated clothing and shoes. Wash clothing before reuse. In all cases get medical attention immediately.

Product Use:

Laboratory Reagent.

Material Safety Data Sheet

IMPORTANT

Read this MSDS before handling or disposing of this product and pass this information on to employees, customers and users of this product.

Emergency Overview:

Physical State:

Liquid.

Color:

Clear to Light Amber

Odor:

Mild Petroleum Odor

Protect eyes from mistsing or spraying material. Protect exposed skin from repeated or prolonged exposure. Do not store material in open or unmarked containers. Spills may create a slipping hazard.

SECTION 3 - Hazards Identification

Also see Emergency Overview and Hazard Rating on Page 1 of this MSDS.

Major Route(s) of Entry: Skin Contact.

Signs and Symptoms of Acute Exposure:

Inhalation:

No significant adverse health effects are expected to occur upon short-term exposure.

Eye Contact:

This product can cause transient mild eye irritation with short-term contact with liquid sprays or mists.

Skin Contact:

This material can cause mild skin irritation from prolonged or repeated skin contact. Injection under the skin can cause inflammation and swelling. Injection of pressurized hydrocarbons can cause severe, permanent tissue damage. Initial symptoms may be minor. Injection of petroleum hydrocarbons requires immediate medical attention.

Ingestion:

If swallowed, large volumes of material can cause generalized depression, headache, drowsiness, nausea, vomiting and diarrhea. Smaller doses can cause a laxative effect. If aspirated into the lungs, liquid can cause lung damage.

Oil Base 100 Neutral (MSDS)

09/19/07

Page 2 of 11

Chronic Health Effects:

Contains a petroleum-based mineral oil. Prolonged or repeated skin contact can cause mild irritation and inflammation characterized by drying, cracking (dermatitis), or oily acne. Repeated or prolonged inhalation of petroleum-based mineral oil mists at concentrations above applicable workplace exposure levels can cause respiratory irritation or other pulmonary effects.

Conditions Aggravated by Exposure:

Medical conditions aggravated by exposure to this material may include pre-existing skin disorders.

Target Organs:

This material may cause damage to the following organs: Skin

Carcinogenic Potential:

This product does not contain any components at concentrations above 0.1%, which are considered carcinogenic by OSHA, IARC or NTP.

OSHA Hazard Classification is indicated by an "X" in the box adjacent to the hazard title. If no "X" is present, the product does not exhibit the hazard as defined in the OSHA Hazard Communication Standard (29 CFR 1910.1200).

OSHA Health Hazard Classification Irritant () Toxic () Sensitizer ()			Highly Toxic ()	Corrosive ()		Carcinogenic ()	
OSHA Physical H Combustible () Water-reactive ()	Explosiv	/e ()	Pyrophoric Organic Peroxide	` '	Flammable Unstable	()	Oxidizer ()

SECTION 4 - First Aid Measures

Take proper precautions to ensure your own health and safety before attempting rescure or providing first aid. For specific information, refer to Exposure Controls and Personal Protection in Section 8 of this MSDS.

Inhalation:

Vaporization is not expected at ambient temperatures. This material is not expected to cause inhalation-related disorders under anticipated conditions of use. In case of overexposure, move the person to fresh air.

Eve Contact:

Check for and remove contact lenses. Flush eyes with cool, clean, low-pressure water by lifting and lowering eyelids. Seek medical attention if excessive tearing, redness, or pain persist.

Skin Contact:

If burned by hot material, cool skin by quenching with large amounts of cool water. For contact with product at ambient temperatures, remove contaminated shoes and clothing. Wipe off excess material. Wash exposed skin with mild soap and water. Seek medical attention if tissue appears damaged or if pain or irritation persist. Thoroughly clean contaminated clothing before reuse. Discard

Oil Base 100 Neutral (MSDS)

09/19/07

Page 3 of 11

contaminated leather goods. If material is injected under the skin, seek medical attention immediately.

Ingestion:

Do not induce vomiting unless directed to by a physician. Do not give anything to drink unless directed to by a physician. Never give anything by mouth to a person who is no fully conscious. If significant amounts are swallowed or irritation or discomfort occurs, seek medical attention immediately.

Notes to Physician:

The viscosity range of the product represented by this MSDS is 100 to 400 SUS at 100F. Accordingly, upon ingestion there is low to moderate risk of aspiration. Careful gastric lavage may be considered to evacuate large quantities of material. Subcutaneous or intramuscular injection requires prompt surgical debridement.

SECTION 5 – Fire Fighting Measures

NFPA Flammability Classification: NFPA Class-IIIB combustible material. Slightly combustible.

Flash Point Method: Open Cup: 198C (388F) (Cleveland. (Minimum)).

Lower Flammable Limit: No Data

Upper Flammable Limit: No Data

Autoitgnition Temperature: Not Available

Hazardous Combustion Products:

Carbon dioxide, carbon monoxide, smoke, fumes, unburned hydrocarbons and trace oxides of sulfur and/or nitrogen.

Special Properties:

This material can burn but will not readily ignite. This material will release vapors when heated above the flash point temperature that can ignite when exposed to a source of ignition. In enclosed spaces, heated vapor can ignite with explosive force. Mists or sprays may burn at temperatures below the flash point.

Extinguishing Media:

Use dry chemical, foam, carbon dioxide or water fog.

Protection of Fire Fighters:

Firefighters must use full bunker gear including NIOSH-approved positive pressure self-contained breathing apparatus to protect against potential hazardous combustion or decomposition products and oxygen deficiencies.

SECTION 6 - Accidental Release Measures

Take proper precautions to ensure your own health and safety before attempting spill control or clean-up. For specific information, refer to the Emergency Overview on Page 1, Exposure Controls and Personal Protection in Section 8 and Disposal Considerations in Section 13 of this MSDS.

Do not touch damaged containers or spilled material unless wearing appropriate protective equipment. Slipping hazard; do not walk through spilled material. Stop leak if you can do so without risk. For small spills, absorb or cover with dry earth, sand, or other inert non-combustible absorbent material and place into waste containers for later disposal. Contain large spills to maximize product recovery or disposal. Prevent entry into waterways or sewers. In urban area, cleanup spill as soon as possible. In natural environments, seek cleanup advice from specialists to minimize physical habitat damage. This material will float on water. Absorbent pads and similar materials can be used. Comply with all laws and regulation.

SECTION 7 - Handling and Storage

Handling:

Avoid contamination and extreme temperatures to minimize product degradation. Empty containers may contain product residues that can ignite with explosive force. Do not pressurize, cut, weld, braze solder, drill, grind or expose containers to flames, sparks, heat or other potential ignition sources. Consult appropriate federal, state and local authorities before reusing, reconditioning, reclaiming recycling or disposing of empty containers and/or waste residues of this product.

Storage:

Keep container closed. Do not store with strong oxidizing agents. Do not store at elevated temperatures. Avoid storing product in direct sunlight for extended periods of time. Consult appropriate federal, state and local authorities before reusing, reconditioning, reclaiming, recycling or disposing of empty containers or waste residues of this product.

SECTION 8 - Exposure Controls / Personal Protection

Engineering Controls:

Provide exhaust ventilation or other engineering controls to keep the airborne concentrations of mistss and/or vapors below the recommended exposure limits (see below). An eye wash station and safety shower should be located near the work-station.

Personal Protective Equipment:

Personal protective equipment should be selected based upon the conditions under which this material is used. A hazard assessment of the work area for PPE requirements should be conducted by a qualified professional pursuant to OSHA regulations. The following pictograms represent the minimum requirements for personal protective equipment. For certain operations, additional PPE may be required.

Eye Protection:

Safety glasses equipped with side shields are recommended as minimum protection in industrial settings. Wear goggles and/or face shield if splashing or spraying is anticipated. Wear goggles and face shield if material is heated above 125F (51C). Have suitable eye wash water available.

Oil Base 100 Neutral (MSDS)

09/19/07

Page 5 of 11

Hand Protection:

Use gloves constructed of chemical resistant materials such as neoprene or heavy nitrile rubber if frequent or prolonged contact is expected. Use heat-protective gloves when handling product at elevated temperatures.

Body Protection:

Use clean and impervious protective clothing (e.g., neoprene or Tyvek) if splashing or spraying conditions are present. Protective clothing may include long-sleeve outer garment, apron, or lab coat. If significant contact occurs, remove oil-contaminated clothing as soon as possible and promptly shower. Launder contaminated clothing before reuse or discard. Wear heat protective boots and protective clothing when handling material at elevated temperatures.

Respiratory Protection:

Vaporization is not expected at ambient temperatures. Therefore, the need for respiratory protection is not anticipated under normal use conditions and with adequate ventilation. If elevated airborne concentrations above applicable workplace exposure levels are anticipated, a NIOSH-approved organic vapor respirator equipped with a dust/mists prefilter should be used. Protection factors vary depending upon the type of respirator used. Respirators should be used in accordance with OSHA requirements (29 CFR 1910.134).

General Comments:

Use good personal hygiene practices. Wash hands and other exposed skin areas with plenty of mild soap and water before eating, drinking, smoking, use of toilet facilities, or leaving work. DO NOT use gasoline, kerosene, solvents or harsh abrasives as skin cleaners. Since specific exposure standards/control limits have not been established for this product, the "Oil Mists, Mineral" exposure limits shown below are suggested as minimum control guidelines.

Occupational Exposure Guidelines:

Substance: Oil Mists, Mineral

Applicable Workplace Exposure Levels: ACGIH (United States)

TWA: 5 mg/m3 Stel: 10 mg/m3

OSHA (United States)
TWA: 5 mg/m3

SECTION 9 – Physical and Chemical Properties

Physical State: Liquid

Color: Clear to Light Amber
Odor: Mild Petroleum Odor
Specific Gravity: 0.86 (Water =1)

pH: Not Applicable

Vapor Density: >1 (Air = 1)

Boiling Point / Range: Not Available
Melting / Freezing Point: Not Available

Oil Base 100 Neutral (MSDS)

09/19/07

Page 6 of 11

Vapor Pressure: <0.01 kPa (<0.1 mmHg) (at 20C)

Viscosity: (cSt @ 40C) 20

Solubility in Water: Insoluble in Cold Water Volatile Characteristics: Negligible Volatility

Additional Properties: Gravity, API (ASTM D287) = 32.5 @ 60F

Density = 7.18 lbs/gal

Viscosity (ASTM D2161) = 104 SUS @ 100F

SECTION 10 - Stability and Reactivity

Chemical Stability: Stable

Hazardous Polymerization: Not expected to occur

Materials Incompatibility: Strong Oxidizers

Conditions to Avoid:

Keep away from extreme heat, sparks, open flame, and strongly oxidizing conditions.

Hazardous Decomposition Products:

No additional hazardous decomposition products were identified other than the combustion products identified in Section 5 of this MSDS.

SECTION 11 – Toxicological Information

For other health-related information, refer to the Emergency Overview on Page 1 and the Hazards Identification in Section 3 of this MSDS.

Toxicity Data: Distillates, Petroleum, Solvent-Refined Light Paraffiniuc:

Oral (LD50): Acute: >5000 mg/kg [Rat]
Dermal (LD50): Acute: >2000 mg/kg [Rabbit]

Distillates, Petroleum, Solvent-Refined Heavy Paraffinic:

Oral (LD50): Acute: >5000 mg/kg [Rat]
Dermal (LD50): Acute: >2000 mg/kg [Rabbit]

Distillates, Petroleum, Solvent-Refined Light Paraffiniuc:

Mineral oil mists derived from highly refined oils are reported to have low acute and sub-acute toxicities in animals. Effects from single and short-term repeated exposures to high concentrations of mineral oil mists well above applicable workplace exposure levels include lung inflammatory reaction, lipoid granuloma formation and lipoid pneumonia. In acute and sub-acute studies involving exposures to lower concentrations of mineral mists at or near current work place exposure levels produced no significant toxicological effects. In long-term studies (up to two years) no carcinogenic effects have been reported in any animal species tested.

Oil Base 100 Neutral (MSDS)

09/19/07

Page 7 of 11

Distillates, Petroleum, Solvent-Refined Heavy Paraffinic:

Mineral oil mists derived from highly refined oils are reported to have low acute and sub-acute toxicities in animals. Effects from single and short-term repeated exposures to high concentrations of mineral oil in animals. Effects from single and short-term repeated exposure to high concentrations of mineral oil mists well above applicable workplace exposure levels include lung inflammatory reaction, lipoid, granuloma formation and lipoid pneumonia. In acute and sub-acute studies involving exposures to lower concentrations of mineral oil mists at or near current work place exposure levels produced no significant toxicological effects. In long-term studies (up to two years) no carcinogenic effects have been reported in any animal species attested. Analyses conducted by method IP 346 indicate that the polycyclic aromatic concentration of this mineral oil is below 3.0 weight percent.

SECTION 12 - Ecological Information

Ecotoxicity:

Analysis for ecological effects has not been conducted on this product. However, if spilled, this product and any contaminated soil or water may be harmful to human, animal, and aquatic life. Also, the coating action associated with petroleum and petroleum products can be harmful or fatal to aquatic life and waterfowl.

Environmental Fate:

An environmental fate analysis has not been conducted on this specific product. Plants and animals may experience harmful or fatal effects when coated with petroleum-based products. Petroleum-based (mineral) lube oils will normally float on water. In stagnant or slow-flowing waterways, an oil layer can cover a large surface area. As a result, this oil layer might limit or eliminate natural atmospheric oxygen transport into the water. With time, if not removed, oxygen depletion in the waterway may be sufficient to cause a fish kill or create an anaerobic environment.

SECTION 13 – Disposal Considerations

Hazard characteristic and regulatory waste stream classification can change with product use. Accordingly, it is the responsibility of the user to determine the proper storage, transportation, treatment and/or disposal methodologies for spent materials and residues at the time of disposition.

Conditions of use may cause this material to become a "hazardous waste", as defined by federal or state regulations. It is the responsibility of the user to determine if the material is a RCRA "hazardous waste" at the time of disposal. Transportation, treatment, storage and disposal of waste materials must be conducted in accordance with RCRA regulations (see 40 CFR 260 through 40 CFR 271). State and/or local regulations may be more restrictive. Contact the RCRA/Superfund Hotline at 800-424-9346 or your regional U.S. EPA office for guidance concerning case specific disposal issues.

SECTION 14 – Transport Information

The shipping description below may not represent requirements for all modes of transportation, shipping methods or locations outside of the United States.

Oil Base 100 Neutral (MSDS)

09/19/07

Page 8 of 11

U.S. DOT Status:

Not regulated by the U.S. Department of Transportation as a hazardous material

Proper Shipping Name: Not Regulated

Hazard Class: Not Regulated

Packing Group(s): Not Applicable

Un / NA ID: Not Regulated

Reportable Quantity:

A Reportable Quantity (RQ) has not been established for this material.

Placards:

Emergency Response Guide No: Not Applicable

HAZMAT STCC No: 2911990

MARPOL III Status: Not a DOT "Marine Pollutant" per 49 CFR 1718

SECTION 15 – Regulatory Information

TSCA Inventory:

This product and/or its components are listed on the Toxic Substance Control Act (TSCA) inventory.

SARA 302/304:

The Superfund Amendments and Reauthorization Act of 1986 (SARA) Title III requires facilities subject to Subparts 302 and 304 to submit emergency planning and notification information based on Threshold Planning Quantities (TPQs) and Reportable Quantities (RQs) for "Extremely Hazardous Substances" listed in 40 CFR 302.4 and 40 CFR 355. No components were identified.

SARA 311/312:

The Superfund Amendments and Reauthorization Act of 1986 (SARA) Title III requires facilities subject to this subpart to submit aggregate information on chemicals by "Hazard Category" as defined in 40 CFR 370.2. This material would be classified under the following hazard categories: No SARA 311 / 312 hazard categories identified.

SARA 313:

This product contains the following components in concentrations above de minimis levels that are listed as toxic chemicals in 40 CFR Part 372 pursuant to the requirements of Section 313 of SARA: No Components were identified.

CERCLA:

The Comprehensive Environmental Response, Compensation, and Liability Act of 1980 (CERCLA) requires notification of the National Response Center concerning release of quantities of "hazardous substances" equal to or greater than the reportable quantities (RQs) listed in 40 CFR 302.4. As

Oil Base 100 Neutral (MSDS)

09/19/07

Page 9 of 11

defined by CERCLA, the term "hazardous substance" does not include petroleum, including crude oil or any fraction thereof which is not otherwise specifically designated in 40 CFR 302.4. Chemical Substances present in this product or refinery stream that may be subject to this statue are: None Identified.

CWA:

This material is classified as an oil under Section 311 of the Clean Water Act (CWA) and the Oil pollution Act of 1990 (OPA). Discharges or spills which produce a visible sheen on waters of the United States, their adjoining shorelines, or into conduits leading to surface waters must be reported to the EPA's National Response Center at 800-424-8802

California Proposition 65:

This material may contain the following components which are known to the State of California to cause cancer, birth defects or other reproductive harm, and may be subject to the requirements of California Proposition 65 (CA Health and Safety Code Section 25249.5): Toluene: 0.001%

New Jersey Right-to-Know Label: Petroleum Oil

Additional Regulatory Remarks: No additional regulatory remarks

SECTION 16 - Other Information

Refer to Page 1 for the HMIS and NFPA hazard Ratings for this product.

Material Safety Data Sheet

IMPORTANT

Read this MSDS before handling or disposing of this product and pass this information on to employees, customers and users of this product.

Emergency Overview:

Physical State:

Liquid.

Color: Odor:

Clear to Light Amber Mild Petroleum Odor

Protect eyes from mistsing or spraying material. Protect exposed skin from repeated or prolonged exposure. Do not store material in open or unmarked containers. Spills may create a slipping hazard.

SECTION 3 – Hazards Identification

Also see Emergency Overview and Hazard Rating on Page 1 of this MSDS.

Major Route(s) of Entry: Skin Contact.

Signs and Symptoms of Acute Exposure:

Inhalation:

No significant adverse health effects are expected to occur upon short-term exposure.

Eve Contact:

This product can cause transient mild eye irritation with short-term contact with liquid sprays or mists.

Skin Contact:

This material can cause mild skin irritation from prolonged or repeated skin contact. Injection under the skin can cause inflammation and swelling. Injection of pressurized hydrocarbons can cause severe, permanent tissue damage. Initial symptoms may be minor. Injection of petroleum hydrocarbons requires immediate medical attention.

Ingestion:

If swallowed, large volumes of material can cause generalized depression, headache, drowsiness, nausea, vomiting and diarrhea. Smaller doses can cause a laxative effect. If aspirated into the lungs. liquid can cause lung damage.

Oil Base 100 Neutral (MSDS)

09/19/07

Page 2 of 11

Chronic Health Effects:

Contains a petroleum-based mineral oil. Prolonged or repeated skin contact can cause mild irritation and inflammation characterized by drying, cracking (dermatitis), or oily acne. Repeated or prolonged inhalation of petroleum-based mineral oil mists at concentrations above applicable workplace exposure levels can cause respiratory irritation or other pulmonary effects.

Conditions Aggravated by Exposure:

Medical conditions aggravated by exposure to this material may include pre-existing skin disorders.

Target Organs:

This material may cause damage to the following organs: Skin

Carcinogenic Potential:

This product does not contain any components at concentrations above 0.1%, which are considered carcinogenic by OSHA, IARC or NTP.

OSHA Hazard Classification is indicated by an "X" in the box adjacent to the hazard title. If no "X" is present, the product does not exhibit the hazard as defined in the OSHA Hazard Communication Standard (29 CFR 1910.1200).

OSHA Health I Irritant ()		Classification) Sensitizer ()	Highly Toxic ()	Corrosive ()	Carcinogenic ()
Combustible	() E	rd Classification explosive () ompressed Gas ()	Pyrophoric Organic Peroxide	() Flammable () Unstable	` ' '

SECTION 4 - First Aid Measures

Take proper precautions to ensure your own health and safety before attempting rescure or providing first aid. For specific information, refer to Exposure Controls and Personal Protection in Section 8 of this MSDS.

Inhalation:

Vaporization is not expected at ambient temperatures. This material is not expected to cause inhalation-related disorders under anticipated conditions of use. In case of overexposure, move the person to fresh air.

Eye Contact:

Check for and remove contact lenses. Flush eyes with cool, clean, low-pressure water by lifting and lowering eyelids. Seek medical attention if excessive tearing, redness, or pain persist.

Skin Contact:

If burned by hot material, cool skin by quenching with large amounts of cool water. For contact with product at ambient temperatures, remove contaminated shoes and clothing. Wipe off excess material. Wash exposed skin with mild soap and water. Seek medical attention if tissue appears damaged or if pain or irritation persist. Thoroughly clean contaminated clothing before reuse. Discard

Oil Base 100 Neutral (MSDS)

09/19/07

Page 3 of 11

contaminated leather goods. If material is injected under the skin, seek medical attention immediately.

Ingestion:

Do not induce vomiting unless directed to by a physician. Do not give anything to drink unless directed to by a physician. Never give anything by mouth to a person who is no fully conscious. If significant amounts are swallowed or irritation or discomfort occurs, seek medical attention immediately.

Notes to Physician:

The viscosity range of the product represented by this MSDS is 100 to 400 SUS at 100F. Accordingly, upon ingestion there is low to moderate risk of aspiration. Careful gastric lavage may be considered to evacuate large quantities of material. Subcutaneous or intramuscular injection requires prompt surgical debridement.

SECTION 5 – Fire Fighting Measures

NFPA Flammability Classification: NFPA Class-IIIB combustible material. Slightly combustible.

Flash Point Method: Open Cup: 198C (388F) (Cleveland. (Minimum)).

Lower Flammable Limit: No Data

Upper Flammable Limit: No Data

Autoitgnition Temperature: Not Available

Hazardous Combustion Products:

Carbon dioxide, carbon monoxide, smoke, fumes, unburned hydrocarbons and trace oxides of sulfur and/or nitrogen.

Special Properties:

This material can burn but will not readily ignite. This material will release vapors when heated above the flash point temperature that can ignite when exposed to a source of ignition. In enclosed spaces, heated vapor can ignite with explosive force. Mists or sprays may burn at temperatures below the flash point.

Extinguishing Media:

Use dry chemical, foam, carbon dioxide or water fog.

Protection of Fire Fighters:

Firefighters must use full bunker gear including NIOSH-approved positive pressure self-contained breathing apparatus to protect against potential hazardous combustion or decomposition products and oxygen deficiencies.

SECTION 6 - Accidental Release Measures

Take proper precautions to ensure your own health and safety before attempting spill control or clean-up. For specific information, refer to the Emergency Overview on Page 1, Exposure Controls and Personal Protection in Section 8 and Disposal Considerations in Section 13 of this MSDS.

Do not touch damaged containers or spilled material unless wearing appropriate protective equipment. Slipping hazard; do not walk through spilled material. Stop leak if you can do so without risk. For small spills, absorb or cover with dry earth, sand, or other inert non-combustible absorbent material and place into waste containers for later disposal. Contain large spills to maximize product recovery or disposal. Prevent entry into waterways or sewers. In urban area, cleanup spill as soon as possible. In natural environments, seek cleanup advice from specialists to minimize physical habitat damage. This material will float on water. Absorbent pads and similar materials can be used. Comply with all laws and regulation.

SECTION 7 – Handling and Storage

Handling:

Avoid contamination and extreme temperatures to minimize product degradation. Empty containers may contain product residues that can ignite with explosive force. Do not pressurize, cut, weld, braze solder, drill, grind or expose containers to flames, sparks, heat or other potential ignition sources. Consult appropriate federal, state and local authorities before reusing, reconditioning, reclaiming recycling or disposing of empty containers and/or waste residues of this product.

Storage:

Keep container closed. Do not store with strong oxidizing agents. Do not store at elevated temperatures. Avoid storing product in direct sunlight for extended periods of time. Consult appropriate federal, state and local authorities before reusing, reconditioning, reclaiming, recycling or disposing of empty containers or waste residues of this product.

SECTION 8 – Exposure Controls / Personal Protection

Engineering Controls:

Provide exhaust ventilation or other engineering controls to keep the airborne concentrations of mistss and/or vapors below the recommended exposure limits (see below). An eye wash station and safety shower should be located near the work-station.

Personal Protective Equipment:

Personal protective equipment should be selected based upon the conditions under which this material is used. A hazard assessment of the work area for PPE requirements should be conducted by a qualified professional pursuant to OSHA regulations. The following pictograms represent the minimum requirements for personal protective equipment. For certain operations, additional PPE may be required.

Eye Protection:

Safety glasses equipped with side shields are recommended as minimum protection in industrial settings. Wear goggles and/or face shield if splashing or spraying is anticipated. Wear goggles and face shield if material is heated above 125F (51C). Have suitable eye wash water available.

Oil Base 100 Neutral (MSDS)

09/19/07

Page 5 of 11

Hand Protection:

Use gloves constructed of chemical resistant materials such as neoprene or heavy nitrile rubber if frequent or prolonged contact is expected. Use heat-protective gloves when handling product at elevated temperatures.

Body Protection:

Use clean and impervious protective clothing (e.g., neoprene or Tyvek) if splashing or spraying conditions are present. Protective clothing may include long-sleeve outer garment, apron, or lab coat. If significant contact occurs, remove oil-contaminated clothing as soon as possible and promptly shower. Launder contaminated clothing before reuse or discard. Wear heat protective boots and protective clothing when handling material at elevated temperatures.

Respiratory Protection:

Vaporization is not expected at ambient temperatures. Therefore, the need for respiratory protection is not anticipated under normal use conditions and with adequate ventilation. If elevated airborne concentrations above applicable workplace exposure levels are anticipated, a NIOSH-approved organic vapor respirator equipped with a dust/mists prefilter should be used. Protection factors vary depending upon the type of respirator used. Respirators should be used in accordance with OSHA requirements (29 CFR 1910.134).

General Comments:

Use good personal hygiene practices. Wash hands and other exposed skin areas with plenty of mild soap and water before eating, drinking, smoking, use of toilet facilities, or leaving work. DO NOT use gasoline, kerosene, solvents or harsh abrasives as skin cleaners. Since specific exposure standards/control limits have not been established for this product, the "Oil Mists, Mineral" exposure limits shown below are suggested as minimum control guidelines.

Occupational Exposure Guidelines:

Substance: Oil Mists, Mineral

Applicable Workplace Exposure Levels: ACGIH (United States)

TWA: 5 mg/m3 Stel: 10 mg/m3

OSHA (United States) TWA: 5 mg/m3

SECTION 9 – Physical and Chemical Properties

Physical State: Liquid

Color: Clear to Light Amber Odor: Mild Petroleum Odor

Specific Gravity: 0.86 (Water =1)

pH: Not Applicable

Vapor Density: >1 (Air = 1)

Boiling Point / Range: Not Available **Melting / Freezing Point:** Not Available

Oil Base 100 Neutral (MSDS)

09/19/07

Page 6 of 11

Vapor Pressure: <0.01 kPa (<0.1 mmHg) (at 20C)

Viscosity: (cSt @ 40C) 20

Solubility in Water: Insoluble in Cold Water Volatile Characteristics: Negligible Volatility

Additional Properties: Gravity, API (ASTM D287) = 32.5 @ 60F

Density = 7.18 lbs/gal

Viscosity (ASTM D2161) = 104 SUS @ 100F

SECTION 10 - Stability and Reactivity

Chemical Stability: Stable

Hazardous Polymerization: Not expected to occur

Materials Incompatibility: Strong Oxidizers

Conditions to Avoid:

Keep away from extreme heat, sparks, open flame, and strongly oxidizing conditions.

Hazardous Decomposition Products:

No additional hazardous decomposition products were identified other than the combustion products identified in Section 5 of this MSDS.

SECTION 11 - Toxicological Information

For other health-related information, refer to the Emergency Overview on Page 1 and the Hazards Identification in Section 3 of this MSDS.

Toxicity Data: Distillates, Petroleum, Solvent-Refined Light Paraffiniuc:

Oral (LD50): Acute: >5000 mg/kg [Rat]
Dermal (LD50): Acute: >2000 mg/kg [Rabbit]

Distillates, Petroleum, Solvent-Refined Heavy Paraffinic:

Oral (LD50): Acute: >5000 mg/kg [Rat]
Dermal (LD50): Acute: >2000 mg/kg [Rabbit]

Distillates, Petroleum, Solvent-Refined Light Paraffiniuc:

Mineral oil mists derived from highly refined oils are reported to have low acute and sub-acute toxicities in animals. Effects from single and short-term repeated exposures to high concentrations of mineral oil mists well above applicable workplace exposure levels include lung inflammatory reaction, lipoid granuloma formation and lipoid pneumonia. In acute and sub-acute studies involving exposures to lower concentrations of mineral mists at or near current work place exposure levels produced no significant toxicological effects. In long-term studies (up to two years) no carcinogenic effects have been reported in any animal species tested.

Distillates, Petroleum, Solvent-Refined Heavy Paraffinic:

Mineral oil mists derived from highly refined oils are reported to have low acute and sub-acute toxicities in animals. Effects from single and short-term repeated exposures to high concentrations of mineral oil in animals. Effects from single and short-term repeated exposure to high concentrations of mineral oil mists well above applicable workplace exposure levels include lung inflammatory reaction, lipoid, granuloma formation and lipoid pneumonia. In acute and sub-acute studies involving exposures to lower concentrations of mineral oil mists at or near current work place exposure levels produced no significant toxicological effects. In long-term studies (up to two years) no carcinogenic effects have been reported in any animal species attested. Analyses conducted by method IP 346 indicate that the polycyclic aromatic concentration of this mineral oil is below 3.0 weight percent.

SECTION 12 – Ecological Information

Ecotoxicity:

Analysis for ecological effects has not been conducted on this product. However, if spilled, this product and any contaminated soil or water may be harmful to human, animal, and aquatic life. Also, the coating action associated with petroleum and petroleum products can be harmful or fatal to aquatic life and waterfowl.

Environmental Fate:

An environmental fate analysis has not been conducted on this specific product. Plants and animals may experience harmful or fatal effects when coated with petroleum-based products. Petroleum-based (mineral) lube oils will normally float on water. In stagnant or slow-flowing waterways, an oil layer can cover a large surface area. As a result, this oil layer might limit or eliminate natural atmospheric oxygen transport into the water. With time, if not removed, oxygen depletion in the waterway may be sufficient to cause a fish kill or create an anaerobic environment.

SECTION 13 – Disposal Considerations

Hazard characteristic and regulatory waste stream classification can change with product use. Accordingly, it is the responsibility of the user to determine the proper storage, transportation, treatment and/or disposal methodologies for spent materials and residues at the time of disposition.

Conditions of use may cause this material to become a "hazardous waste", as defined by federal or state regulations. It is the responsibility of the user to determine if the material is a RCRA "hazardous waste" at the time of disposal. Transportation, treatment, storage and disposal of waste materials must be conducted in accordance with RCRA regulations (see 40 CFR 260 through 40 CFR 271). State and/or local regulations may be more restrictive. Contact the RCRA/Superfund Hotline at 800-424-9346 or your regional U.S. EPA office for guidance concerning case specific disposal issues.

SECTION 14 – Transport Information

The shipping description below may not represent requirements for all modes of transportation, shipping methods or locations outside of the United States.

Oil Base 100 Neutral (MSDS)

U.S. DOT Status:

Not regulated by the U.S. Department of Transportation as a hazardous material

Proper Shipping Name: Not Regulated

Hazard Class: Not Regulated

Packing Group(s): Not Applicable

Un / NA ID: Not Regulated

Reportable Quantity:

A Reportable Quantity (RQ) has not been established for this material.

Placards:

Emergency Response Guide No: Not Applicable

HAZMAT STCC No: 2911990

MARPOL III Status: Not a DOT "Marine Pollutant" per 49 CFR 1718

140 400

SECTION 15 – Regulatory Information

TSCA Inventory:

This product and/or its components are listed on the Toxic Substance Control Act (TSCA) inventory.

SARA 302/304:

The Superfund Amendments and Reauthorization Act of 1986 (SARA) Title III requires facilities subject to Subparts 302 and 304 to submit emergency planning and notification information based on Threshold Planning Quantities (TPQs) and Reportable Quantities (RQs) for "Extremely Hazardous Substances" listed in 40 CFR 302.4 and 40 CFR 355. No components were identified.

SARA 311 / 312:

The Superfund Amendments and Reauthorization Act of 1986 (SARA) Title III requires facilities subject to this subpart to submit aggregate information on chemicals by "Hazard Category" as defined in 40 CFR 370.2. This material would be classified under the following hazard categories: No SARA 311 / 312 hazard categories identified.

SARA 313:

This product contains the following components in concentrations above de minimis levels that are listed as toxic chemicals in 40 CFR Part 372 pursuant to the requirements of Section 313 of SARA: No Components were identified.

CERCLA:

The Comprehensive Environmental Response, Compensation, and Liability Act of 1980 (CERCLA) requires notification of the National Response Center concerning release of quantities of "hazardous substances" equal to or greater than the reportable quantities (RQs) listed in 40 CFR 302.4. As

Oil Base 100 Neutral (MSDS)

09/19/07

Page 9 of 11

defined by CERCLA, the term "hazardous substance" does not include petroleum, including crude oil or any fraction thereof which is not otherwise specifically designated in 40 CFR 302.4. Chemical Substances present in this product or refinery stream that may be subject to this statue are: None Identified.

CWA:

This material is classified as an oil under Section 311 of the Clean Water Act (CWA) and the Oil pollution Act of 1990 (OPA). Discharges or spills which produce a visible sheen on waters of the United States, their adjoining shorelines, or into conduits leading to surface waters must be reported to the EPA's National Response Center at 800-424-8802

California Proposition 65:

This material may contain the following components which are known to the State of California to cause cancer, birth defects or other reproductive harm, and may be subject to the requirements of California Proposition 65 (CA Health and Safety Code Section 25249.5): Toluene: 0.001%

New Jersey Right-to-Know Label: Petroleum Oil

Additional Regulatory Remarks: No additional regulatory remarks

SECTION 16 - Other Information

Refer to Page 1 for the HMIS and NFPA hazard Ratings for this product.

CES Environmental Services, Inc.

Bill Of Lading #:

81724

Folder ID :	nternal Temp Paperwork						
Original – Shipper Provided Short Form Straight Bill of Lading – Not Negotiable – Domestic							
SHIPPED FROM:		TRAILER #415					
CES Environn	nental Services, Inc. (TSDF)	11a) HOU-2432					
4904 Griggs F	Road	11b)					
Houston, TX	77021	11c)					

The property described below, in apparent good order, except as noted (content and condition of packages unknown), marked, consigned, and destined as indicated below, wh said carrier (the word carrier being understood throughout this as meaning any person or corporation authorized to be in possession of the property under the contract) agrees t carry to its unusual place of delivery at said destination, if on its route, otherwise to deliver to another carrier on the route to said destination. This Bill of Lading is a receipt for goods; it is not of itself a contract of carriage. It is mutually agreed, as to each carrier of all or as to any said over all or any portion of said route to destination, and as to each part any time interested in all or any of said property, that every service to be performed hereunder shall be subject to all the terms and conditions contained in the applicable contractions.

For payment: Charges to be billed to Shipper or the "Billed to" party are set forth in the governing contract with Shipper. No charges other than those contained therein may be to Shipper or the "Billed to" party without prior written consent of Shipper. The extra copy of this Bill of Lading, furnished at the time of shipment, must be attached to the freight I submitted to Shipper or the "Billed to" party and sent to:

CONSIGNED TO:

Reactivity Rating:

1 Slight

Contact Rating:

3 Severe (Life)

Lab Protective Equipment:

Goggles & Shield; Lab Coat & Apron; Vent Hood; Proper

Gloves; Class B Extinguisher

Storage Color Code:

Red (Flammable)

Disk23:62907

POTENTIAL HEALTH EFFECTS:

Inhalation:

A slight irritant to the mucous membranes. Toxic effects exerted upon nervous system, particularly the optic nerve. Once absorbed into the body, it is very slowly eliminated. Symptoms of overexposure may include headache, drowsiness, nausea, vomiting, blurred vision, blindness, coma, and death. A person may get better but then worse again up to 30 hours later.

Ingestion:

Toxic. Symptoms parallel inhalation. Can intoxicate and cause blindness. Usual fatal dose: 100-125 milliliters.

Skin Contact:

Methyl alcohol is de-fatting agent and may cause skin to become dry and cracked. Skin absorption can occur; symptoms may parallel inhalation exposure.

Eye Contact:

Irritant. Continued exposure may cause eye lesions.

Chronic Exposure:

Marked impairment of vision has been reported. Repeated or prolonged exposure may cause skin irritation..

Aggravation of Pre-existing Conditions:

Persons with pre-existing skin disorders, eye problems, impaired liver, kidney function may be more susceptible to the effects of the substance.

4. First Aid Measures

Inhalation:

Remove to fresh air. If not breathing, give artificial respiration. If breathing is difficult, give oxygen. Get medical attention.

Ingestion:

Induce vomiting immediately as directed by medical personnel. Never give anything by mouth to an unconscious person. Get medical attention immediately.

Skin Contact:

Immediately flush skin with plenty of water for at least 15 minutes while removing contaminated clothing and shoes. Get medical attention. Wash clothing before reuse. Thoroughly clean shoes before reuse.

Eye Contact:

Immediately flush eyes with plenty of water for at least 15 minutes, lifting lower and upper eyelids occasionally. Get medical attention immediately.

5. Fire Fighting Measures

FLAMMABLE PROPERTIES

Flash point:

12C (54F) CC

Autoignition temperature:

464C (867F)

Upper Flame Limit (volume % in air):

36%

Lower Flame Limit (volume % in air):

6%

OSHA Flammability Class:

ΙB

Fire Extinguishing Media:

Carbon dioxide, dry chemical or foam

Unusual fire and explosion hazards: Can burn with an invisible flame. Mixtures with high water content are still flammable.

Special fire fighting precaution/instructions: Wear full protective clothing and self contained breathing apparatus. Containers in fire conditions will pressurize and may rupture. Do not allow run off from fire fighting effort to enter sewer or waterway.

6. Accidental Release Measures

Ventilate area of leak or spill. (Always wear recommended personal protective equipment) Eliminate sources of ignition. Isolate the spill area. Stop leak in a safe and practical manner. (If leak cannot be stopped easily and safely, advise trained emergency response personnel of the situation). Using inert material (such as ground corncobs) dike the spilled solvent to prevent it from running into drains or waterways.

7. Handling and Storages

NORMAL HANDLING: (Always wear recommended personal protective equipment). Flammable liquids and vapors: Keep containers closed. Do not breathe vapors. Avoid contact with skin, eyes and mucous membranes. Keep away from heat, sparks, and flame. Electrically ground all handling

equipment.

STORAGE RECOMMENDATIONS: Store in an area designed for storage of flammable liquids. (OSHA 29 CFR 1910.106)

Protect from temperature extremes and sunlight, and store away from incompatible substances and in accordance with 29 CFR 1910,106.

Flammable liquid and vapor. Once liquid solvent has been completely dispensed, containers which appear "empty" should be handled in the same manner as when they were "full" of liquid solvent.

8. Exposure Controls/Personal Protection

ENGINEERING CONTROLS:

Provide general or local exhaust ventilation systems to maintain airborne concentrations below OSHA PELs. Local exhaust ventilation is preferred because it prevents contaminant dispersion into the work area by controlling it at its source.

PERSONAL PROTECTIVE EQUIPMENT:

Skin Protection:

Wear chemically protective gloves, boots and aprons to prevent prolonged or repeated skin contact.

Eye Protection:

Wear protective eyeglasses or chemical safety goggles, per OSHA eye and face protection regulations (29 CFR 1910.133). Contact lenses are not eye protective devices. Full face shield recommended for conditions where liquid contact is possible. Contact lens should not be work when working with this chemical.

Respiratory Protection:

Seek professional advice prior to respirator selection and use. Follow OSHA respirator regulations (29 CFR 1910.134) and, if necessary, wear a MSHA/NIOSH approved respirator. For emergency or non-routine operations (cleaning spill, reactor vessels or storage tanks), wear an SCBA. Warning! Airpurifying respirators do not protect workers in oxygen deficient atmospheres.

ADDITIONAL RECOMMENDATIONS:

Make emergency eyewash stations and washing facilities available in work area. Separate contaminated work clothes from street clothes. Launder before reuse. Remove this material from your shoes and clean personal protective equipment. Never eat, drink, or smoke in work areas. Practice good personal hygiene after use.

Spills and releases may have to be reported to Federal and/or local authorities. See section 15 regrding reporting requirements.

EXPOSURE GUIDELINES

INGREDIENT NAME
Methanol

ACGIH TLV 200 ppm (skin) OSHA PEL 200 ppm (skin) OTHER LIMIT None

9. Physical and Chemical Properties

Appearance: Clear, colorless liquid

Odor: Characteristic odor

Solubility: Miscible in water

Specific Gravity: 0.8 pH: No information found

% Volatiles by volume @ 21C (70F): 100

Boiling Point: 64.5C (147F)

Melting Point: -98C (-144F)

Vapor Pressure (mm Hg): 97 @ 20C (68F)

Evaporation Rate (BuAc = 1): 5.9

Disk23:62907

10. Stability and Reactivity

Stability:

Stable under ordinary conditions of use and storage

Hazardous Decomposition Products:

May form carbon dioxide, carbon monoxide, and formaldehyde when heated to decomposition

Hazardous Polymerization:

Will not occur

Incompatibilities:

Strong oxidizing agents such as nitrates, perchlorates or sulfuric acid. Will attack some forms of plastics, rubber, and coatings. May react with metallic aluminum and generate hydrogen gas.

Conditions to Avoid:

Heat, flames, ignition sources and incompatibles.

11. Toxicological Information

Toxicological Data:

Methyl alcohol (Methanol) Oral rat LD50: 5628 mg/kg; inhalation rat LC50: 64000 ppm/4H; skin rabbit LD50: 15800 mg/kg; Irritation data-standard Draize test: skin, rabbit: 20mg/24 hr. Moderate; eye, rabbit: 100 mg/24 hr. Moderate. Investigated as a mutagen, reproductive effector.

Reproductive Toxicity:

Dichloromethane has been linked to spontaneous abortions in humans.

12. Ecological Information

Environmental Fate:

When released into the soil, this material is expected to readily biodegradable. When released into the soil, this material is expected to leach into groundwater. When released into the soil, this material is expected to quickly evaporate. When released into the water, this material is expected to have a half-life between 1 and 10 days. When released into water, this material is expected to readily biodegrade. When released into the air, this material is expected to exist in the aerosol phase with a short half-life. When released into the air, this material is expected to be readily degraded by reaction with photochemically produced hydroxyl radicals. When released into the air, this material is expected to have a half-life between 10 and 30 days. When released into the air, this material is expected to be readily removed from the atmosphere by wet deposition.

Disk23:62907 5

Environmental Toxicity:

This material is expected to be slightly toxic to aquatic life.

13. Disposal Considerations

Whatever cannot be saved for recovery or recycling should be handled as hazardous waste and sent to a RCRA approved incinerator or disposed in a RCRA approved waste facility. Processing, use or contamination of this product may change the waste management options. State and Local disposal regulations may differ from Federal disposal regulations. Dispose of container and unused contents in accordance with Federal, State, and Local requirements.

Will not occur

Incompatibilities:

Strong oxidizing agents such as nitrates, perchlorates or sulfuric acid. Will attack some forms of plastics, rubber, and coatings. May react with metallic aluminum and generate hydrogen gas.

Conditions to Avoid:

Heat, flames, ignition sources and incompatibles.

11. Toxicological Information

Toxicological Data:

Methyl alcohol (Methanol) Oral rat LD50: 5628 mg/kg; inhalation rat LC50: 64000 ppm/4H; skin rabbit LD50: 15800 mg/kg; Irritation data-standard Draize test: skin, rabbit: 20mg/24 hr. Moderate; eye, rabbit: 100 mg/24 hr. Moderate. Investigated as a mutagen, reproductive effector.

Reproductive Toxicity:

Dichloromethane has been linked to spontaneous abortions in humans.

Cancer Lists:

INGREDIENT	NTP Carcinogen <u>Known</u> <u>Anticipated</u> <u>IARC Catego</u>				
Methyl alcohol (67-56-1)	No	No	None		

12. Ecological Information

Environmental Fate:

When released into the soil, this material is expected to readily biodegradable. When released into the soil, this material is expected to leach into groundwater. When released into the soil, this material is expected to quickly evaporate. When released into the water, this material is expected to have a half-life between 1 and 10 days. When released into water, this material is expected to readily biodegrade. When released into the air, this material is expected to exist in the aerosol phase with a short half-life. When released into the air, this material is expected to be readily degraded by reaction with photochemically produced hydroxyl radicals. When released into the air, this material is expected to have a half-life between 10 and 30 days. When released into the air, this material is expected to be readily removed from the atmosphere by wet deposition.

Disk23:62907 5

Environmental Toxicity:

This material is expected to be slightly toxic to aquatic life.

13. Disposal Considerations

Whatever cannot be saved for recovery or recycling should be handled as hazardous waste and sent to a RCRA approved incinerator or disposed in a RCRA approved waste facility. Processing, use or contamination of this product may change the waste management options. State and Local disposal regulations may differ from Federal disposal regulations. Dispose of container and unused contents in accordance with Federal, State, and Local requirements.

14. Transport Information

WARNING:

THIS PRODUCT CONTAINS A CHEMICAL(S) KNOWN TO THE STATE OF CALIFORNIA TO CAUSE CANCER.

Australian Hazchem Code: 2PE

Poison Schedule: S6

WHMIS: This MSDS has been prepared according to the hazard criteria of the Controlled Products Regulations (CPR) and the MSDS contains all of the information required by the CPR.

16. Other Information

NFPA Ratings:

Health: 1

Flammability: 3

Reactivity: 0

Label Hazard Warning:

POISON! DANGER! VAPOR HARMFUL. MAY BE FATAL OR CAUSE BLINDNESS IF SWALLOWED. HARMFUL IF INHALED OR ABSORBED THROUGH SKIN. CANNOT BE MADE NONPOISONOUS. FLAMMABLE LIQUID AND VAPOR. CAUSES IRRITATION TO SKIN, EYES AND RESPIRATORY TRACT. AFFECTS CENTRAL NERVOUS SYSTEM AND LIVER.

Label Precautions:

- Do not breathe vapor.
- Keep container closed.
- Use only with adequate ventilation.
- Wash thoroughly after handling.
- Keep away from heat and flame.
- Do not get in eyes, on skin, or on clothing.

Label First Aid:

If inhaled, remove to fresh air, If not breathing, give artificial respiration. If breathing is difficult, give oxygen. If swallowed, induce vomiting immediately as directed by medical personnel. Never give anything by mouth to an unconscious person. In case of contact, immediately flush eyes or skin with plenty of water for at least 15 minutes while removing contaminated clothing and shoes. Wash clothing before reuse. In all cases get medical attention immediately.

Product Use:

Laboratory Reagent.

Revision Information:

No Changes.

Bill Of Lading #:

81273

F	Folder ID :	Internal Temp Paperwork		 	,	 	
-			 	 		 	

Original - Shipper Provided Short Form Straight Bill of Lading - Not Negotiable - Domestic

SHIPPED FROM:	TRAILER #222
CES Environmental Services, Inc. (TSDF)	11a) HOU-2481
4904 Griggs Road	11b)
Houston, TX 77021	11c)
(713) 676-1460	11c)

The property described below, in apparent good order, except as noted (content and condition of packages unknown), marked, consigned, and destined as indicated below, whic said carrier (the word carrier being understood throughout this as meaning any person or corporation authorized to be in possession of the property under the contract) agrees to carry to its unusual place of delivery at said destination, if on its route, otherwise to deliver to another carrier on the route to said destination. This Bill of Lading is a receipt for goods; it is not of itself a contract of carriage. It is mutually agreed, as to each carrier of all or as to any said over all or any portion of said route to destination, and as to each par any time interested in all or any of said property, that every service to be performed hereunder shall be subject to all the terms and conditions contained in the applicable contract between shipper and carrier or intermediary.

For payment: Charges to be billed to Shipper or the "Billed to" party are set forth in the governing contract with Shipper. No charges other than those contained therein may be bit to Shipper or the "Billed to" party without prior written consent of Shipper. The extra copy of this Bill of Lading, furnished at the time of shipment, must be attached to the freight be submitted to Shipper or the "Billed to" party and sent to:

CONSIGNED TO:

CES Environmental Services, Inc.

4904 Griggs Rd.

Houston, TX 77021

CARRIER:

CES Environmental Services, Inc.

4904 Griggs Rd.

Houston, TX 77021

This is to certify that the product stated below are properly classified, described, packaged, marked and labeled and is in proper condition for transportation according to the applicable regulations of the Department of Transportation. If this Shipment moves between to ports by a carrier by water, the law requires that the Bill of Lading shall state whetl it is "carrier's or shipper's weight."

Intermodal Certificate: All information required by Federal Highway Administration regulations at 49 CFR 390.54© implementing the Intermodal Safe Container Act of 1992 is set forth on the face of this bill of lading. The shipper name herein is the tendering party.

Oil Base 100 Neutral

Material Safety Data Sheet

IMPORTANT

Read this MSDS before handling or disposing of this product and pass this information on to employees, customers and users of this product.

Emergency Overview:

Physical State:

Liquid.

Color:

Clear to Light Amber

Odor:

Mild Petroleum Odor

Protect eyes from mistsing or spraying material. Protect exposed skin from repeated or prolonged exposure. Do not store material in open or unmarked containers. Spills may create a slipping hazard.

SECTION 3 - Hazards Identification

Also see Emergency Overview and Hazard Rating on Page 1 of this MSDS.

Major Route(s) of Entry: Skin Contact.

Signs and Symptoms of Acute Exposure:

Inhalation:

No significant adverse health effects are expected to occur upon short-term exposure.

Eye Contact:

This product can cause transient mild eye irritation with short-term contact with liquid sprays or mists.

Skin Contact:

This material can cause mild skin irritation from prolonged or repeated skin contact. Injection under the skin can cause inflammation and swelling. Injection of pressurized hydrocarbons can cause severe, permanent tissue damage. Initial symptoms may be minor. Injection of petroleum hydrocarbons requires immediate medical attention.

Ingestion:

If swallowed, large volumes of material can cause generalized depression, headache, drowsiness, nausea, vomiting and diarrhea. Smaller doses can cause a laxative effect. If aspirated into the lungs, liquid can cause lung damage.

Oil Base 100 Neutral (MSDS)

09/19/07

Page 2 of 11

Chronic Health Effects:

Contains a petroleum-based mineral oil. Prolonged or repeated skin contact can cause mild irritation and inflammation characterized by drying, cracking (dermatitis), or oily acne. Repeated or prolonged inhalation of petroleum-based mineral oil mists at concentrations above applicable workplace exposure levels can cause respiratory irritation or other pulmonary effects.

Conditions Aggravated by Exposure:

Medical conditions aggravated by exposure to this material may include pre-existing skin disorders.

Target Organs:

This material may cause damage to the following organs: Skin

Carcinogenic Potential:

This product does not contain any components at concentrations above 0.1%, which are considered carcinogenic by OSHA, IARC or NTP.

OSHA Hazard Classification is indicated by an "X" in the box adjacent to the hazard title. If no "X" is present, the product does not exhibit the hazard as defined in the OSHA Hazard Communication Standard (29 CFR 1910.1200).

OSHA Health Irritant ()	Hazar Toxic		ification Sensitizer	()	Highly Toxic ()	Corro	osive ()	Carc	inogenic	()
OSHA Physica Combustible Water-reactive	()	Explosi	ve	()	Pyrophoric Organic Peroxide	()	Flammable Unstable	` '	Oxidizer	()

SECTION 4 - First Aid Measures

Take proper precautions to ensure your own health and safety before attempting rescure or providing first aid. For specific information, refer to Exposure Controls and Personal Protection in Section 8 of this MSDS.

Inhalation:

Vaporization is not expected at ambient temperatures. This material is not expected to cause inhalation-related disorders under anticipated conditions of use. In case of overexposure, move the person to fresh air.

Eye Contact:

Check for and remove contact lenses. Flush eyes with cool, clean, low-pressure water by lifting and lowering eyelids. Seek medical attention if excessive tearing, redness, or pain persist.

Skin Contact:

If burned by hot material, cool skin by quenching with large amounts of cool water. For contact with product at ambient temperatures, remove contaminated shoes and clothing. Wipe off excess material. Wash exposed skin with mild soap and water. Seek medical attention if tissue appears damaged or if pain or irritation persist. Thoroughly clean contaminated clothing before reuse. Discard

Oil Base 100 Neutral (MSDS)

09/19/07

Page 3 of 11

contaminated leather goods. If material is injected under the skin, seek medical attention immediately.

Ingestion:

Do not induce vomiting unless directed to by a physician. Do not give anything to drink unless directed to by a physician. Never give anything by mouth to a person who is no fully conscious. If significant amounts are swallowed or irritation or discomfort occurs, seek medical attention immediately.

Notes to Physician:

The viscosity range of the product represented by this MSDS is 100 to 400 SUS at 100F. Accordingly, upon ingestion there is low to moderate risk of aspiration. Careful gastric lavage may be considered to evacuate large quantities of material. Subcutaneous or intramuscular injection requires prompt surgical debridement.

SECTION 5 – Fire Fighting Measures

NFPA Flammability Classification: NFPA Class-IIIB combustible material. Slightly combustible.

Flash Point Method: Open Cup: 198C (388F) (Cleveland. (Minimum)).

Lower Flammable Limit: No Data

Upper Flammable Limit: No Data

Autoitgnition Temperature: Not Available

Hazardous Combustion Products:

Carbon dioxide, carbon monoxide, smoke, fumes, unburned hydrocarbons and trace oxides of sulfur and/or nitrogen.

Special Properties:

This material can burn but will not readily ignite. This material will release vapors when heated above the flash point temperature that can ignite when exposed to a source of ignition. In enclosed spaces, heated vapor can ignite with explosive force. Mists or sprays may burn at temperatures below the flash point.

Extinguishing Media:

Use dry chemical, foam, carbon dioxide or water fog.

Protection of Fire Fighters:

Firefighters must use full bunker gear including NIOSH-approved positive pressure self-contained breathing apparatus to protect against potential hazardous combustion or decomposition products and oxygen deficiencies.

SECTION 6 - Accidental Release Measures

Take proper precautions to ensure your own health and safety before attempting spill control or clean-up. For specific information, refer to the Emergency Overview on Page 1, Exposure Controls and Personal Protection in Section 8 and Disposal Considerations in Section 13 of this MSDS.

Do not touch damaged containers or spilled material unless wearing appropriate protective equipment. Slipping hazard; do not walk through spilled material. Stop leak if you can do so without risk. For small spills, absorb or cover with dry earth, sand, or other inert non-combustible absorbent material and place into waste containers for later disposal. Contain large spills to maximize product recovery or disposal. Prevent entry into waterways or sewers. In urban area, cleanup spill as soon as possible. In natural environments, seek cleanup advice from specialists to minimize physical habitat damage. This material will float on water. Absorbent pads and similar materials can be used. Comply with all laws and regulation.

SECTION 7 - Handling and Storage

Handling:

Avoid contamination and extreme temperatures to minimize product degradation. Empty containers may contain product residues that can ignite with explosive force. Do not pressurize, cut, weld, braze solder, drill, grind or expose containers to flames, sparks, heat or other potential ignition sources. Consult appropriate federal, state and local authorities before reusing, reconditioning, reclaiming recycling or disposing of empty containers and/or waste residues of this product.

Storage:

Keep container closed. Do not store with strong oxidizing agents. Do not store at elevated temperatures. Avoid storing product in direct sunlight for extended periods of time. Consult appropriate federal, state and local authorities before reusing, reconditioning, reclaiming, recycling or disposing of empty containers or waste residues of this product.

SECTION 8 - Exposure Controls / Personal Protection

Engineering Controls:

Provide exhaust ventilation or other engineering controls to keep the airborne concentrations of mistss and/or vapors below the recommended exposure limits (see below). An eye wash station and safety shower should be located near the work-station.

Personal Protective Equipment:

Personal protective equipment should be selected based upon the conditions under which this material is used. A hazard assessment of the work area for PPE requirements should be conducted by a qualified professional pursuant to OSHA regulations. The following pictograms represent the minimum requirements for personal protective equipment. For certain operations, additional PPE may be required.

Eye Protection:

Safety glasses equipped with side shields are recommended as minimum protection in industrial settings. Wear goggles and/or face shield if splashing or spraying is anticipated. Wear goggles and face shield if material is heated above 125F (51C). Have suitable eye wash water available.

Oil Base 100 Neutral (MSDS)

09/19/07

Page 5 of 11

Hand Protection:

Use gloves constructed of chemical resistant materials such as neoprene or heavy nitrile rubber if frequent or prolonged contact is expected. Use heat-protective gloves when handling product at elevated temperatures.

Body Protection:

Use clean and impervious protective clothing (e.g., neoprene or Tyvek) if splashing or spraying conditions are present. Protective clothing may include long-sleeve outer garment, apron, or lab coat. If significant contact occurs, remove oil-contaminated clothing as soon as possible and promptly shower. Launder contaminated clothing before reuse or discard. Wear heat protective boots and protective clothing when handling material at elevated temperatures.

Respiratory Protection:

Vaporization is not expected at ambient temperatures. Therefore, the need for respiratory protection is not anticipated under normal use conditions and with adequate ventilation. If elevated airborne concentrations above applicable workplace exposure levels are anticipated, a NIOSH-approved organic vapor respirator equipped with a dust/mists prefilter should be used. Protection factors vary depending upon the type of respirator used. Respirators should be used in accordance with OSHA requirements (29 CFR 1910.134).

General Comments:

Use good personal hygiene practices. Wash hands and other exposed skin areas with plenty of mild soap and water before eating, drinking, smoking, use of toilet facilities, or leaving work. DO NOT use gasoline, kerosene, solvents or harsh abrasives as skin cleaners. Since specific exposure standards/control limits have not been established for this product, the "Oil Mists, Mineral" exposure limits shown below are suggested as minimum control guidelines.

Occupational Exposure Guidelines:

Substance: Oil Mists, Mineral

Applicable Workplace Exposure Levels: ACGIH (United States)

TWA: 5 mg/m3 Stel: 10 mg/m3

OSHA (United States) TWA: 5 mg/m3

SECTION 9 - Physical and Chemical Properties

Physical State: Liquid

Color: Clear to Light Amber Odor: Mild Petroleum Odor

Specific Gravity: 0.86 (Water =1)

pH: Not Applicable

Vapor Density: >1 (Air = 1)

Boiling Point / Range: Not Available **Melting / Freezing Point:** Not Available

Oil Base 100 Neutral (MSDS)

09/19/07

Page 6 of 11

Vapor Pressure: <0.01 kPa (<0.1 mmHg) (at 20C)

Viscosity: (cSt @ 40C) 20

Solubility in Water: Insoluble in Cold Water **Volatile Characteristics:** Negligible Volatility

Additional Properties: Gravity, API (ASTM D287) = 32.5 @ 60F

Density = 7.18 lbs/gal

Viscosity (ASTM D2161) = 104 SUS @ 100F

SECTION 10 – Stability and Reactivity

Chemical Stability: Stable

Hazardous Polymerization: Not expected to occur

Materials Incompatibility: Strong Oxidizers

Conditions to Avoid:

Keep away from extreme heat, sparks, open flame, and strongly oxidizing conditions.

Hazardous Decomposition Products:

No additional hazardous decomposition products were identified other than the combustion products identified in Section 5 of this MSDS.

SECTION 11 – Toxicological Information

For other health-related information, refer to the Emergency Overview on Page 1 and the Hazards Identification in Section 3 of this MSDS.

Toxicity Data: Distillates, Petroleum, Solvent-Refined Light Paraffiniuc:

Oral (LD50): Acute: >5000 mg/kg [Rat]
Dermal (LD50): Acute: >2000 mg/kg [Rabbit]

Distillates, Petroleum, Solvent-Refined Heavy Paraffinic:

Oral (LD50): Acute: >5000 mg/kg [Rat]
Dermal (LD50): Acute: >2000 mg/kg [Rabbit]

Distillates, Petroleum, Solvent-Refined Light Paraffiniuc:

Mineral oil mists derived from highly refined oils are reported to have low acute and sub-acute toxicities in animals. Effects from single and short-term repeated exposures to high concentrations of mineral oil mists well above applicable workplace exposure levels include lung inflammatory reaction, lipoid granuloma formation and lipoid pneumonia. In acute and sub-acute studies involving exposures to lower concentrations of mineral mists at or near current work place exposure levels produced no significant toxicological effects. In long-term studies (up to two years) no carcinogenic effects have been reported in any animal species tested.

Oil Base 100 Neutral (MSDS)

09/19/07

Page 7 of 11

Distillates, Petroleum, Solvent-Refined Heavy Paraffinic:

Mineral oil mists derived from highly refined oils are reported to have low acute and sub-acute toxicities in animals. Effects from single and short-term repeated exposures to high concentrations of mineral oil in animals. Effects from single and short-term repeated exposure to high concentrations of mineral oil mists well above applicable workplace exposure levels include lung inflammatory reaction, lipoid, granuloma formation and lipoid pneumonia. In acute and sub-acute studies involving exposures to lower concentrations of mineral oil mists at or near current work place exposure levels produced no significant toxicological effects. In long-term studies (up to two years) no carcinogenic effects have been reported in any animal species attested. Analyses conducted by method IP 346 indicate that the polycyclic aromatic concentration of this mineral oil is below 3.0 weight percent.

SECTION 12 - Ecological Information

Ecotoxicity:

Analysis for ecological effects has not been conducted on this product. However, if spilled, this product and any contaminated soil or water may be harmful to human, animal, and aquatic life. Also, the coating action associated with petroleum and petroleum products can be harmful or fatal to aquatic life and waterfowl.

Environmental Fate:

An environmental fate analysis has not been conducted on this specific product. Plants and animals may experience harmful or fatal effects when coated with petroleum-based products. Petroleum-based (mineral) lube oils will normally float on water. In stagnant or slow-flowing waterways, an oil layer can cover a large surface area. As a result, this oil layer might limit or eliminate natural atmospheric oxygen transport into the water. With time, if not removed, oxygen depletion in the waterway may be sufficient to cause a fish kill or create an anaerobic environment.

SECTION 13 - Disposal Considerations

Hazard characteristic and regulatory waste stream classification can change with product use. Accordingly, it is the responsibility of the user to determine the proper storage, transportation, treatment and/or disposal methodologies for spent materials and residues at the time of disposition.

Conditions of use may cause this material to become a "hazardous waste", as defined by federal or state regulations. It is the responsibility of the user to determine if the material is a RCRA "hazardous waste" at the time of disposal. Transportation, treatment, storage and disposal of waste materials must be conducted in accordance with RCRA regulations (see 40 CFR 260 through 40 CFR 271). State and/or local regulations may be more restrictive. Contact the RCRA/Superfund Hotline at 800-424-9346 or your regional U.S. EPA office for guidance concerning case specific disposal issues.

SECTION 14 – Transport Information

The shipping description below may not represent requirements for all modes of transportation, shipping methods or locations outside of the United States.

Oil Base 100 Neutral (MSDS)

09/19/07

Page 8 of 11

U.S. DOT Status:

Not regulated by the U.S. Department of Transportation as a hazardous material

Proper Shipping Name: Not Regulated

Hazard Class: Not Regulated

Packing Group(s): Not Applicable

Un / NA ID: Not Regulated

Reportable Quantity:

A Reportable Quantity (RQ) has not been established for this material.

Placards:

Emergency Response Guide No: Not Applicable

HAZMAT STCC No: 2911990

MARPOL III Status: Not a DOT "Marine Pollutant" per 49 CFR 1718

SECTION 15 – Regulatory Information

TSCA Inventory:

This product and/or its components are listed on the Toxic Substance Control Act (TSCA) inventory.

SARA 302/304:

The Superfund Amendments and Reauthorization Act of 1986 (SARA) Title III requires facilities subject to Subparts 302 and 304 to submit emergency planning and notification information based on Threshold Planning Quantities (TPQs) and Reportable Quantities (RQs) for "Extremely Hazardous Substances" listed in 40 CFR 302.4 and 40 CFR 355. No components were identified.

SARA 311/312:

The Superfund Amendments and Reauthorization Act of 1986 (SARA) Title III requires facilities subject to this subpart to submit aggregate information on chemicals by "Hazard Category" as defined in 40 CFR 370.2. This material would be classified under the following hazard categories: No SARA 311 / 312 hazard categories identified.

SARA 313:

This product contains the following components in concentrations above de minimis levels that are listed as toxic chemicals in 40 CFR Part 372 pursuant to the requirements of Section 313 of SARA: No Components were identified.

CERCLA:

The Comprehensive Environmental Response, Compensation, and Liability Act of 1980 (CERCLA) requires notification of the National Response Center concerning release of quantities of "hazardous substances" equal to or greater than the reportable quantities (RQs) listed in 40 CFR 302.4. As

Oil Base 100 Neutral (MSDS)

09/19/07

Page 9 of 11

defined by CERCLA, the term "hazardous substance" does not include petroleum, including crude oil or any fraction thereof which is not otherwise specifically designated in 40 CFR 302.4. Chemical Substances present in this product or refinery stream that may be subject to this statue are: None Identified

CWA:

This material is classified as an oil under Section 311 of the Clean Water Act (CWA) and the Oil pollution Act of 1990 (OPA). Discharges or spills which produce a visible sheen on waters of the United States, their adjoining shorelines, or into conduits leading to surface waters must be reported to the EPA's National Response Center at 800-424-8802

California Proposition 65:

This material may contain the following components which are known to the State of California to cause cancer, birth defects or other reproductive harm, and may be subject to the requirements of California Proposition 65 (CA Health and Safety Code Section 25249.5): Toluene: 0.001%

New Jersey Right-to-Know Label: Petroleum Oil

Additional Regulatory Remarks: No additional regulatory remarks

SECTION 16 - Other Information

Refer to Page 1 for the HMIS and NFPA hazard Ratings for this product.

The property described below, in apparent good order, except as noted (content and condition of packages unknown), marked, consigned, and destined as indicated below, which said carrier (the word carrier being understood throughout this as meaning any person or corporation authorized to be in possession of the property under the contract) agrees to carry to its unusual place of delivery at said destination, if on its route, otherwise to deliver to another carrier on the route to said destination. This Bill of Lading is a receipt for goods; it is not of itself a contract of carriage. It is mutually agreed, as to each carrier of all or as to any said over all or any portion of said route to destination, and as to each par any time interested in all or any of said property, that every service to be performed hereunder shall be subject to all the terms and conditions contained in the applicable contract between shipper and carrier or intermediary.

For payment: Charges to be billed to Shipper or the "Billed to" party are set forth in the governing contract with Shipper. No charges other than those contained therein may be bi to Shipper or the "Billed to" party without prior written consent of Shipper. The extra copy of this Bill of Lading, furnished at the time of shipment, must be attached to the freight b submitted to Shipper or the "Billed to" party and sent to:

CONSIGNED TO:

CES Environmental Services, Inc.

4904 Griggs Rd.

Houston, TX 77021

CARRIER:

CES Environmental Services, Inc.

4904 Griggs Rd.

Houston, TX 77021

This is to certify that the product stated below are properly classified, described, packaged, marked and labeled and is in proper condition for transportation according to the applicable regulations of the Department of Transportation. If this Shipment moves between to ports by a carrier by water, the law requires that the Bill of Lading shall state wheth it is "carrier's or shipper's weight."

Intermodal Certificate: All information required by Federal Highway Administration regulations at 49 CFR 390.54© implementing the Intermodal Safe Container Act of 1992 is set forth on the face of this bill of lading. The shipper name herein is the tendering party.

Oil Base 100 Neutral Material Safety Data Sheet

IMPORTANT

Read this MSDS before handling or disposing of this product and pass this information on to employees, customers and users of this product.

Emergency Overview:

Physical State:

Liquid.

Color:

Clear to Light Amber

Odor:

Mild Petroleum Odor

Protect eyes from mistsing or spraying material. Protect exposed skin from repeated or prolonged exposure. Do not store material in open or unmarked containers. Spills may create a slipping hazard.

SECTION 3 - Hazards Identification

Also see Emergency Overview and Hazard Rating on Page 1 of this MSDS.

Major Route(s) of Entry: Skin Contact.

Signs and Symptoms of Acute Exposure:

Inhalation:

No significant adverse health effects are expected to occur upon short-term exposure.

Eye Contact:

This product can cause transient mild eye irritation with short-term contact with liquid sprays or mists.

Skin Contact:

This material can cause mild skin irritation from prolonged or repeated skin contact. Injection under the skin can cause inflammation and swelling. Injection of pressurized hydrocarbons can cause Initial symptoms may be minor. severe, permanent tissue damage. Injection of petroleum hydrocarbons requires immediate medical attention.

Ingestion:

If swallowed, large volumes of material can cause generalized depression, headache, drowsiness, nausea, vomiting and diarrhea. Smaller doses can cause a laxative effect. If aspirated into the lungs, liquid can cause lung damage.

Oil Base 100 Neutral (MSDS)

09/19/07

Page 2 of 11

Chronic Health Effects:

Contains a petroleum-based mineral oil. Prolonged or repeated skin contact can cause mild irritation and inflammation characterized by drying, cracking (dermatitis), or oily acne. Repeated or prolonged inhalation of petroleum-based mineral oil mists at concentrations above applicable workplace exposure levels can cause respiratory irritation or other pulmonary effects.

Conditions Aggravated by Exposure:

Medical conditions aggravated by exposure to this material may include pre-existing skin disorders.

Target Organs:

This material may cause damage to the following organs: Skin

Carcinogenic Potential:

This product does not contain any components at concentrations above 0.1%, which are considered carcinogenic by OSHA, IARC or NTP.

OSHA Hazard Classification is indicated by an "X" in the box adjacent to the hazard title. If no "X" is present, the product does not exhibit the hazard as defined in the OSHA Hazard Communication Standard (29 CFR 1910.1200).

OSHA Health Irritant ()	Hazar Toxic		cation nsitizer ()	Highly Toxic ()	Corro	osive ()	Card	cinogenic ()
OSHA Physical Combustible Water-reactive	()	Explosive		Pyrophoric Organic Peroxide	()	Flammable Unstable	()	Oxidizer ()

SECTION 4 - First Aid Measures

Take proper precautions to ensure your own health and safety before attempting rescure or providing first aid. For specific information, refer to Exposure Controls and Personal Protection in Section 8 of this MSDS.

Inhalation:

Vaporization is not expected at ambient temperatures. This material is not expected to cause inhalation-related disorders under anticipated conditions of use. In case of overexposure, move the person to fresh air.

Eye Contact:

Check for and remove contact lenses. Flush eyes with cool, clean, low-pressure water by lifting and lowering eyelids. Seek medical attention if excessive tearing, redness, or pain persist.

Skin Contact:

If burned by hot material, cool skin by quenching with large amounts of cool water. For contact with product at ambient temperatures, remove contaminated shoes and clothing. Wipe off excess material. Wash exposed skin with mild soap and water. Seek medical attention if tissue appears damaged or if pain or irritation persist. Thoroughly clean contaminated clothing before reuse. Discard

Oil Base 100 Neutral (MSDS)

09/19/07

Page 3 of 11

contaminated leather goods. If material is injected under the skin, seek medical attention immediately.

Ingestion:

Do not induce vomiting unless directed to by a physician. Do not give anything to drink unless directed to by a physician. Never give anything by mouth to a person who is no fully conscious. If significant amounts are swallowed or irritation or discomfort occurs, seek medical attention immediately.

Notes to Physician:

The viscosity range of the product represented by this MSDS is 100 to 400 SUS at 100F. Accordingly, upon ingestion there is low to moderate risk of aspiration. Careful gastric lavage may be considered to evacuate large quantities of material. Subcutaneous or intramuscular injection requires prompt surgical debridement.

SECTION 5 – Fire Fighting Measures

NFPA Flammability Classification: NFPA Class-IIIB combustible material. Slightly combustible.

Flash Point Method: Open Cup: 198C (388F) (Cleveland. (Minimum)).

Lower Flammable Limit: No Data

Upper Flammable Limit: No Data

Autoitgnition Temperature: Not Available

Hazardous Combustion Products:

Carbon dioxide, carbon monoxide, smoke, fumes, unburned hydrocarbons and trace oxides of sulfur and/or nitrogen.

Special Properties:

This material can burn but will not readily ignite. This material will release vapors when heated above the flash point temperature that can ignite when exposed to a source of ignition. In enclosed spaces, heated vapor can ignite with explosive force. Mists or sprays may burn at temperatures below the flash point.

Extinguishing Media:

Use dry chemical, foam, carbon dioxide or water fog.

Protection of Fire Fighters:

Firefighters must use full bunker gear including NIOSH-approved positive pressure self-contained breathing apparatus to protect against potential hazardous combustion or decomposition products and oxygen deficiencies.

SECTION 6 - Accidental Release Measures

Take proper precautions to ensure your own health and safety before attempting spill control or clean-up. For specific information, refer to the Emergency Overview on Page 1, Exposure Controls and Personal Protection in Section 8 and Disposal Considerations in Section 13 of this MSDS.

Do not touch damaged containers or spilled material unless wearing appropriate protective equipment. Slipping hazard; do not walk through spilled material. Stop leak if you can do so without risk. For small spills, absorb or cover with dry earth, sand, or other inert non-combustible absorbent material and place into waste containers for later disposal. Contain large spills to maximize product recovery or disposal. Prevent entry into waterways or sewers. In urban area, cleanup spill as soon as possible. In natural environments, seek cleanup advice from specialists to minimize physical habitat damage. This material will float on water. Absorbent pads and similar materials can be used. Comply with all laws and regulation.

SECTION 7 - Handling and Storage

Handling:

Avoid contamination and extreme temperatures to minimize product degradation. Empty containers may contain product residues that can ignite with explosive force. Do not pressurize, cut, weld, braze solder, drill, grind or expose containers to flames, sparks, heat or other potential ignition sources. Consult appropriate federal, state and local authorities before reusing, reconditioning, reclaiming recycling or disposing of empty containers and/or waste residues of this product.

Storage:

Keep container closed. Do not store with strong oxidizing agents. Do not store at elevated temperatures. Avoid storing product in direct sunlight for extended periods of time. Consult appropriate federal, state and local authorities before reusing, reconditioning, reclaiming, recycling or disposing of empty containers or waste residues of this product.

SECTION 8 - Exposure Controls / Personal Protection

Engineering Controls:

Provide exhaust ventilation or other engineering controls to keep the airborne concentrations of mistss and/or vapors below the recommended exposure limits (see below). An eye wash station and safety shower should be located near the work-station.

Personal Protective Equipment:

Personal protective equipment should be selected based upon the conditions under which this material is used. A hazard assessment of the work area for PPE requirements should be conducted by a qualified professional pursuant to OSHA regulations. The following pictograms represent the minimum requirements for personal protective equipment. For certain operations, additional PPE may be required.

Eye Protection:

Safety glasses equipped with side shields are recommended as minimum protection in industrial settings. Wear goggles and/or face shield if splashing or spraying is anticipated. Wear goggles and face shield if material is heated above 125F (51C). Have suitable eye wash water available.

Oil Base 100 Neutral (MSDS)

09/19/07

Page 5 of 11

Hand Protection:

Use gloves constructed of chemical resistant materials such as neoprene or heavy nitrile rubber if frequent or prolonged contact is expected. Use heat-protective gloves when handling product at elevated temperatures.

Body Protection:

Use clean and impervious protective clothing (e.g., neoprene or Tyvek) if splashing or spraying conditions are present. Protective clothing may include long-sleeve outer garment, apron, or lab coat. If significant contact occurs, remove oil-contaminated clothing as soon as possible and promptly shower. Launder contaminated clothing before reuse or discard. Wear heat protective boots and protective clothing when handling material at elevated temperatures.

Respiratory Protection:

Vaporization is not expected at ambient temperatures. Therefore, the need for respiratory protection is not anticipated under normal use conditions and with adequate ventilation. If elevated airborne concentrations above applicable workplace exposure levels are anticipated, a NIOSH-approved organic vapor respirator equipped with a dust/mists prefilter should be used. Protection factors vary depending upon the type of respirator used. Respirators should be used in accordance with OSHA requirements (29 CFR 1910.134).

General Comments:

Use good personal hygiene practices. Wash hands and other exposed skin areas with plenty of mild soap and water before eating, drinking, smoking, use of toilet facilities, or leaving work. DO NOT use gasoline, kerosene, solvents or harsh abrasives as skin cleaners. Since specific exposure standards/control limits have not been established for this product, the "Oil Mists, Mineral" exposure limits shown below are suggested as minimum control guidelines.

Occupational Exposure Guidelines:

Substance: Oil Mists, Mineral

Applicable Workplace Exposure Levels: ACGIH (United States)

TWA: 5 mg/m3 Stel: 10 mg/m3

OSHA (United States)
TWA: 5 mg/m3

SECTION 9 – Physical and Chemical Properties

Physical State: Liquid

Color: Clear to Light Amber
Odor: Mild Petroleum Odor
Specific Gravity: 0.86 (Water =1)

pH: Not Applicable

Vapor Density: >1 (Air = 1)

Boiling Point / Range: Not Available **Melting / Freezing Point:** Not Available

Oil Base 100 Neutral (MSDS)

09/19/07

Page 6 of 11

Vapor Pressure: <0.01 kPa (<0.1 mmHg) (at 20C)

Viscosity: (cSt @ 40C) 20

Solubility in Water: Insoluble in Cold Water Volatile Characteristics: Negligible Volatility

Additional Properties: Gravity, API (ASTM D287) = 32.5 @ 60F

Density = 7.18 lbs/gal

Viscosity (ASTM D2161) = 104 SUS @ 100F

SECTION 10 - Stability and Reactivity

Chemical Stability: Stable

Hazardous Polymerization: Not expected to occur

Materials Incompatibility: Strong Oxidizers

Conditions to Avoid:

Keep away from extreme heat, sparks, open flame, and strongly oxidizing conditions.

Hazardous Decomposition Products:

No additional hazardous decomposition products were identified other than the combustion products identified in Section 5 of this MSDS.

SECTION 11 – Toxicological Information

For other health-related information, refer to the Emergency Overview on Page 1 and the Hazards Identification in Section 3 of this MSDS.

Toxicity Data: Distillates, Petroleum, Solvent-Refined <u>Light</u> Paraffiniuc:

Oral (LD50): Acute: >5000 mg/kg [Rat]
Dermal (LD50): Acute: >2000 mg/kg [Rabbit]

Distillates, Petroleum, Solvent-Refined Heavy Paraffinic:

Oral (LD50): Acute: >5000 mg/kg [Rat]
Dermal (LD50): Acute: >2000 mg/kg [Rabbit]

Distillates, Petroleum, Solvent-Refined Light Paraffiniuc:

Mineral oil mists derived from highly refined oils are reported to have low acute and sub-acute toxicities in animals. Effects from single and short-term repeated exposures to high concentrations of mineral oil mists well above applicable workplace exposure levels include lung inflammatory reaction, lipoid granuloma formation and lipoid pneumonia. In acute and sub-acute studies involving exposures to lower concentrations of mineral mists at or near current work place exposure levels produced no significant toxicological effects. In long-term studies (up to two years) no carcinogenic effects have been reported in any animal species tested.

Oil Base 100 Neutral (MSDS)

09/19/07

Page 7 of 11

Distillates, Petroleum, Solvent-Refined Heavy Paraffinic:

Mineral oil mists derived from highly refined oils are reported to have low acute and sub-acute toxicities in animals. Effects from single and short-term repeated exposures to high concentrations of mineral oil in animals. Effects from single and short-term repeated exposure to high concentrations of mineral oil mists well above applicable workplace exposure levels include lung inflammatory reaction, lipoid, granuloma formation and lipoid pneumonia. In acute and sub-acute studies involving exposures to lower concentrations of mineral oil mists at or near current work place exposure levels produced no significant toxicological effects. In long-term studies (up to two years) no carcinogenic effects have been reported in any animal species attested. Analyses conducted by method IP 346 indicate that the polycyclic aromatic concentration of this mineral oil is below 3.0 weight percent.

SECTION 12 - Ecological Information

Ecotoxicity:

Analysis for ecological effects has not been conducted on this product. However, if spilled, this product and any contaminated soil or water may be harmful to human, animal, and aquatic life. Also, the coating action associated with petroleum and petroleum products can be harmful or fatal to aquatic life and waterfowl.

Environmental Fate:

An environmental fate analysis has not been conducted on this specific product. Plants and animals may experience harmful or fatal effects when coated with petroleum-based products. Petroleum-based (mineral) lube oils will normally float on water. In stagnant or slow-flowing waterways, an oil layer can cover a large surface area. As a result, this oil layer might limit or eliminate natural atmospheric oxygen transport into the water. With time, if not removed, oxygen depletion in the waterway may be sufficient to cause a fish kill or create an anaerobic environment.

SECTION 13 - Disposal Considerations

Hazard characteristic and regulatory waste stream classification can change with product use. Accordingly, it is the responsibility of the user to determine the proper storage, transportation, treatment and/or disposal methodologies for spent materials and residues at the time of disposition.

Conditions of use may cause this material to become a "hazardous waste", as defined by federal or state regulations. It is the responsibility of the user to determine if the material is a RCRA "hazardous waste" at the time of disposal. Transportation, treatment, storage and disposal of waste materials must be conducted in accordance with RCRA regulations (see 40 CFR 260 through 40 CFR 271). State and/or local regulations may be more restrictive. Contact the RCRA/Superfund Hotline at 800-424-9346 or your regional U.S. EPA office for guidance concerning case specific disposal issues.

SECTION 14 – Transport Information

The shipping description below may not represent requirements for all modes of transportation, shipping methods or locations outside of the United States.

Oil Base 100 Neutral (MSDS)

09/19/07

Page 8 of 11

U.S. DOT Status:

Not regulated by the U.S. Department of Transportation as a hazardous material

Proper Shipping Name: Not Regulated

Hazard Class: Not Regulated

Packing Group(s): Not Applicable

Un / NA ID: Not Regulated

Reportable Quantity:

A Reportable Quantity (RQ) has not been established for this material.

Placards:

Emergency Response Guide No: Not Applicable

HAZMAT STCC No: 2911990

MARPOL III Status: Not a DOT "Marine Pollutant" per 49 CFR 1718

SECTION 15 – Regulatory Information

TSCA Inventory:

This product and/or its components are listed on the Toxic Substance Control Act (TSCA) inventory.

SARA 302 / 304:

The Superfund Amendments and Reauthorization Act of 1986 (SARA) Title III requires facilities subject to Subparts 302 and 304 to submit emergency planning and notification information based on Threshold Planning Quantities (TPQs) and Reportable Quantities (RQs) for "Extremely Hazardous Substances" listed in 40 CFR 302.4 and 40 CFR 355. No components were identified.

SARA 311/312:

The Superfund Amendments and Reauthorization Act of 1986 (SARA) Title III requires facilities subject to this subpart to submit aggregate information on chemicals by "Hazard Category" as defined in 40 CFR 370.2. This material would be classified under the following hazard categories: No SARA 311 / 312 hazard categories identified.

SARA 313:

This product contains the following components in concentrations above de minimis levels that are listed as toxic chemicals in 40 CFR Part 372 pursuant to the requirements of Section 313 of SARA: No Components were identified.

CERCLA:

The Comprehensive Environmental Response, Compensation, and Liability Act of 1980 (CERCLA) requires notification of the National Response Center concerning release of quantities of "hazardous substances" equal to or greater than the reportable quantities (RQs) listed in 40 CFR 302.4. As

Oil Base 100 Neutral (MSDS)

09/19/07

Page 9 of 11

defined by CERCLA, the term "hazardous substance" does not include petroleum, including crude oil or any fraction thereof which is not otherwise specifically designated in 40 CFR 302.4. Chemical Substances present in this product or refinery stream that may be subject to this statue are: None Identified.

CWA:

This material is classified as an oil under Section 311 of the Clean Water Act (CWA) and the Oil pollution Act of 1990 (OPA). Discharges or spills which produce a visible sheen on waters of the United States, their adjoining shorelines, or into conduits leading to surface waters must be reported to the EPA's National Response Center at 800-424-8802

California Proposition 65:

This material may contain the following components which are known to the State of California to cause cancer, birth defects or other reproductive harm, and may be subject to the requirements of California Proposition 65 (CA Health and Safety Code Section 25249.5): Toluene: 0.001%

New Jersey Right-to-Know Label: Petroleum Oil

Additional Regulatory Remarks: No additional regulatory remarks

SECTION 16 - Other Information

Refer to Page 1 for the HMIS and NFPA hazard Ratings for this product.

COMPANY IDENTIFICATION

CES Environmental Services, Inc 4904 Griggs Road Houston, TX 77021

Information:

(713) 676-1460

Emergency Contact:

(713) 676-1460

1. Product Identification

Synonyms:

Wood alcohol; methanol; carbinol

CAS No:

67-56-1

Molecular Weight: Chemical Formula:

32.04 CH3OH

2. Composition/Information on Ingredients

INGREDIENT	CAS NO.	PERCENT	<u>HAZARDOUS</u>
Methanol	67-56-1	80-85	Yes
Methylene Chloride	75-09-2	0.5-2.0	Yes
Water	7732-18-5	15-20	No

3. Hazards Identification

Emergency Overview:

POISON! DANGER! VAPOR HARMFUL. MAY BE FATAL OR CAUSE BLINDNESS IF SWALLOWED. HARMFUL IF INHALED OR ABSORBED THROUGH SKIN. CANNOT BE MADE NONPOISONOUS. FLAMMABLE LIQUID AND VAPOR. CAUSES IRRITATION TO SKIN, EYES, AND RESPIRATORY TRACT. AFFECTS CENTRAL NERVOUS SYSTEM AND LIVER

SAF-T-DATA (tm) Ratings (Provided here for your convenience)

<u>Health Rating</u>: 3 Severe (Poison) <u>Flammability Rating</u>: 3 Severe (Flammable)

Reactivity Rating:

1 Slight

Contact Rating:

3 Severe (Life)

Lab Protective Equipment:

Goggles & Shield; Lab Coat & Apron; Vent Hood; Proper

Gloves; Class B Extinguisher

Storage Color Code:

Red (Flammable)

Disk23:62907

POTENTIAL HEALTH EFFECTS:

Inhalation:

A slight irritant to the mucous membranes. Toxic effects exerted upon nervous system, particularly the optic nerve. Once absorbed into the body, it is very slowly eliminated. Symptoms of overexposure may include headache, drowsiness, nausea, vomiting, blurred vision, blindness, coma, and death. A person may get better but then worse again up to 30 hours later.

Ingestion:

Toxic. Symptoms parallel inhalation. Can intoxicate and cause blindness. Usual fatal dose: 100-125 milliliters.

Skin Contact:

Methyl alcohol is de-fatting agent and may cause skin to become dry and cracked. Skin absorption can occur; symptoms may parallel inhalation exposure.

Eye Contact:

Irritant. Continued exposure may cause eye lesions.

Chronic Exposure:

Marked impairment of vision has been reported. Repeated or prolonged exposure may cause skin irritation..

Aggravation of Pre-existing Conditions:

Persons with pre-existing skin disorders, eye problems, impaired liver, kidney function may be more susceptible to the effects of the substance.

4. First Aid Measures

Inhalation:

Remove to fresh air. If not breathing, give artificial respiration. If breathing is difficult, give oxygen. Get medical attention.

Ingestion:

Induce vomiting immediately as directed by medical personnel. Never give anything by mouth to an unconscious person. Get medical attention immediately.

Skin Contact:

Immediately flush skin with plenty of water for at least 15 minutes while removing contaminated clothing and shoes. Get medical attention. Wash clothing before reuse. Thoroughly clean shoes before reuse.

Eye Contact:

Immediately flush eyes with plenty of water for at least 15 minutes, lifting lower and upper eyelids occasionally. Get medical attention immediately.

5. Fire Fighting Measures

FLAMMABLE PROPERTIES

Flash point:

12C (54F) CC

Autoignition temperature:

464C (867F)

Upper Flame Limit (volume % in air):

36%

Lower Flame Limit (volume % in air):

6%

OSHA Flammability Class:

ΙB

Fire Extinguishing Media:

Carbon dioxide, dry chemical or foam

Unusual fire and explosion hazards: Can burn with an invisible flame. Mixtures with high water content are still flammable.

Special fire fighting precaution/instructions: Wear full protective clothing and self contained breathing apparatus. Containers in fire conditions will pressurize and may rupture. Do not allow run off from fire fighting effort to enter sewer or waterway.

6. Accidental Release Measures

Ventilate area of leak or spill. (Always wear recommended personal protective equipment) Eliminate sources of ignition. Isolate the spill area. Stop leak in a safe and practical manner. (If leak cannot be stopped easily and safely, advise trained emergency response personnel of the situation). Using inert material (such as ground corncobs) dike the spilled solvent to prevent it from running into drains or waterways.

7. Handling and Storages

NORMAL HANDLING: (Always wear recommended personal protective equipment).

Flammable liquids and vapors: Keep containers closed. Do not breathe vapors. Avoid contact with skin, eyes and mucous membranes. Keep away from heat, sparks, and flame. Electrically ground all handling equipment.

STORAGE RECOMMENDATIONS: Store in an area designed for storage of flammable liquids. (OSHA 29 CFR 1910.106)

Protect from temperature extremes and sunlight, and store away from incompatible substances and in accordance with 29 CFR 1910.106.

Flammable liquid and vapor. Once liquid solvent has been completely dispensed, containers which appear "empty" should be handled in the same manner as when they were "full" of liquid solvent.

8. Exposure Controls/Personal Protection

ENGINEERING CONTROLS:

Provide general or local exhaust ventilation systems to maintain airborne concentrations below OSHA PELs. Local exhaust ventilation is preferred because it prevents contaminant dispersion into the work area by controlling it at its source.

PERSONAL PROTECTIVE EQUIPMENT:

Skin Protection:

Wear chemically protective gloves, boots and aprons to prevent prolonged or repeated skin contact.

Eye Protection:

Wear protective eyeglasses or chemical safety goggles, per OSHA eye and face protection regulations (29 CFR 1910.133). Contact lenses are not eye protective devices. Full face shield recommended for conditions where liquid contact is possible. Contact lens should not be work when working with this chemical.

Respiratory Protection:

Seek professional advice prior to respirator selection and use. Follow OSHA respirator regulations (29 CFR 1910.134) and, if necessary, wear a MSHA/NIOSH approved respirator. For emergency or non-routine operations (cleaning spill, reactor vessels or storage tanks), wear an SCBA. Warning! Airpurifying respirators do not protect workers in oxygen deficient atmospheres.

ADDITIONAL RECOMMENDATIONS:

Make emergency eyewash stations and washing facilities available in work area. Separate contaminated work clothes from street clothes. Launder before reuse. Remove this material from your shoes and clean personal protective equipment. Never eat, drink, or smoke in work areas. Practice good personal hygiene after use.

Spills and releases may have to be reported to Federal and/or local authorities. See section 15 regrding reporting requirements.

EXPOSURE GUIDELINES

INGREDIENT NAME Methanol ACGIH TLV 200 ppm (skin) OSHA PEL 200 ppm (skin) OTHER LIMIT None

9. Physical and Chemical Properties

Appearance: Clear, colorless liquid

Odor: Characteristic odor

Solubility: Miscible in water

Specific Gravity: 0.8 pH: No information found

% Volatiles by volume @ 21C (70F): 100

Boiling Point: 64.5C (147F)

Melting Point: -98C (-144F)

Vapor Density (Air = 1): 1.1

Vapor Pressure (mm Hg): 97 @ 20C (68F)

Evaporation Rate (BuAc = 1): 5.9

10. Stability and Reactivity

Stability:

Stable under ordinary conditions of use and storage

Hazardous Decomposition Products:

May form carbon dioxide, carbon monoxide, and formaldehyde when heated to decomposition

Hazardous Polymerization:

Will not occur

Incompatibilities:

Strong oxidizing agents such as nitrates, perchlorates or sulfuric acid. Will attack some forms of plastics, rubber, and coatings. May react with metallic aluminum and generate hydrogen gas.

Conditions to Avoid:

Heat, flames, ignition sources and incompatibles.

11. Toxicological Information

Toxicological Data:

Methyl alcohol (Methanol) Oral rat LD50: 5628 mg/kg; inhalation rat LC50: 64000 ppm/4H; skin rabbit LD50: 15800 mg/kg; Irritation data-standard Draize test: skin, rabbit: 20mg/24 hr. Moderate; eye, rabbit: 100 mg/24 hr. Moderate. Investigated as a mutagen, reproductive effector.

Reproductive Toxicity:

Dichloromethane has been linked to spontaneous abortions in humans.

Cancer Lists:

INGREDIENT	Known	NTP Carcinogen Anticipated	IARC Category
Methyl alcohol (67-56-1)	No	No	None

12. Ecological Information

Environmental Fate:

When released into the soil, this material is expected to readily biodegradable. When released into the soil, this material is expected to leach into groundwater. When released into the soil, this material is expected to quickly evaporate. When released into the water, this material is expected to have a half-life between 1 and 10 days. When released into water, this material is expected to readily biodegrade. When released into the air, this material is expected to exist in the aerosol phase with a short half-life. When released into the air, this material is expected to be readily degraded by reaction with photochemically produced hydroxyl radicals. When released into the air, this material is expected to have a half-life between 10 and 30 days. When released into the air, this material is expected to be readily removed from the atmosphere by wet deposition.

Environmental Toxicity:

This material is expected to be slightly toxic to aquatic life.

13. Disposal Considerations

Whatever cannot be saved for recovery or recycling should be handled as hazardous waste and sent to a RCRA approved incinerator or disposed in a RCRA approved waste facility. Processing, use or contamination of this product may change the waste management options. State and Local disposal regulations may differ from Federal disposal regulations. Dispose of container and unused contents in accordance with Federal, State, and Local requirements.

14. Transport Information

DOMESTIC (LAND, D.O.T.)

16. Other Information

NFPA Ratings:

Health: 1

Flammability: 3

Reactivity: 0

Label Hazard Warning:

POISON! DANGER! VAPOR HARMFUL. MAY BE FATAL OR CAUSE BLINDNESS IF SWALLOWED. HARMFUL IF INHALED OR ABSORBED THROUGH SKIN. CANNOT BE MADE NONPOISONOUS. FLAMMABLE LIQUID AND VAPOR. CAUSES IRRITATION TO SKIN, EYES AND RESPIRATORY TRACT. AFFECTS CENTRAL NERVOUS SYSTEM AND LIVER.

Label Precautions:

- Do not breathe vapor.
- Keep container closed.
- Use only with adequate ventilation.
- Wash thoroughly after handling.
- Keep away from heat and flame.
- Do not get in eyes, on skin, or on clothing.

Label First Aid:

If inhaled, remove to fresh air, If not breathing, give artificial respiration. If breathing is difficult, give oxygen. If swallowed, induce vomiting immediately as directed by medical personnel. Never give anything by mouth to an unconscious person. In case of contact, immediately flush eyes or skin with plenty of water for at least 15 minutes while removing contaminated clothing and shoes. Wash clothing before reuse. In all cases get medical attention immediately.

Product Use:

Laboratory Reagent.

Revision Information:

No Changes.

Oil Base 100 Neutral Material Safety Data Sheet

IMPORTANT

Read this MSDS before handling or disposing of this product and pass this information on to employees, customers and users of this product.

Emergency Overview:

Physical State: L

Liquid.

Color:

Clear to Light Amber

Odor:

Mild Petroleum Odor

Protect eyes from mistsing or spraying material. Protect exposed skin from repeated or prolonged exposure. Do not store material in open or unmarked containers. Spills may create a slipping hazard.

SECTION 3 - Hazards Identification

Also see Emergency Overview and Hazard Rating on Page 1 of this MSDS.

Major Route(s) of Entry: Skin Contact.

Signs and Symptoms of Acute Exposure:

Inhalation:

No significant adverse health effects are expected to occur upon short-term exposure.

Eye Contact:

This product can cause transient mild eye irritation with short-term contact with liquid sprays or mists.

Skin Contact:

This material can cause mild skin irritation from prolonged or repeated skin contact. Injection under the skin can cause inflammation and swelling. Injection of pressurized hydrocarbons can cause Initial symptoms may be minor. Injection of petroleum severe permanent tissue damage. hydrocarbons requires immediate medical attention.

Ingestion:

If swallowed, large volumes of material can cause generalized depression, headache, drowsiness, nausea, vomiting and diarrhea. Smaller doses can cause a laxative effect. If aspirated into the lungs, liquid can cause lung damage.

Oil Base 100 Neutral (MSDS)

09/19/07

Page 2 of 11

Chronic Health Effects:

Contains a petroleum-based mineral oil. Prolonged or repeated skin contact can cause mild irritation and inflammation characterized by drying, cracking (dermatitis), or oily acne. Repeated or prolonged inhalation of petroleum-based mineral oil mists at concentrations above applicable workplace exposure levels can cause respiratory irritation or other pulmonary effects.

Conditions Aggravated by Exposure:

Medical conditions aggravated by exposure to this material may include pre-existing skin disorders.

Target Organs:

This material may cause damage to the following organs: Skin

Carcinogenic Potential:

This product does not contain any components at concentrations above 0.1%, which are considered carcinogenic by OSHA, IARC or NTP.

OSHA Hazard Classification is indicated by an "X" in the box adjacent to the hazard title. If no "X" is present, the product does not exhibit the hazard as defined in the OSHA Hazard Communication Standard (29 CFR 1910.1200).

		Classification () Sensitizer	()	Highly Toxic ()	Corro	osive ()	Carc	inogenic	()
OSHA Physica Combustible Water-reactive	() E	rd Classification Explosive Compressed Gas	()	Pyrophoric Organic Peroxide	` '	Flammable Unstable	()	Oxidizer	()

SECTION 4 - First Aid Measures

Take proper precautions to ensure your own health and safety before attempting rescure or providing first aid. For specific information, refer to Exposure Controls and Personal Protection in Section 8 of this MSDS.

Inhalation:

Vaporization is not expected at ambient temperatures. This material is not expected to cause inhalation-related disorders under anticipated conditions of use. In case of overexposure, move the person to fresh air.

Eye Contact:

Check for and remove contact lenses. Flush eyes with cool, clean, low-pressure water by lifting and lowering eyelids. Seek medical attention if excessive tearing, redness, or pain persist.

Skin Contact:

If burned by hot material, cool skin by quenching with large amounts of cool water. For contact with product at ambient temperatures, remove contaminated shoes and clothing. Wipe off excess material. Wash exposed skin with mild soap and water. Seek medical attention if tissue appears damaged or if pain or irritation persist. Thoroughly clean contaminated clothing before reuse. Discard

Oil Base 100 Neutral (MSDS)

09/19/07

Page 3 of 11

contaminated leather goods. If material is injected under the skin, seek medical attention immediately.

Ingestion:

Do not induce vomiting unless directed to by a physician. Do not give anything to drink unless directed to by a physician. Never give anything by mouth to a person who is no fully conscious. If significant amounts are swallowed or irritation or discomfort occurs, seek medical attention immediately.

Notes to Physician:

The viscosity range of the product represented by this MSDS is 100 to 400 SUS at 100F. Accordingly, upon ingestion there is low to moderate risk of aspiration. Careful gastric lavage may be considered to evacuate large quantities of material. Subcutaneous or intramuscular injection requires prompt surgical debridement.

SECTION 5 – Fire Fighting Measures

NFPA Flammability Classification: NFPA Class-IIIB combustible material. Slightly combustible.

Flash Point Method: Open Cup: 198C (388F) (Cleveland. (Minimum)).

Lower Flammable Limit: No Data

Upper Flammable Limit: No Data

Autoitgnition Temperature: Not Available

Hazardous Combustion Products:

Carbon dioxide, carbon monoxide, smoke, fumes, unburned hydrocarbons and trace oxides of sulfur and/or nitrogen.

Special Properties:

This material can burn but will not readily ignite. This material will release vapors when heated above the flash point temperature that can ignite when exposed to a source of ignition. In enclosed spaces, heated vapor can ignite with explosive force. Mists or sprays may burn at temperatures below the flash point.

Extinguishing Media:

Use dry chemical, foam, carbon dioxide or water fog.

Protection of Fire Fighters:

Firefighters must use full bunker gear including NIOSH-approved positive pressure self-contained breathing apparatus to protect against potential hazardous combustion or decomposition products and oxygen deficiencies.

SECTION 6 - Accidental Release Measures

Take proper precautions to ensure your own health and safety before attempting spill control or clean-up. For specific information, refer to the Emergency Overview on Page 1, Exposure Controls and Personal Protection in Section 8 and Disposal Considerations in Section 13 of this MSDS.

Do not touch damaged containers or spilled material unless wearing appropriate protective equipment. Slipping hazard; do not walk through spilled material. Stop leak if you can do so without risk. For small spills, absorb or cover with dry earth, sand, or other inert non-combustible absorbent material and place into waste containers for later disposal. Contain large spills to maximize product recovery or disposal. Prevent entry into waterways or sewers. In urban area, cleanup spill as soon as possible. In natural environments, seek cleanup advice from specialists to minimize physical habitat damage. This material will float on water. Absorbent pads and similar materials can be used. Comply with all laws and regulation.

SECTION 7 – Handling and Storage

Handling:

Avoid contamination and extreme temperatures to minimize product degradation. Empty containers may contain product residues that can ignite with explosive force. Do not pressurize, cut, weld, braze solder, drill, grind or expose containers to flames, sparks, heat or other potential ignition sources. Consult appropriate federal, state and local authorities before reusing, reconditioning, reclaiming recycling or disposing of empty containers and/or waste residues of this product.

Storage:

Keep container closed. Do not store with strong oxidizing agents. Do not store at elevated temperatures. Avoid storing product in direct sunlight for extended periods of time. Consult appropriate federal, state and local authorities before reusing, reconditioning, reclaiming, recycling or disposing of empty containers or waste residues of this product.

SECTION 8 - Exposure Controls / Personal Protection

Engineering Controls:

Provide exhaust ventilation or other engineering controls to keep the airborne concentrations of mistss and/or vapors below the recommended exposure limits (see below). An eye wash station and safety shower should be located near the work-station.

Personal Protective Equipment:

Personal protective equipment should be selected based upon the conditions under which this material is used. A hazard assessment of the work area for PPE requirements should be conducted by a qualified professional pursuant to OSHA regulations. The following pictograms represent the minimum requirements for personal protective equipment. For certain operations, additional PPE may be required.

Eye Protection:

Safety glasses equipped with side shields are recommended as minimum protection in industrial settings. Wear goggles and/or face shield if splashing or spraying is anticipated. Wear goggles and face shield if material is heated above 125F (51C). Have suitable eye wash water available.

Oil Base 100 Neutral (MSDS)

09/19/07

Page 5 of 11

Hand Protection:

Use gloves constructed of chemical resistant materials such as neoprene or heavy nitrile rubber if frequent or prolonged contact is expected. Use heat-protective gloves when handling product at elevated temperatures.

Body Protection:

Use clean and impervious protective clothing (e.g., neoprene or Tyvek) if splashing or spraying conditions are present. Protective clothing may include long-sleeve outer garment, apron, or lab coat. If significant contact occurs, remove oil-contaminated clothing as soon as possible and promptly shower. Launder contaminated clothing before reuse or discard. Wear heat protective boots and protective clothing when handling material at elevated temperatures.

Respiratory Protection:

Vaporization is not expected at ambient temperatures. Therefore, the need for respiratory protection is not anticipated under normal use conditions and with adequate ventilation. If elevated airborne concentrations above applicable workplace exposure levels are anticipated, a NIOSH-approved organic vapor respirator equipped with a dust/mists prefilter should be used. Protection factors vary depending upon the type of respirator used. Respirators should be used in accordance with OSHA requirements (29 CFR 1910.134).

General Comments:

Use good personal hygiene practices. Wash hands and other exposed skin areas with plenty of mild soap and water before eating, drinking, smoking, use of toilet facilities, or leaving work. DO NOT use gasoline, kerosene, solvents or harsh abrasives as skin cleaners. Since specific exposure standards/control limits have not been established for this product, the "Oil Mists, Mineral" exposure limits shown below are suggested as minimum control guidelines.

Occupational Exposure Guidelines:

Substance: Oil Mists, Mineral

Applicable Workplace Exposure Levels: ACGIH (United States)

TWA: 5 mg/m3 Stel: 10 mg/m3

OSHA (United States) TWA: 5 mg/m3

SECTION 9 - Physical and Chemical Properties

Physical State: Liquid

Color: Clear to Light Amber
Odor: Mild Petroleum Odor
Cracific Cracific Constant O 86 (Mate

Specific Gravity: 0.86 (Water =1)

pH: Not Applicable

Vapor Density: >1 (Air = 1)

Boiling Point / Range: Not Available **Melting / Freezing Point:** Not Available

Oil Base 100 Neutral (MSDS)

09/19/07

Page 6 of 11

Vapor Pressure: <0.01 kPa (<0.1 mmHg) (at 20C)

Viscosity: (cSt @ 40C) 20

Solubility in Water: Insoluble in Cold Water **Volatile Characteristics:** Negligible Volatility

Additional Properties: Gravity, API (ASTM D287) = 32.5 @ 60F

Density = 7.18 lbs/gal

Viscosity (ASTM D2161) = 104 SUS @ 100F

SECTION 10 - Stability and Reactivity

Chemical Stability: Stable

Hazardous Polymerization: Not expected to occur

Materials Incompatibility: Strong Oxidizers

Conditions to Avoid:

Keep away from extreme heat, sparks, open flame, and strongly oxidizing conditions.

Hazardous Decomposition Products:

No additional hazardous decomposition products were identified other than the combustion products identified in Section 5 of this MSDS.

SECTION 11 - Toxicological Information

For other health-related information, refer to the Emergency Overview on Page 1 and the Hazards Identification in Section 3 of this MSDS.

Toxicity Data: Distillates, Petroleum, Solvent-Refined <u>Light</u> Paraffiniuc:

Oral (LD50): Acute: >5000 mg/kg [Rat]
Dermal (LD50): Acute: >2000 mg/kg [Rabbit]

Distillates, Petroleum, Solvent-Refined Heavy Paraffinic:

Oral (LD50): Acute: >5000 mg/kg [Rat]
Dermal (LD50): Acute: >2000 mg/kg [Rabbit]

Distillates, Petroleum, Solvent-Refined Light Paraffiniuc:

Mineral oil mists derived from highly refined oils are reported to have low acute and sub-acute toxicities in animals. Effects from single and short-term repeated exposures to high concentrations of mineral oil mists well above applicable workplace exposure levels include lung inflammatory reaction, lipoid granuloma formation and lipoid pneumonia. In acute and sub-acute studies involving exposures to lower concentrations of mineral mists at or near current work place exposure levels produced no significant toxicological effects. In long-term studies (up to two years) no carcinogenic effects have been reported in any animal species tested.

Oil Base 100 Neutral (MSDS)

09/19/07

Distillates, Petroleum, Solvent-Refined Heavy Paraffinic:

Mineral oil mists derived from highly refined oils are reported to have low acute and sub-acute toxicities in animals. Effects from single and short-term repeated exposures to high concentrations of mineral oil in animals. Effects from single and short-term repeated exposure to high concentrations of mineral oil mists well above applicable workplace exposure levels include lung inflammatory reaction, lipoid, granuloma formation and lipoid pneumonia. In acute and sub-acute studies involving exposures to lower concentrations of mineral oil mists at or near current work place exposure levels produced no significant toxicological effects. In long-term studies (up to two years) no carcinogenic effects have been reported in any animal species attested. Analyses conducted by method IP 346 indicate that the polycyclic aromatic concentration of this mineral oil is below 3.0 weight percent.

SECTION 12 - Ecological Information

Ecotoxicity:

Analysis for ecological effects has not been conducted on this product. However, if spilled, this product and any contaminated soil or water may be harmful to human, animal, and aquatic life. Also, the coating action associated with petroleum and petroleum products can be harmful or fatal to aquatic life and waterfowl.

Environmental Fate:

An environmental fate analysis has not been conducted on this specific product. Plants and animals may experience harmful or fatal effects when coated with petroleum-based products. Petroleum-based (mineral) lube oils will normally float on water. In stagnant or slow-flowing waterways, an oil layer can cover a large surface area. As a result, this oil layer might limit or eliminate natural atmospheric oxygen transport into the water. With time, if not removed, oxygen depletion in the waterway may be sufficient to cause a fish kill or create an anaerobic environment.

SECTION 13 - Disposal Considerations

Hazard characteristic and regulatory waste stream classification can change with product use. Accordingly, it is the responsibility of the user to determine the proper storage, transportation, treatment and/or disposal methodologies for spent materials and residues at the time of disposition.

Conditions of use may cause this material to become a "hazardous waste", as defined by federal or state regulations. It is the responsibility of the user to determine if the material is a RCRA "hazardous waste" at the time of disposal. Transportation, treatment, storage and disposal of waste materials must be conducted in accordance with RCRA regulations (see 40 CFR 260 through 40 CFR 271). State and/or local regulations may be more restrictive. Contact the RCRA/Superfund Hotline at 800-424-9346 or your regional U.S. EPA office for guidance concerning case specific disposal issues.

SECTION 14 - Transport Information

The shipping description below may not represent requirements for all modes of transportation, shipping methods or locations outside of the United States.

Oil Base 100 Neutral (MSDS)

09/19/07

Page 8 of 11

U.S. DOT Status:

Not regulated by the U.S. Department of Transportation as a hazardous material

Proper Shipping Name: Not Regulated

Hazard Class: Not Regulated

Packing Group(s): Not Applicable

Un / NA ID: Not Regulated

Reportable Quantity:

A Reportable Quantity (RQ) has not been established for this material.

Placards:

Emergency Response Guide No: Not Applicable

HAZMAT STCC No: 2911990

MARPOL III Status: Not a DOT "Marine Pollutant" per 49 CFR 1718

SECTION 15 - Regulatory Information

TSCA Inventory:

This product and/or its components are listed on the Toxic Substance Control Act (TSCA) inventory.

SARA 302 / 304:

The Superfund Amendments and Reauthorization Act of 1986 (SARA) Title III requires facilities subject to Subparts 302 and 304 to submit emergency planning and notification information based on Threshold Planning Quantities (TPQs) and Reportable Quantities (RQs) for "Extremely Hazardous Substances" listed in 40 CFR 302.4 and 40 CFR 355. No components were identified.

SARA 311/312:

The Superfund Amendments and Reauthorization Act of 1986 (SARA) Title III requires facilities subject to this subpart to submit aggregate information on chemicals by "Hazard Category" as defined in 40 CFR 370.2. This material would be classified under the following hazard categories: No SARA 311 / 312 hazard categories identified.

SARA 313:

This product contains the following components in concentrations above de minimis levels that are listed as toxic chemicals in 40 CFR Part 372 pursuant to the requirements of Section 313 of SARA: No Components were identified.

CERCLA:

The Comprehensive Environmental Response, Compensation, and Liability Act of 1980 (CERCLA) requires notification of the National Response Center concerning release of quantities of "hazardous substances" equal to or greater than the reportable quantities (RQs) listed in 40 CFR 302.4. As

Oil Base 100 Neutral (MSDS)

09/19/07

Page 9 of 11

defined by CERCLA, the term "hazardous substance" does not include petroleum, including crude oil or any fraction thereof which is not otherwise specifically designated in 40 CFR 302.4. Chemical Substances present in this product or refinery stream that may be subject to this statue are: None Identified.

CWA:

This material is classified as an oil under Section 311 of the Clean Water Act (CWA) and the Oil pollution Act of 1990 (OPA). Discharges or spills which produce a visible sheen on waters of the United States, their adjoining shorelines, or into conduits leading to surface waters must be reported to the EPA's National Response Center at 800-424-8802

California Proposition 65:

This material may contain the following components which are known to the State of California to cause cancer, birth defects or other reproductive harm, and may be subject to the requirements of California Proposition 65 (CA Health and Safety Code Section 25249.5): Toluene: 0.001%

New Jersey Right-to-Know Label: Petroleum Oil

Additional Regulatory Remarks: No additional regulatory remarks

SECTION 16 - Other Information

Refer to Page 1 for the HMIS and NFPA hazard Ratings for this product.

contaminated leather goods. If material is injected under the skin, seek medical attention immediately.

Ingestion:

Do not induce vomiting unless directed to by a physician. Do not give anything to drink unless directed to by a physician. Never give anything by mouth to a person who is no fully conscious. If significant amounts are swallowed or irritation or discomfort occurs, seek medical attention immediately.

Notes to Physician:

The viscosity range of the product represented by this MSDS is 100 to 400 SUS at 100F. Accordingly, upon ingestion there is low to moderate risk of aspiration. Careful gastric lavage may be considered to evacuate large quantities of material. Subcutaneous or intramuscular injection requires prompt surgical debridement.

SECTION 5 – Fire Fighting Measures

NFPA Flammability Classification: NFPA Class-IIIB combustible material. Slightly combustible.

Flash Point Method: Open Cup: 198C (388F) (Cleveland. (Minimum)).

Lower Flammable Limit: No Data

Upper Flammable Limit: No Data

Autoitgnition Temperature: Not Available

Hazardous Combustion Products:

Carbon dioxide, carbon monoxide, smoke, fumes, unburned hydrocarbons and trace oxides of sulfur and/or nitrogen.

Special Properties:

This material can burn but will not readily ignite. This material will release vapors when heated above the flash point temperature that can ignite when exposed to a source of ignition. In enclosed spaces, heated vapor can ignite with explosive force. Mists or sprays may burn at temperatures below the flash point.

Extinguishing Media:

Use dry chemical, foam, carbon dioxide or water fog.

Protection of Fire Fighters:

Firefighters must use full bunker gear including NIOSH-approved positive pressure self-contained breathing apparatus to protect against potential hazardous combustion or decomposition products and oxygen deficiencies.

SECTION 6 - Accidental Release Measures

Take proper precautions to ensure your own health and safety before attempting spill control or clean-up. For specific information, refer to the Emergency Overview on Page 1, Exposure Controls and Personal Protection in Section 8 and Disposal Considerations in Section 13 of this MSDS.

Do not touch damaged containers or spilled material unless wearing appropriate protective equipment. Slipping hazard; do not walk through spilled material. Stop leak if you can do so without risk. For small spills, absorb or cover with dry earth, sand, or other inert non-combustible absorbent material and place into waste containers for later disposal. Contain large spills to maximize product recovery or disposal. Prevent entry into waterways or sewers. In urban area, cleanup spill as soon as possible. In natural environments, seek cleanup advice from specialists to minimize physical habitat damage. This material will float on water. Absorbent pads and similar materials can be used. Comply with all laws and regulation.

SECTION 7 - Handling and Storage

Handling:

Avoid contamination and extreme temperatures to minimize product degradation. Empty containers may contain product residues that can ignite with explosive force. Do not pressurize, cut, weld, braze solder, drill, grind or expose containers to flames, sparks, heat or other potential ignition sources. Consult appropriate federal, state and local authorities before reusing, reconditioning, reclaiming recycling or disposing of empty containers and/or waste residues of this product.

Storage:

Keep container closed. Do not store with strong oxidizing agents. Do not store at elevated temperatures. Avoid storing product in direct sunlight for extended periods of time. Consult appropriate federal, state and local authorities before reusing, reconditioning, reclaiming, recycling or disposing of empty containers or waste residues of this product.

SECTION 8 - Exposure Controls / Personal Protection

Engineering Controls:

Provide exhaust ventilation or other engineering controls to keep the airborne concentrations of mistss and/or vapors below the recommended exposure limits (see below). An eye wash station and safety shower should be located near the work-station.

Personal Protective Equipment:

Personal protective equipment should be selected based upon the conditions under which this material is used. A hazard assessment of the work area for PPE requirements should be conducted by a qualified professional pursuant to OSHA regulations. The following pictograms represent the minimum requirements for personal protective equipment. For certain operations, additional PPE may be required.

Eye Protection:

Safety glasses equipped with side shields are recommended as minimum protection in industrial settings. Wear goggles and/or face shield if splashing or spraying is anticipated. Wear goggles and face shield if material is heated above 125F (51C). Have suitable eye wash water available.

Oil Base 100 Neutral (MSDS)

09/19/07

Page 5 of 11

Hand Protection:

Use gloves constructed of chemical resistant materials such as neoprene or heavy nitrile rubber if frequent or prolonged contact is expected. Use heat-protective gloves when handling product at elevated temperatures.

Body Protection:

Use clean and impervious protective clothing (e.g., neoprene or Tyvek) if splashing or spraying conditions are present. Protective clothing may include long-sleeve outer garment, apron, or lab coat. If significant contact occurs, remove oil-contaminated clothing as soon as possible and promptly shower. Launder contaminated clothing before reuse or discard. Wear heat protective boots and protective clothing when handling material at elevated temperatures.

Respiratory Protection:

Vaporization is not expected at ambient temperatures. Therefore, the need for respiratory protection is not anticipated under normal use conditions and with adequate ventilation. If elevated airborne concentrations above applicable workplace exposure levels are anticipated, a NIOSH-approved organic vapor respirator equipped with a dust/mists prefilter should be used. Protection factors vary depending upon the type of respirator used. Respirators should be used in accordance with OSHA requirements (29 CFR 1910.134).

General Comments:

Use good personal hygiene practices. Wash hands and other exposed skin areas with plenty of mild soap and water before eating, drinking, smoking, use of toilet facilities, or leaving work. DO NOT use gasoline, kerosene, solvents or harsh abrasives as skin cleaners. Since specific exposure standards/control limits have not been established for this product, the "Oil Mists, Mineral" exposure limits shown below are suggested as minimum control guidelines.

Occupational Exposure Guidelines:

Substance: Oil Mists, Mineral

Applicable Workplace Exposure Levels: ACGIH (United States)

TWA: 5 mg/m3 Stel: 10 mg/m3

OSHA (United States) TWA: 5 mg/m3

SECTION 9 – Physical and Chemical Properties

Physical State: Liquid

Color: Clear to Light Amber
Odor: Mild Petroleum Odor
Specific Gravity: 0.86 (Water =1)

pH: Not Applicable

Vapor Density: >1 (Air = 1)

Boiling Point / Range: Not Available **Melting / Freezing Point:** Not Available

Oil Base 100 Neutral (MSDS)

09/19/07

Page 6 of 11

Vapor Pressure: <0.01 kPa (<0.1 mmHg) (at 20C)

Viscosity: (cSt @ 40C) 20

Solubility in Water: Insoluble in Cold Water **Volatile Characteristics:** Negligible Volatility

Additional Properties: Gravity, API (ASTM D287) = 32.5 @ 60F

Density = 7.18 lbs/gal

Viscosity (ASTM D2161) = 104 SUS @ 100F

SECTION 10 - Stability and Reactivity

Chemical Stability: Stable

Hazardous Polymerization: Not expected to occur

Materials Incompatibility: Strong Oxidizers

Conditions to Avoid:

Keep away from extreme heat, sparks, open flame, and strongly oxidizing conditions.

Hazardous Decomposition Products:

No additional hazardous decomposition products were identified other than the combustion products identified in Section 5 of this MSDS.

SECTION 11 – Toxicological Information

For other health-related information, refer to the Emergency Overview on Page 1 and the Hazards Identification in Section 3 of this MSDS.

Toxicity Data: Distillates, Petroleum, Solvent-Refined Light Paraffiniuc:

Oral (LD50): Acute: >5000 mg/kg [Rat]
Dermal (LD50): Acute: >2000 mg/kg [Rabbit]

Distillates, Petroleum, Solvent-Refined Heavy Paraffinic:

Oral (LD50): Acute: >5000 mg/kg [Rat]
Dermal (LD50): Acute: >2000 mg/kg [Rabbit]

Distillates, Petroleum, Solvent-Refined Light Paraffiniuc:

Mineral oil mists derived from highly refined oils are reported to have low acute and sub-acute toxicities in animals. Effects from single and short-term repeated exposures to high concentrations of mineral oil mists well above applicable workplace exposure levels include lung inflammatory reaction, lipoid granuloma formation and lipoid pneumonia. In acute and sub-acute studies involving exposures to lower concentrations of mineral mists at or near current work place exposure levels produced no significant toxicological effects. In long-term studies (up to two years) no carcinogenic effects have been reported in any animal species tested.

Oil Base 100 Neutral (MSDS)

09/19/07

Distillates, Petroleum, Solvent-Refined Heavy Paraffinic:

Mineral oil mists derived from highly refined oils are reported to have low acute and sub-acute toxicities in animals. Effects from single and short-term repeated exposures to high concentrations of mineral oil in animals. Effects from single and short-term repeated exposure to high concentrations of mineral oil mists well above applicable workplace exposure levels include lung inflammatory reaction, lipoid, granuloma formation and lipoid pneumonia. In acute and sub-acute studies involving exposures to lower concentrations of mineral oil mists at or near current work place exposure levels produced no significant toxicological effects. In long-term studies (up to two years) no carcinogenic effects have been reported in any animal species attested. Analyses conducted by method IP 346 indicate that the polycyclic aromatic concentration of this mineral oil is below 3.0 weight percent.

SECTION 12 - Ecological Information

Ecotoxicity:

Analysis for ecological effects has not been conducted on this product. However, if spilled, this product and any contaminated soil or water may be harmful to human, animal, and aquatic life. Also, the coating action associated with petroleum and petroleum products can be harmful or fatal to aquatic life and waterfowl.

Environmental Fate:

An environmental fate analysis has not been conducted on this specific product. Plants and animals may experience harmful or fatal effects when coated with petroleum-based products. Petroleum-based (mineral) lube oils will normally float on water. In stagnant or slow-flowing waterways, an oil layer can cover a large surface area. As a result, this oil layer might limit or eliminate natural atmospheric oxygen transport into the water. With time, if not removed, oxygen depletion in the waterway may be sufficient to cause a fish kill or create an anaerobic environment.

SECTION 13 – Disposal Considerations

Hazard characteristic and regulatory waste stream classification can change with product use. Accordingly, it is the responsibility of the user to determine the proper storage, transportation, treatment and/or disposal methodologies for spent materials and residues at the time of disposition.

Conditions of use may cause this material to become a "hazardous waste", as defined by federal or state regulations. It is the responsibility of the user to determine if the material is a RCRA "hazardous waste" at the time of disposal. Transportation, treatment, storage and disposal of waste materials must be conducted in accordance with RCRA regulations (see 40 CFR 260 through 40 CFR 271). State and/or local regulations may be more restrictive. Contact the RCRA/Superfund Hotline at 800-424-9346 or your regional U.S. EPA office for guidance concerning case specific disposal issues.

SECTION 14 – Transport Information

The shipping description below may not represent requirements for all modes of transportation, shipping methods or locations outside of the United States.

Oil Base 100 Neutral (MSDS)

09/19/07

Page 8 of 11

U.S. DOT Status:

Not regulated by the U.S. Department of Transportation as a hazardous material

Proper Shipping Name: Not Regulated

Reportable Quantity:

A Reportable Quantity (RQ) has not been established for this material.

Placards:

Emergency Response Guide No: Not Applicable

HAZMAT STCC No: 2911990

MARPOL III Status: Not a DOT "Marine Pollutant" per 49 CFR 1718

The state of the s

SECTION 15 – Regulatory Information

TSCA Inventory:

This product and/or its components are listed on the Toxic Substance Control Act (TSCA) inventory.

SARA 302 / 304:

The Superfund Amendments and Reauthorization Act of 1986 (SARA) Title III requires facilities subject to Subparts 302 and 304 to submit emergency planning and notification information based on Threshold Planning Quantities (TPQs) and Reportable Quantities (RQs) for "Extremely Hazardous Substances" listed in 40 CFR 302.4 and 40 CFR 355. No components were identified.

SARA 311/312:

The Superfund Amendments and Reauthorization Act of 1986 (SARA) Title III requires facilities subject to this subpart to submit aggregate information on chemicals by "Hazard Category" as defined in 40 CFR 370.2. This material would be classified under the following hazard categories: No SARA 311 / 312 hazard categories identified.

SARA 313:

This product contains the following components in concentrations above de minimis levels that are listed as toxic chemicals in 40 CFR Part 372 pursuant to the requirements of Section 313 of SARA: No Components were identified.

CERCLA:

The Comprehensive Environmental Response, Compensation, and Liability Act of 1980 (CERCLA) requires notification of the National Response Center concerning release of quantities of "hazardous substances" equal to or greater than the reportable quantities (RQs) listed in 40 CFR 302.4. As

Oil Base 100 Neutral (MSDS)

09/19/07

Page 9 of 11

defined by CERCLA, the term "hazardous substance" does not include petroleum, including crude oil or any fraction thereof which is not otherwise specifically designated in 40 CFR 302.4. Chemical Substances present in this product or refinery stream that may be subject to this statue are: None Identified.

CWA:

This material is classified as an oil under Section 311 of the Clean Water Act (CWA) and the Oil pollution Act of 1990 (OPA). Discharges or spills which produce a visible sheen on waters of the United States, their adjoining shorelines, or into conduits leading to surface waters must be reported to the EPA's National Response Center at 800-424-8802

California Proposition 65:

This material may contain the following components which are known to the State of California to cause cancer, birth defects or other reproductive harm, and may be subject to the requirements of California Proposition 65 (CA Health and Safety Code Section 25249.5): Toluene: 0.001%

New Jersey Right-to-Know Label: Petroleum Oil

Additional Regulatory Remarks: No additional regulatory remarks

SECTION 16 – Other Information

Refer to Page 1 for the HMIS and NFPA hazard Ratings for this product.

Original - Shipper Provided Short Form Straight Bill of Lading - Not Negotiable - Domestic

SHIPPED FROM:	TRAILER #234
CES Environmental Services, Inc. (TSDF)	11a) HOU-2432
4904 Griggs Road	11b)
Houston, TX 77021	11c)
(713) 676-1460	11c)

The property described below, in apparent good order, except as noted (content and condition of packages unknown), marked, consigned, and destined as indicated below, which said carrier (the word carrier being understood throughout this as meaning any person or corporation authorized to be in possession of the property under the contract) agrees to carry to its unusual place of delivery at said destination, if on its route, otherwise to deliver to another carrier on the route to said destination. This Bill of Lading is a receipt for goods; it is not of itself a contract of carriage. It is mutually agreed, as to each carrier of all or as to any said over all or any portion of said route to destination, and as to each par any time interested in all or any of said property, that every service to be performed hereunder shall be subject to all the terms and conditions contained in the applicable contract between shipper and carrier or intermediary.

For payment: Charges to be billed to Shipper or the "Billed to" party are set forth in the governing contract with Shipper. No charges other than those contained therein may be bit to Shipper or the "Billed to" party without prior written consent of Shipper. The extra copy of this Bill of Lading, furnished at the time of shipment, must be attached to the freight be submitted to Shipper or the "Billed to" party and sent to:

1. Product Identification

Synonyms:

Wood alcohol; methanol; carbinol

CAS No: Molecular Weight: 67-56-1 32.04

Chemical Formula:

CH3OH

2. Composition/Information on Ingredients

INGREDIENT	CAS NO.	PERCENT	<u>HAZARDOUS</u>
Methanol	67-56-1	80-85	Yes
Methylene Chloride	75-09-2	0.5-2.0	Yes
Water	7732-18-5	15-20	No

3. Hazards Identification

Emergency Overview:

POISON! DANGER! VAPOR HARMFUL. MAY BE FATAL OR CAUSE BLINDNESS IF SWALLOWED. HARMFUL IF INHALED OR ABSORBED THROUGH SKIN. CANNOT BE MADE NONPOISONOUS. FLAMMABLE LIQUID AND VAPOR. CAUSES IRRITATION TO SKIN, EYES, AND RESPIRATORY TRACT. AFFECTS CENTRAL NERVOUS SYSTEM AND LIVER

SAF-T-DATA (tm) Ratings (Provided here for your convenience)

Severe (Poison) Health Rating: 3 Flammability Rating: 3 Severe (Flammable)

Reactivity Rating: Contact Rating:

1 Slight

3 Severe (Life)

Lab Protective Equipment:

Goggles & Shield; Lab Coat & Apron; Vent Hood; Proper

Gloves; Class B Extinguisher

Storage Color Code:

Red (Flammable)

Disk23:62907

POTENTIAL HEALTH EFFECTS:

Inhalation:

A slight irritant to the mucous membranes. Toxic effects exerted upon nervous system, particularly the optic nerve. Once absorbed into the body, it is very slowly eliminated. Symptoms of overexposure may include headache, drowsiness, nausea, vomiting, blurred vision, blindness, coma, and death. A person may get better but then worse again up to 30 hours later.

Ingestion:

Toxic. Symptoms parallel inhalation. Can intoxicate and cause blindness. Usual fatal dose: 100-125 milliliters.

Skin Contact:

Methyl alcohol is de-fatting agent and may cause skin to become dry and cracked. Skin absorption can occur; symptoms may parallel inhalation exposure.

Eye Contact:

Irritant. Continued exposure may cause eye lesions.

Chronic Exposure:

Marked impairment of vision has been reported. Repeated or prolonged exposure may cause skin irritation..

Aggravation of Pre-existing Conditions:

Persons with pre-existing skin disorders, eye problems, impaired liver, kidney function may be more susceptible to the effects of the substance.

4. First Aid Measures

Inhalation:

Remove to fresh air. If not breathing, give artificial respiration. If breathing is difficult, give oxygen. Get medical attention.

Ingestion:

Induce vomiting immediately as directed by medical personnel. Never give anything by mouth to an unconscious person. Get medical attention immediately.

Skin Contact:

Immediately flush skin with plenty of water for at least 15 minutes while removing contaminated clothing and shoes. Get medical attention. Wash clothing before reuse. Thoroughly clean shoes before reuse.

Eye Contact:

Immediately flush eyes with plenty of water for at least 15 minutes, lifting lower and upper eyelids occasionally. Get medical attention immediately.

5. Fire Fighting Measures

FLAMMABLE PROPERTIES

Flash point:

12C (54F) CC

Autoignition temperature:

464C (867F)

Upper Flame Limit (volume % in air):

36%

Lower Flame Limit (volume % in air):

6%

OSHA Flammability Class:

ΙB

Fire Extinguishing Media:

Carbon dioxide, dry chemical or foam

Unusual fire and explosion hazards: Can burn with an invisible flame. Mixtures with high water content are still flammable.

Special fire fighting precaution/instructions: Wear full protective clothing and self contained breathing apparatus. Containers in fire conditions will pressurize and may rupture. Do not allow run off from fire fighting effort to enter sewer or waterway.

6. Accidental Release Measures

Ventilate area of leak or spill. (Always wear recommended personal protective equipment) Eliminate sources of ignition. Isolate the spill area. Stop leak in a safe and practical manner. (If leak cannot be stopped easily and safely, advise trained emergency response personnel of the situation). Using inert material (such as ground corncobs) dike the spilled solvent to prevent it from running into drains or waterways.

7. Handling and Storages

NORMAL HANDLING: (Always wear recommended personal protective equipment).

Flammable liquids and vapors: Keep containers closed. Do not breathe vapors. Avoid contact with skin, eyes and mucous membranes. Keep away from heat, sparks, and flame. Electrically ground all handling equipment.

STORAGE RECOMMENDATIONS: Store in an area designed for storage of flammable liquids. (OSHA 29 CFR 1910.106)

Protect from temperature extremes and sunlight, and store away from incompatible substances and in accordance with 29 CFR 1910.106.

Flammable liquid and vapor. Once liquid solvent has been completely dispensed, containers which appear "empty" should be handled in the same manner as when they were "full" of liquid solvent.

8. Exposure Controls/Personal Protection

ENGINEERING CONTROLS:

Provide general or local exhaust ventilation systems to maintain airborne concentrations below OSHA PELs. Local exhaust ventilation is preferred because it prevents contaminant dispersion into the work area by controlling it at its source.

PERSONAL PROTECTIVE EQUIPMENT:

Skin Protection:

Wear chemically protective gloves, boots and aprons to prevent prolonged or repeated skin contact.

Eye Protection:

Wear protective eyeglasses or chemical safety goggles, per OSHA eye and face protection regulations (29 CFR 1910.133). Contact lenses are not eye protective devices. Full face shield recommended for conditions where liquid contact is possible. Contact lens should not be work when working with this chemical.

Respiratory Protection:

Seek professional advice prior to respirator selection and use. Follow OSHA respirator regulations (29 CFR 1910.134) and, if necessary, wear a MSHA/NIOSH approved respirator. For emergency or non-routine operations (cleaning spill, reactor vessels or storage tanks), wear an SCBA. Warning! Airpurifying respirators do not protect workers in oxygen deficient atmospheres.

ADDITIONAL RECOMMENDATIONS:

Make emergency eyewash stations and washing facilities available in work area. Separate contaminated work clothes from street clothes. Launder before reuse. Remove this material from your shoes and clean personal protective equipment. Never eat, drink, or smoke in work areas. Practice good personal hygiene after use.

Spills and releases may have to be reported to Federal and/or local authorities. See section 15 regrding reporting requirements.

EXPOSURE GUIDELINES

INGREDIENT NAME Methanol ACGIH TLV 200 ppm (skin) OSHA PEL 200 ppm (skin) OTHER LIMIT None

9. Physical and Chemical Properties

Appearance: Clear, colorless liquid

Odor: Characteristic odor

Solubility: Miscible in water

Specific Gravity: 0.8 pH: No information found

% Volatiles by volume @ 21C (70F): 100

Boiling Point: 64.5C (147F)

Melting Point: -98C (-144F)

Vapor Density (Air = 1): 1.1

Vapor Pressure (mm Hg): 97 @ 20C (68F)

Evaporation Rate (BuAc = 1): 5.9

Disk23:62907

10. Stability and Reactivity

Stability:

Stable under ordinary conditions of use and storage

Hazardous Decomposition Products:

May form carbon dioxide, carbon monoxide, and formaldehyde when heated to decomposition

Hazardous Polymerization:

Will not occur

Incompatibilities:

Strong oxidizing agents such as nitrates, perchlorates or sulfuric acid. Will attack some forms of plastics, rubber, and coatings. May react with metallic aluminum and generate hydrogen gas.

Conditions to Avoid:

Heat, flames, ignition sources and incompatibles.

11. Toxicological Information

Toxicological Data:

Methyl alcohol (Methanol) Oral rat LD50: 5628 mg/kg; inhalation rat LC50: 64000 ppm/4H; skin rabbit LD50: 15800 mg/kg; Irritation data-standard Draize test: skin, rabbit: 20mg/24 hr. Moderate; eye, rabbit: 100 mg/24 hr. Moderate. Investigated as a mutagen, reproductive effector.

Reproductive Toxicity:

Dichloromethane has been linked to spontaneous abortions in humans.

Cancer Lists:

INGREDIENT	Known	NTP Carcinogen Anticipated	IARC Category
Methyl alcohol (67-56-1)	No	No	None

12. Ecological Information

Environmental Fate:

When released into the soil, this material is expected to readily biodegradable. When released into the soil, this material is expected to leach into groundwater. When released into the soil, this material is expected to quickly evaporate. When released into the water, this material is expected to have a half-life between 1 and 10 days. When released into water, this material is expected to readily biodegrade. When released into the air, this material is expected to exist in the aerosol phase with a short half-life. When released into the air, this material is expected to be readily degraded by reaction with photochemically produced hydroxyl radicals. When released into the air, this material is expected to have a half-life between 10 and 30 days. When released into the air, this material is expected to be readily removed from the atmosphere by wet deposition.

Disk23:62907 5

Environmental Toxicity:

This material is expected to be slightly toxic to aquatic life.

13. Disposal Considerations

Whatever cannot be saved for recovery or recycling should be handled as hazardous waste and sent to a RCRA approved incinerator or disposed in a RCRA approved waste facility. Processing, use or contamination of this product may change the waste management options. State and Local disposal regulations may differ from Federal disposal regulations. Dispose of container and unused contents in accordance with Federal, State, and Local requirements.

SECTION IV FIRE and EXPLOSION HAZARD DATA

EXTINGUISHING MEDIA: CARBON DIOXIDE, DRY CHEMICAL, REGULAR FOAM

WATER SPRAY.

SPECIAL FIRE FIGHTING PROCEDURES: USE SELF-CONTAINED BREATHING APPARATUS. UNSUAL FIRE and EXPLOSION HAZARDS: HEATING OF NON-VENTED CONTAINER MAY CAUSE EXPLOSION. KEEP SURROUNDING CONTAINERS;

COOL WITH WATER SPRAY.

SECTION V REACTIVITY DATA

STABILITY:

MATERIALS TO AVOID: CONDITIONS TO AVOID:

HAZARDOUS DECOMPOSITION PRODUCTS:

STABLE **OXIDIZING AGENTS**

CONTACT WITH OPEN FLAME

CARBON MONOXIDE and ASPHYXLANTS MAY BE

FORMED DURING COMBUSTION

HAZARDOUS POLYMERIZATION:

WILL NOT OCCUR

SECTION VI

HEALTH HAZARD DATA

SIGNS and SYMPTOMS OF EXPOSURE:

FYFS:

IRRITATION, REDNESS

DERMAL INHALATION: DRYNESS, IRRITATION and REDNESS VAPORS MAY IRRITATE NOSE, THROAT and

RESPIRATORY TRACT

INGESTION:

NAUSEA, VOMITING, DIZZINESS, HEADACHE

and VISION

EMERGENCY and FIRST AID PROCEDURES:

FYFS:

FLUSH WITH LARGE AMOUNTS OF WATER FOR 15 MINUTES. GET MEDICAL ATTENTION.

DERMAL:

INHALATION:

WASH WITH SOAP and WATER UNTIL NO ODOR REMAINS. IF REDNESS OR SWELLING DEVELOPS,

GET MEDICAL ATTENTION. IMMEDIATELY REMOVE SOAKED CLOTHING, and WASH BEFORE REUSE

REMOVE VICTIM TO FRESH AIR. IF NOT BREATHING, GIVE ARTIFICIAL RESPIRATION PROVIDED A

QUALIFIEDINDIVIDUAL IS AVAILABLE. GET MEDICAL

ATTENTION PROMPTLY.

INGESTION: DO NOT INDUCE VOMITING. DO NOT GIVE LIQUIDS.

> OBTAIN EMERGENCY MEDICAL ATTENTION. SMALL AMOUNTS, WHICH ACCIDENTALLY ENTER MOUTH SHOULD BE RINSED OUT UNTIL TASTE IS GONE. MILD IRRITATION TO THE EYES and SKIN. NONE EXPECTED AT THE INDUSTRIAL LEVEL.

ACUTE HEALTH HAZARDS: CHRONIC HEALTH HAZARDS:

SECTION VII

SPILL OR LEAK PROCEDURES

STEPS TO BE TAKEN IN CASE MATERIAL IS RELEASED OR SPILLED:

DIKE OR CONTAIN THE SPILL AREA. REMOVE ALL SOURCES OF IGNITION, VENTILATE AREA IF NECESSARY. ABSORB FREE LIQUID WITH EARTH, SAND, CLAY, OR ABSORBENT PADS AND PLACE IN NON-LEAK CONTAINERS FOR DISPOSAL. FLUSH THE AREA FOR TRACE RESIDUE AND DISPOSE OF AS BELOW.

WASTE DISPOSAL METHOD:

IN ACCORDANCE WITH LOCAL, STATE and FEDERAL LAWS.

SECTION VIII

SPECIAL PROTECITON INFORMATION

RESPIRATORY PROTECITON:

NORMALLY NOT NEEDED IN A WELL-VENTED

AREA

VENTILATION: PROTECTIVE GLOVES: MECHANICAL TO MAINTAIN GOOD AIR FLOW

RUBBER

EYE PROTECTION:

GOGGLES OR SAFETY GLASSES

OTHER:

AS NEEDED TO MINIMIZE EXPOSURE

HYGIENIC PRACTICE:

ALWAYS WASH FACE and HANDS AFTER CONTACT

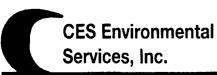

SECTION IX

NOTES

The information contained herein is based on data considered accurate. However, no warranty is expressed or implied regarding the accuracy of this data or results to be obtained from the user thereof. Vendor assumes no responsibility for injury to vendee or third person proximately caused by the material if reasonable safety procedures are not adhered to as stipulated in the data sheet. Additionally, vendor assumes no responsibility or injury to vendee or third persons proximately caused by abnormal use of the material even if reasonable safety procedures are followed. Furthermore, vendee assumes the risk in the use of this material.

QUICK IDENTIFIER

Common Name: CES Low Flash Recovered Black Oil

Irritation: Not expected to be a problem unless oil mists are generated.	
ROUTES 2. Eyes: Mild irritant. Use splash protection goggles. OF	
ENTRY 3. Sun: Mild irritant. Use gloves and protection.	
4. Ingestion: Low toxicity. Do not take internally.	
SECTION 7 – SPECIAL PRECAUTIONS AND SPILL/LEAK PROCEDURES	
Precautions to be Taken at Handling and Storage: Use skin protection, gloves, and eye protection.	
Other Precautions: Do not use welding or cutting torch on or near container or storage	e vessel.
Steps to be taken in case material is released or spilled: Contain spill using oil absorbents (granular, pads, booms). Removement Waste Disposal Methods	ve flame sources.
(consult Federal, State, and Local Regulations): Follow Federal and State disposal regulations.	
SECTION 8 – SPECIAL PROTECTION INFORMATION/CONTROL MEASURES Respiratory Protection	
(specify type): Not required under normal conditions of use. If oil mists are generated above	5 mg/m ³ , then a
NIOSH/MSHA approved respirator is advised in the absence of proper environal Ventilation: Not required Mechanical	nmental controls.
under normal Local N/A Special conditions of use. Exhaust (general) Below TLV's N/A	Other N/A
Protective Eye Gloves: Neoprene or rubber Protection: Safety glasse	es or goggles
Other Protective Clothing or Equipment: Impervious clothing and boots	
Work/Hygienic Practices: Do not take internally; avoid skin contact; wash hands thoroughly; and do	not get in eyes.

 (713) 676-1460
 11c)

The property described below, in apparent good order, except as noted (content and condition of packages unknown), marked, consigned, and destined as indicated below, whic said carrier (the word carrier being understood throughout this as meaning any person or corporation authorized to be in possession of the property under the contract) agrees to carry to its unusual place of delivery at said destination, if on its route, otherwise to deliver to another carrier on the route to said destination. This Bill of Lading is a receipt for goods; it is not of itself a contract of carriage. It is mutually agreed, as to each carrier of all or as to any said over all or any portion of said route to destination, and as to each par any time interested in all or any of said property, that every service to be performed hereunder shall be subject to all the terms and conditions contained in the applicable contract between shipper and carrier or intermediary.

For payment: Charges to be billed to Shipper or the "Billed to" party are set forth in the governing contract with Shipper. No charges other than those contained therein may be bi to Shipper or the "Billed to" party without prior written consent of Shipper. The extra copy of this Bill of Lading, furnished at the time of shipment, must be attached to the freight b submitted to Shipper or the "Billed to" party and sent to:

WILL NOT OCCUR

SECTION VI

HEALTH HAZARD DATA

SIGNS and SYMPTOMS OF EXPOSURE:

IRRITATION, REDNESS

DERMAL INHALATION: DRYNESS, IRRITATION and REDNESS VAPORS MAY IRRITATE NOSE, THROAT and

RESPIRATORY TRACT

INGESTION:

NAUSEA, VOMITING, DIZZINESS, HEADACHE

and VISION

EMERGENCY and FIRST AID PROCEDURES:

EYES:

FLUSH WITH LARGE AMOUNTS OF WATER FOR 15 MINUTES. GET MEDICAL ATTENTION.

DERMAL:

WASH WITH SOAP and WATER UNTIL NO ODOR REMAINS. IF REDNESS OR SWELLING DEVELOPS,

GET MEDICAL ATTENTION. IMMEDIATELY REMOVE SOAKED CLOTHING, and WASH BEFORE REUSE. REMOVE VICTIM TO FRESH AIR. IF NOT BREATHING,

GIVE ARTIFICIAL RESPIRATION PROVIDED A QUALIFIEDINDIVIDUAL IS AVAILABLE. GET MEDICAL

ATTENTION PROMPTLY.

INGESTION:

INHALATION:

DO NOT INDUCE VOMITING. DO NOT GIVE LIQUIDS. OBTAIN EMERGENCY MEDICAL ATTENTION. SMALL

AMOUNTS, WHICH ACCIDENTALLY ENTER MOUTH SHOULD BE RINSED OUT UNTIL TASTE IS GONE. MILD IRRITATION TO THE EYES and SKIN.

ACUTE HEALTH HAZARDS CHRONIC HEALTH HAZARDS: NONE EXPECTED AT THE INDUSTRIAL LEVEL.

SECTION VII

SPILL OR LEAK PROCEDURES

STEPS TO BE TAKEN IN CASE MATERIAL IS RELEASED OR SPILLED:

DIKE OR CONTAIN THE SPILL AREA. REMOVE ALL SOURCES OF IGNITION. VENTILATE AREA IF NECESSARY. ABSORB FREE LIQUID WITH EARTH, SAND, CLAY, OR ABSORBENT PADS AND PLACE IN NON-LEAK CONTAINERS FOR DISPOSAL. FLUSH THE AREA FOR TRACE RESIDUE AND DISPOSE OF AS BELOW.

WASTE DISPOSAL METHOD:

IN ACCORDANCE WITH LOCAL, STATE and FEDERAL LAWS.

SECTION VIII

SPECIAL PROTECITON INFORMATION

RESPIRATORY PROTECITON:

NORMALLY NOT NEEDED IN A WELL-VENTED

VENTILATION:

AREA MECHANICAL TO MAINTAIN GOOD AIR FLOW

RUBBER

PROTECTIVE GLOVES: EYE PROTECTION:

GOGGLES OR SAFETY GLASSES

OTHER:

AS NEEDED TO MINIMIZE EXPOSURE

HYGIENIC PRACTICE:

ALWAYS WASH FACE and HANDS AFTER CONTACT

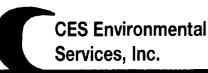

SECTION IX

NOTES

The information contained herein is based on data considered accurate. However, no warranty is expressed or implied regarding the accuracy of this data or results to be obtained from the user thereof. Vendor assumes no responsibility for injury to vendee or third person proximately caused by the material if reasonable safety procedures are not adhered to as stipulated in the data sheet. Additionally, vendor assumes no responsibility or injury to vendee or third persons proximately caused by abnormal use of the material even if reasonable safety procedures are followed. Furthermore, vendee assumes the risk in the use of this material.

Material Safety Data Sheet

IMPORTANT

Read this MSDS before handling or disposing of this product and pass this information on to employees, customers and users of this product.

Emergency Overview:

Physical State:

Liquid.

Color:

Clear to Light Amber

Odor:

Mild Petroleum Odor

Protect eyes from mistsing or spraying material. Protect exposed skin from repeated or prolonged exposure. Do not store material in open or unmarked containers. Spills may create a slipping hazard.

SECTION 3 - Hazards Identification

Also see Emergency Overview and Hazard Rating on Page 1 of this MSDS.

Major Route(s) of Entry: Skin Contact.

Signs and Symptoms of Acute Exposure:

Inhalation:

No significant adverse health effects are expected to occur upon short-term exposure.

Eye Contact:

This product can cause transient mild eye irritation with short-term contact with liquid sprays or mists.

Skin Contact:

This material can cause mild skin irritation from prolonged or repeated skin contact. Injection under the skin can cause inflammation and swelling. Injection of pressurized hydrocarbons can cause Initial symptoms may be minor. Injection of petroleum severe, permanent tissue damage. hydrocarbons requires immediate medical attention.

Ingestion:

If swallowed, large volumes of material can cause generalized depression, headache, drowsiness, nausea, vomiting and diarrhea. Smaller doses can cause a laxative effect. If aspirated into the lungs, liquid can cause lung damage.

Oil Base 100 Neutral (MSDS)

09/19/07

Page 2 of 11

Chronic Health Effects:

Contains a petroleum-based mineral oil. Prolonged or repeated skin contact can cause mild irritation and inflammation characterized by drying, cracking (dermatitis), or oily acne. Repeated or prolonged inhalation of petroleum-based mineral oil mists at concentrations above applicable workplace exposure levels can cause respiratory irritation or other pulmonary effects.

Conditions Aggravated by Exposure:

Medical conditions aggravated by exposure to this material may include pre-existing skin disorders.

Target Organs:

This material may cause damage to the following organs: Skin

Carcinogenic Potential:

This product does not contain any components at concentrations above 0.1%, which are considered carcinogenic by OSHA, IARC or NTP.

OSHA Hazard Classification is indicated by an "X" in the box adjacent to the hazard title. If no "X" is present, the product does not exhibit the hazard as defined in the OSHA Hazard Communication Standard (29 CFR 1910.1200).

	Hazar Toxic	d Classification () Sensitizer	()	Highly Toxic ()	Corro	osive ()	Carc	inogenic	()
Combustible	()	ard Classificatior Explosive Compressed Gas	() F	Pyrophoric Organic Peroxide	()	Flammable Unstable	` '	Oxidizer	()

SECTION 4 - First Aid Measures

Take proper precautions to ensure your own health and safety before attempting rescure or providing first aid. For specific information, refer to Exposure Controls and Personal Protection in Section 8 of this MSDS.

Inhalation:

Vaporization is not expected at ambient temperatures. This material is not expected to cause inhalation-related disorders under anticipated conditions of use. In case of overexposure, move the person to fresh air.

Eye Contact:

Check for and remove contact lenses. Flush eyes with cool, clean, low-pressure water by lifting and lowering eyelids. Seek medical attention if excessive tearing, redness, or pain persist.

Skin Contact:

If burned by hot material, cool skin by quenching with large amounts of cool water. For contact with product at ambient temperatures, remove contaminated shoes and clothing. Wipe off excess material. Wash exposed skin with mild soap and water. Seek medical attention if tissue appears damaged or if pain or irritation persist. Thoroughly clean contaminated clothing before reuse. Discard

Oil Base 100 Neutral (MSDS)

09/19/07

Page 3 of 11

contaminated leather goods. If material is injected under the skin, seek medical attention immediately.

Ingestion:

Do not induce vomiting unless directed to by a physician. Do not give anything to drink unless directed to by a physician. Never give anything by mouth to a person who is no fully conscious. If significant amounts are swallowed or irritation or discomfort occurs, seek medical attention immediately.

Notes to Physician:

The viscosity range of the product represented by this MSDS is 100 to 400 SUS at 100F. Accordingly, upon ingestion there is low to moderate risk of aspiration. Careful gastric lavage may be considered to evacuate large quantities of material. Subcutaneous or intramuscular injection requires prompt surgical debridement.

SECTION 5 – Fire Fighting Measures

NFPA Flammability Classification: NFPA Class-IIIB combustible material. Slightly combustible.

Flash Point Method: Open Cup: 198C (388F) (Cleveland. (Minimum)).

Lower Flammable Limit: No Data

Upper Flammable Limit: No Data

Autoitgnition Temperature: Not Available

Hazardous Combustion Products:

Carbon dioxide, carbon monoxide, smoke, fumes, unburned hydrocarbons and trace oxides of sulfur and/or nitrogen.

Special Properties:

This material can burn but will not readily ignite. This material will release vapors when heated above the flash point temperature that can ignite when exposed to a source of ignition. In enclosed spaces, heated vapor can ignite with explosive force. Mists or sprays may burn at temperatures below the flash point.

Extinguishing Media:

Use dry chemical, foam, carbon dioxide or water fog.

Protection of Fire Fighters:

Firefighters must use full bunker gear including NIOSH-approved positive pressure self-contained breathing apparatus to protect against potential hazardous combustion or decomposition products and oxygen deficiencies.

SECTION 6 - Accidental Release Measures

Take proper precautions to ensure your own health and safety before attempting spill control or clean-up. For specific information, refer to the Emergency Overview on Page 1, Exposure Controls and Personal Protection in Section 8 and Disposal Considerations in Section 13 of this MSDS.

Do not touch damaged containers or spilled material unless wearing appropriate protective equipment. Slipping hazard; do not walk through spilled material. Stop leak if you can do so without risk. For small spills, absorb or cover with dry earth, sand, or other inert non-combustible absorbent material and place into waste containers for later disposal. Contain large spills to maximize product recovery or disposal. Prevent entry into waterways or sewers. In urban area, cleanup spill as soon as possible. In natural environments, seek cleanup advice from specialists to minimize physical habitat damage. This material will float on water. Absorbent pads and similar materials can be used. Comply with all laws and regulation.

SECTION 7 – Handling and Storage

Handling:

Avoid contamination and extreme temperatures to minimize product degradation. Empty containers may contain product residues that can ignite with explosive force. Do not pressurize, cut, weld, braze solder, drill, grind or expose containers to flames, sparks, heat or other potential ignition sources. Consult appropriate federal, state and local authorities before reusing, reconditioning, reclaiming recycling or disposing of empty containers and/or waste residues of this product.

Storage:

Keep container closed. Do not store with strong oxidizing agents. Do not store at elevated temperatures. Avoid storing product in direct sunlight for extended periods of time. Consult appropriate federal, state and local authorities before reusing, reconditioning, reclaiming, recycling or disposing of empty containers or waste residues of this product.

SECTION 8 - Exposure Controls / Personal Protection

Engineering Controls:

Provide exhaust ventilation or other engineering controls to keep the airborne concentrations of mistss and/or vapors below the recommended exposure limits (see below). An eye wash station and safety shower should be located near the work-station.

Personal Protective Equipment:

Personal protective equipment should be selected based upon the conditions under which this material is used. A hazard assessment of the work area for PPE requirements should be conducted by a qualified professional pursuant to OSHA regulations. The following pictograms represent the minimum requirements for personal protective equipment. For certain operations, additional PPE may be required.

Eye Protection:

Safety glasses equipped with side shields are recommended as minimum protection in industrial settings. Wear goggles and/or face shield if splashing or spraying is anticipated. Wear goggles and face shield if material is heated above 125F (51C). Have suitable eye wash water available.

Oil Base 100 Neutral (MSDS)

09/19/07

Page 5 of 11

Hand Protection:

Use gloves constructed of chemical resistant materials such as neoprene or heavy nitrile rubber if frequent or prolonged contact is expected. Use heat-protective gloves when handling product at elevated temperatures.

Body Protection:

Use clean and impervious protective clothing (e.g., neoprene or Tyvek) if splashing or spraying conditions are present. Protective clothing may include long-sleeve outer garment, apron, or lab coat. If significant contact occurs, remove oil-contaminated clothing as soon as possible and promptly shower. Launder contaminated clothing before reuse or discard. Wear heat protective boots and protective clothing when handling material at elevated temperatures.

Respiratory Protection:

Vaporization is not expected at ambient temperatures. Therefore, the need for respiratory protection is not anticipated under normal use conditions and with adequate ventilation. If elevated airborne concentrations above applicable workplace exposure levels are anticipated, a NIOSH-approved organic vapor respirator equipped with a dust/mists prefilter should be used. Protection factors vary depending upon the type of respirator used. Respirators should be used in accordance with OSHA requirements (29 CFR 1910.134).

General Comments:

Use good personal hygiene practices. Wash hands and other exposed skin areas with plenty of mild soap and water before eating, drinking, smoking, use of toilet facilities, or leaving work. DO NOT use gasoline, kerosene, solvents or harsh abrasives as skin cleaners. Since specific exposure standards/control limits have not been established for this product, the "Oil Mists, Mineral" exposure limits shown below are suggested as minimum control guidelines.

Occupational Exposure Guidelines:

Substance: Oil Mists, Mineral

Applicable Workplace Exposure Levels: ACGIH (United States)

TWA: 5 mg/m3 Stel: 10 mg/m3

OSHA (United States) TWA: 5 mg/m3

SECTION 9 - Physical and Chemical Properties

Physical State: Liquid

Color: Clear to Light Amber
Odor: Mild Petroleum Odor

Specific Gravity: 0.86 (Water =1)

Vapor Pressure: <0.01 kPa (<0.1 mmHg) (at 20C)

Viscosity: (cSt @ 40C) 20

Solubility in Water: Insoluble in Cold Water **Volatile Characteristics:** Negligible Volatility

Additional Properties: Gravity, API (ASTM D287) = 32.5 @ 60F

Density = 7.18 lbs/gal

Viscosity (ASTM D2161) = 104 SUS @ 100F

SECTION 10 - Stability and Reactivity

Chemical Stability: Stable

Hazardous Polymerization: Not expected to occur

Materials Incompatibility: Strong Oxidizers

Conditions to Avoid:

Keep away from extreme heat, sparks, open flame, and strongly oxidizing conditions.

Hazardous Decomposition Products:

No additional hazardous decomposition products were identified other than the combustion products identified in Section 5 of this MSDS.

SECTION 11 – Toxicological Information

For other health-related information, refer to the Emergency Overview on Page 1 and the Hazards Identification in Section 3 of this MSDS.

Toxicity Data: Distillates, Petroleum, Solvent-Refined Light Paraffiniuc:

Oral (LD50): Acute: >5000 mg/kg [Rat]
Dermal (LD50): Acute: >2000 mg/kg [Rabbit]

Distillates, Petroleum, Solvent-Refined Heavy Paraffinic:

Oral (LD50): Acute: >5000 mg/kg [Rat]
Dermal (LD50): Acute: >2000 mg/kg [Rabbit]

Distillates, Petroleum, Solvent-Refined Light Paraffiniuc:

Mineral oil mists derived from highly refined oils are reported to have low acute and sub-acute toxicities in animals. Effects from single and short-term repeated exposures to high concentrations of mineral oil mists well above applicable workplace exposure levels include lung inflammatory reaction, lipoid granuloma formation and lipoid pneumonia. In acute and sub-acute studies involving exposures to lower concentrations of mineral mists at or near current work place exposure levels produced no significant toxicological effects. In long-term studies (up to two years) no carcinogenic effects have been reported in any animal species tested.

Oil Base 100 Neutral (MSDS)

09/19/07

Page 7 of 11

Distillates, Petroleum, Solvent-Refined Heavy Paraffinic:

Mineral oil mists derived from highly refined oils are reported to have low acute and sub-acute toxicities in animals. Effects from single and short-term repeated exposures to high concentrations of mineral oil in animals. Effects from single and short-term repeated exposure to high concentrations of mineral oil mists well above applicable workplace exposure levels include lung inflammatory reaction, lipoid, granuloma formation and lipoid pneumonia. In acute and sub-acute studies involving exposures to lower concentrations of mineral oil mists at or near current work place exposure levels produced no significant toxicological effects. In long-term studies (up to two years) no carcinogenic effects have been reported in any animal species attested. Analyses conducted by method IP 346 indicate that the polycyclic aromatic concentration of this mineral oil is below 3.0 weight percent.

SECTION 12 - Ecological Information

Ecotoxicity:

Analysis for ecological effects has not been conducted on this product. However, if spilled, this product and any contaminated soil or water may be harmful to human, animal, and aquatic life. Also, the coating action associated with petroleum and petroleum products can be harmful or fatal to aquatic life and waterfowl.

Environmental Fate:

An environmental fate analysis has not been conducted on this specific product. Plants and animals may experience harmful or fatal effects when coated with petroleum-based products. Petroleum-based (mineral) lube oils will normally float on water. In stagnant or slow-flowing waterways, an oil layer can cover a large surface area. As a result, this oil layer might limit or eliminate natural atmospheric oxygen transport into the water. With time, if not removed, oxygen depletion in the waterway may be sufficient to cause a fish kill or create an anaerobic environment.

SECTION 13 – Disposal Considerations

Hazard characteristic and regulatory waste stream classification can change with product use. Accordingly, it is the responsibility of the user to determine the proper storage, transportation, treatment and/or disposal methodologies for spent materials and residues at the time of disposition.

Conditions of use may cause this material to become a "hazardous waste", as defined by federal or state regulations. It is the responsibility of the user to determine if the material is a RCRA "hazardous waste" at the time of disposal. Transportation, treatment, storage and disposal of waste materials must be conducted in accordance with RCRA regulations (see 40 CFR 260 through 40 CFR 271). State and/or local regulations may be more restrictive. Contact the RCRA/Superfund Hotline at 800-424-9346 or your regional U.S. EPA office for guidance concerning case specific disposal issues.

SECTION 14 – Transport Information

The shipping description below may not represent requirements for all modes of transportation, shipping methods or locations outside of the United States.

Oil Base 100 Neutral (MSDS)

09/19/07

Page 8 of 11

U.S. DOT Status:

Not regulated by the U.S. Department of Transportation as a hazardous material

Proper Shipping Name: Not Regulated

Hazard Class: Not Regulated

Packing Group(s): Not Applicable

Un / NA ID: Not Regulated

Reportable Quantity:

A Reportable Quantity (RQ) has not been established for this material.

Placards:

Emergency Response Guide No: Not Applicable

HAZMAT STCC No: 2911990

MARPOL III Status: Not a DOT "Marine Pollutant" per 49 CFR 1718

SECTION 15 – Regulatory Information

TSCA Inventory:

This product and/or its components are listed on the Toxic Substance Control Act (TSCA) inventory.

SARA 302 / 304:

The Superfund Amendments and Reauthorization Act of 1986 (SARA) Title III requires facilities subject to Subparts 302 and 304 to submit emergency planning and notification information based on Threshold Planning Quantities (TPQs) and Reportable Quantities (RQs) for "Extremely Hazardous Substances" listed in 40 CFR 302.4 and 40 CFR 355. No components were identified.

SARA 311/312:

The Superfund Amendments and Reauthorization Act of 1986 (SARA) Title III requires facilities subject to this subpart to submit aggregate information on chemicals by "Hazard Category" as defined in 40 CFR 370.2. This material would be classified under the following hazard categories: No SARA 311 / 312 hazard categories identified.

SARA 313:

This product contains the following components in concentrations above de minimis levels that are listed as toxic chemicals in 40 CFR Part 372 pursuant to the requirements of Section 313 of SARA: No Components were identified.

CERCLA:

The Comprehensive Environmental Response, Compensation, and Liability Act of 1980 (CERCLA) requires notification of the National Response Center concerning release of quantities of "hazardous substances" equal to or greater than the reportable quantities (RQs) listed in 40 CFR 302.4. As

Oil Base 100 Neutral (MSDS)

09/19/07

Page 9 of 11

defined by CERCLA, the term "hazardous substance" does not include petroleum, including crude oil or any fraction thereof which is not otherwise specifically designated in 40 CFR 302.4. Chemical Substances present in this product or refinery stream that may be subject to this statue are: None Identified.

CWA:

This material is classified as an oil under Section 311 of the Clean Water Act (CWA) and the Oil pollution Act of 1990 (OPA). Discharges or spills which produce a visible sheen on waters of the United States, their adjoining shorelines, or into conduits leading to surface waters must be reported to the EPA's National Response Center at 800-424-8802

California Proposition 65:

This material may contain the following components which are known to the State of California to cause cancer, birth defects or other reproductive harm, and may be subject to the requirements of California Proposition 65 (CA Health and Safety Code Section 25249.5): Toluene: 0.001%

New Jersey Right-to-Know Label: Petroleum Oil

Additional Regulatory Remarks: No additional regulatory remarks

SECTION 16 - Other Information

Refer to Page 1 for the HMIS and NFPA hazard Ratings for this product.

Revision Information: Version Number: 1.1

Revision Date: 02/12/2003

Print Date: Printed on 02/12/2003

Original - Shipper Provided Short Form Straight Bill of Lading - Not Negotiable - Domestic

TRAILER #225 SHIPPED FROM: CES Environmental Services, Inc. (TSDF) 11a) HOU-2434 4904 Griggs Road 11b) Houston . TX 77021 11c) (713) 676-1460 11c)

The property described below, in apparent good order, except as noted (content and condition of packages unknown), marked, consigned, and destined as indicated below, whic said carrier (the word carrier being understood throughout this as meaning any person or corporation authorized to be in possession of the property under the contract) agrees to carry to its unusual place of delivery at said destination, if on its route, otherwise to deliver to another carrier on the route to said destination. This Bill of Lading is a receipt for goods; it is not of itself a contract of carriage. It is mutually agreed, as to each carrier of all or as to any said over all or any portion of said route to destination, and as to each par any time interested in all or any of said property, that every service to be performed hereunder shall be subject to all the terms and conditions contained in the applicable contract between shipper and carrier or intermediary.

For payment: Charges to be billed to Shipper or the "Billed to" party are set forth in the governing contract with Shipper. No charges other than those contained therein may be bi to Shipper or the "Billed to" party without prior written consent of Shipper. The extra copy of this Bill of Lading, furnished at the time of shipment, must be attached to the freight b submitted to Shipper or the "Billed to" party and sent to:

CONSIGNED TO:

CES Environmental Services, Inc. 4904 Griggs Rd.

Houston, TX 77021

CARRIER:

CES Environmental Services, Inc.

4904 Griggs Rd.

Houston, TX 77021

This is to certify that the product stated below are properly classified, described, packaged, marked and labeled and is in proper condition for transportation according to the applicable regulations of the Department of Transportation. If this Shipment moves between to ports by a carrier by water, the law requires that the Bill of Lading shall state whetl it is "carrier's or shipper's weight."

Intermodal Certificate: All information required by Federal Highway Administration regulations at 49 CFR 390.54© implementing the Intermodal Safe Container Act of 1992 is set forth on the face of this bill of lading. The shipper name herein is the tendering party.

Material Safety Data Sheet

Ethanol, Absolute

ACC# 89308

Section 1 - Chemical Product and Company Identification

MSDS Name: Ethanol, Absolute Catalog Numbers: NC9602322

Synonyms: Ethyl Alcohol; Ethyl Alcohol Anhydrous; Ethyl Hydrate; Ethyl Hydroxide; Fermentation

Alcohol; Grain Alcohol; Methylcarbinol; Molasses Alcohol; Spirits of Wine.

Company Identification:

Fisher Scientific 1 Reagent Lane Fair Lawn, NJ 07410

For information, call: 201-796-7100 Emergency Number: 201-796-7100

For CHEMTREC assistance, call: 800-424-9300

For International CHEMTREC assistance, call: 703-527-3887

Section 2 - Composition, Information on Ingredients

CAS#	Chemical Name	Percent	EINECS/ELINCS
64-17-5	Ethanol	ca.100	200-578-6

Section 3 - Hazards Identification

EMERGENCY OVERVIEW

Appearance: colorless clear liquid. Flash Point: 16.6 deg C.

Warning! Causes severe eye irritation. **Flammable liquid and vapor.** Causes respiratory tract irritation. This substance has caused adverse reproductive and fetal effects in humans. May cause central nervous system depression. May cause liver, kidney and heart damage. Causes moderate skin irritation.

Target Organs: Kidneys, heart, central nervous system, liver.

Potential Health Effects

Eye: Causes severe eye irritation. May cause painful sensitization to light. May cause chemical conjunctivitis and corneal damage.

Skin: Causes moderate skin irritation. May cause cyanosis of the extremities.

Ingestion: May cause gastrointestinal irritation with nausea, vomiting and diarrhea. May cause systemic toxicity with acidosis. May cause central nervous system depression, characterized by excitement, followed by headache, dizziness, drowsiness, and nausea. Advanced stages may cause collapse, unconsciousness, coma and possible death due to respiratory failure.

Inhalation: Inhalation of high concentrations may cause central nervous system effects characterized by nausea, headache, dizziness, unconsciousness and coma. Causes respiratory tract irritation. May cause narcotic effects in high concentration. Vapors may cause dizziness or suffocation.

Chronic: May cause reproductive and fetal effects. Laboratory experiments have resulted in

mutagenic effects. Animal studies have reported the development of tumors. Prolonged exposure may cause liver, kidney, and heart damage.

Section 4 - First Aid Measures

Eyes: Get medical aid. Gently lift eyelids and flush continuously with wate r.

Skin: Get medical aid. Wash clothing before reuse. Flush skin with plenty of soap and water. **Ingestion:** Do not induce vomiting. If victim is conscious and alert, give 2-4 cupfuls of milk or water. Never give anything by mouth to an unconscious person. Get medical aid.

Inhalation: Remove from exposure and move to fresh air immediately. If not breathing, give artificial respiration. If breathing is difficult, give oxygen. Get medical aid. Do NOT use mouth-to-mouth resuscitation.

Notes to Physician: Treat symptomatically and supportively. Persons with skin or eye disorders or liver, kidney, chronic respiratory diseases, or central and peripheral nervous sytem diseases may be at increased risk from exposure to this substance.

Antidote: None reported.

Section 5 - Fire Fighting Measures

General Information: Containers can build up pressure if exposed to heat and/or fire. As in any fire, wear a self-contained breathing apparatus in pressure-demand, MSHA/NIOSH (approved or equivalent), and full protective gear. Vapors may form an explosive mixture with air. Vapors can travel to a source of ignition and flash back. Will burn if involved in a fire. Flammable Liquid. Can release vapors that form explosive mixtures at temperatures above the flashpoint. Use water spray to keep fire-exposed containers cool. Containers may explode in the heat of a fire.

Extinguishing Media: For small fires, use dry chemical, carbon dioxide, water spray or alcohol-resistant foam. For large fires, use water spray, fog, or alcohol-resistant foam. Use water spray to cool fire-exposed containers. Water may be ineffective. Do NOT use straight streams of water.

Flash Point: 16.6 deg C (61.88 deg F)

Autoignition Temperature: 363 deg C (685.40 deg F)

Explosion Limits, Lower: 3.3 vol %

Upper: 19.0 vol %

NFPA Rating: (estimated) Health: 2; Flammability: 3; Instability: 0

Section 6 - Accidental Release Measures

General Information: Use proper personal protective equipment as indicated in Section 8. **Spills/Leaks:** Absorb spill with inert material (e.g. vermiculite, sand or earth), then place in suitable container. Remove all sources of ignition. Use a spark-proof tool. Provide ventilation. A vapor suppressing foam may be used to reduce vapors.

Section 7 - Handling and Storage

Handling: Wash thoroughly after handling. Use only in a well-ventilated area. Ground and bond containers when transferring material. Use spark-proof tools and explosion proof equipment. Avoid contact with eyes, skin, and clothing. Empty containers retain product residue, (liquid and/or

vapor), and can be dangerous. Keep container tightly closed. Keep away from heat, sparks and flame. Avoid ingestion and inhalation. Do not pressurize, cut, weld, braze, solder, drill, grind, or expose empty containers to heat, sparks or open flames.

Storage: Keep away from heat, sparks, and flame. Keep away from sources of ignition. Store in a tightly closed container. Keep from contact with oxidizing materials. Store in a cool, dry, well-ventilated area away from incompatible substances. Flammables-area. Do not store near perchlorates, peroxides, chromic acid or nitric acid.

Section 8 - Exposure Controls, Personal Protection

Engineering Controls: Use explosion-proof ventilation equipment. Facilities storing or utilizing this material should be equipped with an eyewash facility and a safety shower. Use adequate general or local exhaust ventilation to keep airborne concentrations below the permissible exposure limits.

Exposure Limits

Chemical Name	ACGIH	NIOSH	OSHA - Final PELs
Ethanol	1000 ppm TWA	1000 ppm TWA; 1900 mg/m3 TWA 3300 ppm IDLH	1000 ppm TWA; 1900 mg/m3 TWA

OSHA Vacated PELs: Ethanol: 1000 ppm TWA; 1900 mg/m3 TWA

Personal Protective Equipment

Eyes: Wear appropriate protective eyeglasses or chemical safety goggles as described by OSHA's eye and face protection regulations in 29 CFR 1910.133 or European Standard EN166.

Skin: Wear appropriate protective gloves to prevent skin exposure.

Clothing: Wear appropriate protective clothing to prevent skin exposure.

Respirators: A respiratory protection program that meets OSHA's 29 CFR 1910.134 and ANSI Z88.2 requirements or European Standard EN 149 must be followed whenever workplace conditions warrant a respirator's use.

Section 9 - Physical and Chemical Properties

Physical State: Clear liquid Appearance: colorless

Odor: Mild, rather pleasant, like wine or whis

pH: Not available.

Vapor Pressure: 59.3 mm Hg @ 20 deg C

Vapor Density: 1.59

Evaporation Rate:Not available. **Viscosity:** 1.200 cP @ 20 deg C

Boiling Point: 78 deg C

Freezing/Melting Point:-114.1 deg C Decomposition Temperature:Not available.

Solubility: Miscible.

Specific Gravity/Density: 0.790 @ 20°C

Molecular Formula:C2H5OH Molecular Weight:46.0414

Section 10 - Stability and Reactivity

Chemical Stability: Stable under normal temperatures and pressures.

Conditions to Avoid: Incompatible materials, ignition sources, excess heat, oxidizers.

Incompatibilities with Other Materials: Strong oxidizing agents, acids, alkali metals, ammonia, hydrazine, peroxides, sodium, acid anhydrides, calcium hypochlorite, chromyl chloride, nitrosyl perchlorate, bromine pentafluoride, perchloric acid, silver nitrate, mercuric nitrate, potassium-tertbutoxide, magnesium perchlorate, acid chlorides, platinum, uranium hexafluoride, silver oxide, iodine heptafluoride, acetyl bromide, disulfuryl difluoride, tetrachlorosilane + water, acetyl chloride, permanganic acid, ruthenium (VIII) oxide, uranyl perchlorate, potassium dioxide.

Hazardous Decomposition Products: Carbon monoxide, irritating and toxic fumes and gases, carbon dioxide.

Hazardous Polymerization: Will not occur.

Section 11 - Toxicological Information

RTECS#:

CAS# 64-17-5: KQ6300000

LD50/LC50: CAS# 64-17-5:

Draize test, rabbit, eye: 500 mg Severe; Draize test, rabbit, eye: 500 mg/24H Mild; Draize test, rabbit, skin: 20 mg/24H Moderate; Inhalation, mouse: LC50 = 39 gm/m3/4H; Inhalation, rat: LC50 = 20000 ppm/10H; Oral, mouse: LD50 = 3450 mg/kg; Oral, rabbit: LD50 = 6300 mg/kg; Oral, rat: LD50 = 7060 mg/kg; Oral, rat: LD50 = 9000 mg/kg;

Carcinogenicity:

CAS# 64-17-5: Not listed by ACGIH, IARC, NTP, or CA Prop 65.

Epidemiology: Ethanol has been shown to produce fetotoxicity in the embryo or fetus of laboratory animals. Prenatal exposure to ethanol is associated with a distinct pattern of congenital malformations that have collecetively been termed the "fetal alcohol syndrome".

Teratogenicity: Oral, Human - woman: TDLo = 41 gm/kg (female 41 week(s) after conception) Effects on Newborn - Apgar score (human only) and Effects on Newborn - other neonatal measures or effects and Effects on Newborn - drug dependence.

Reproductive Effects: Intrauterine, Human - woman: TDLo = 200 mg/kg (female 5 day(s) premating) Fertility - female fertility index (e.g. # females pregnant per # sperm positive females; # females pregnant per # females mated).

Neurotoxicity: No information available.

Mutagenicity: DNA Inhibition: Human, Lymphocyte = 220 mmol/L.; Cytogenetic Analysis: Human, Lymphocyte = 1160 gm/L.; Cytogenetic Analysis: Human, Fibroblast = 12000 ppm.; Cytogenetic Analysis: Human, Leukocyte = 1 pph/72H (Continuous).; Sister Chromatid Exchange: Human, Lymphocyte = 500 ppm/72H (Continuous).

Other Studies: Standard Draize Test(Skin, rabbit) = 20 mg/24H (Moderate) Standard Draize Test: Administration into the eye (rabbit) = 500 mg (Severe).

Section 12 - Ecological Information

Ecotoxicity: Fish: Rainbow trout: LC50 = 12900-15300 mg/L; 96 Hr; Flow-through @ 24-24.3° CFish: Rainbow trout: LC50 = 11200 mg/L; 24 Hr; Fingerling (Unspecified)Bacteria: Phytobacterium phosphoreum: EC50 = 34900 mg/L; 5-30 min; Microtox test When spilled on land it is apt to volatilize, biodegrade, and leach into the ground water, but no data on the rates of these processes could be found. Its fate in ground water is unknown. When released into water it will volatilize and probably biodegrade. It would not be expected to adsorb to sediment or bioconcentrate in fish.

Environmental: When released to the atmosphere it will photodegrade in hours (polluted urban atmosphere) to an estimated range of 4 to 6 days in less polluted areas. Rainout should be significant.

Physical: No information available. **Other:** No information available.

Section 13 - Disposal Considerations

Chemical waste generators must determine whether a discarded chemical is classified as a hazardous waste. US EPA guidelines for the classification determination are listed in 40 CFR Parts 261.3. Additionally, waste generators must consult state and local hazardous waste regulations to ensure complete and accurate classification.

RCRA P-Series: None listed. RCRA U-Series: None listed.

10-30

SECTION 3 - Hazards Identification

Also see Emergency Overview and Hazard Rating on Page 1 of this MSDS.

Major Route(s) of Entry: Skin Contact.

Signs and Symptoms of Acute Exposure:

Inhalation:

No significant adverse health effects are expected to occur upon short-term exposure.

Eye Contact:

This product can cause transient mild eye irritation with short-term contact with liquid sprays or mists.

Skin Contact:

This material can cause mild skin irritation from prolonged or repeated skin contact. Injection under the skin can cause inflammation and swelling. Injection of pressurized hydrocarbons can cause severe, permanent tissue damage. Initial symptoms may be minor. Injection of petroleum hydrocarbons requires immediate medical attention.

Ingestion:

If swallowed, large volumes of material can cause generalized depression, headache, drowsiness, nausea, vomiting and diarrhea. Smaller doses can cause a laxative effect. If aspirated into the lungs, liquid can cause lung damage.

Oil Base 100 Neutral (MSDS)

09/19/07

Page 2 of 11

Chronic Health Effects:

Contains a petroleum-based mineral oil. Prolonged or repeated skin contact can cause mild irritation and inflammation characterized by drying, cracking (dermatitis), or oily acne. Repeated or prolonged inhalation of petroleum-based mineral oil mists at concentrations above applicable workplace exposure levels can cause respiratory irritation or other pulmonary effects.

Conditions Aggravated by Exposure:

Medical conditions aggravated by exposure to this material may include pre-existing skin disorders.

Target Organs:

This material may cause damage to the following organs: Skin

Carcinogenic Potential:

This product does not contain any components at concentrations above 0.1%, which are considered carcinogenic by OSHA, IARC or NTP.

OSHA Hazard Classification is indicated by an "X" in the box adjacent to the hazard title. If no "X" is present, the product does not exhibit the hazard as defined in the OSHA Hazard Communication Standard (29 CFR 1910.1200).

OSHA Health Irritant ()	Hazar Toxic		ification Sensitizer	()	Highly Toxic() Cor	rosive ()	Carc	inogenic	()
OSHA Physica Combustible Water-reactive	()	Explosi		()	Pyrophoric Organic Peroxic	() de ()	Flammable Unstable	` '	Oxidizer	()

SECTION 4 - First Aid Measures

Take proper precautions to ensure your own health and safety before attempting rescure or providing first aid. For specific information, refer to Exposure Controls and Personal Protection in Section 8 of this MSDS.

Inhalation:

Vaporization is not expected at ambient temperatures. This material is not expected to cause inhalation-related disorders under anticipated conditions of use. In case of overexposure, move the person to fresh air.

Eye Contact:

Check for and remove contact lenses. Flush eyes with cool, clean, low-pressure water by lifting and lowering eyelids. Seek medical attention if excessive tearing, redness, or pain persist.

Skin Contact:

If burned by hot material, cool skin by quenching with large amounts of cool water. For contact with product at ambient temperatures, remove contaminated shoes and clothing. Wipe off excess material. Wash exposed skin with mild soap and water. Seek medical attention if tissue appears damaged or if pain or irritation persist. Thoroughly clean contaminated clothing before reuse. Discard

Oil Base 100 Neutral (MSDS)

09/19/07

Page 3 of 11

contaminated leather goods. If material is injected under the skin, seek medical attention immediately.

Ingestion:

Do not induce vomiting unless directed to by a physician. Do not give anything to drink unless directed to by a physician. Never give anything by mouth to a person who is no fully conscious. If significant amounts are swallowed or irritation or discomfort occurs, seek medical attention immediately.

Notes to Physician:

The viscosity range of the product represented by this MSDS is 100 to 400 SUS at 100F. Accordingly, upon ingestion there is low to moderate risk of aspiration. Careful gastric lavage may be considered to evacuate large quantities of material. Subcutaneous or intramuscular injection requires prompt surgical debridement.

SECTION 5 – Fire Fighting Measures

NFPA Flammability Classification: NFPA Class-IIIB combustible material. Slightly combustible.

Flash Point Method: Open Cup: 198C (388F) (Cleveland. (Minimum)).

Lower Flammable Limit: No Data

Upper Flammable Limit: No Data

Autoitgnition Temperature: Not Available

Hazardous Combustion Products:

Carbon dioxide, carbon monoxide, smoke, fumes, unburned hydrocarbons and trace oxides of sulfur and/or nitrogen.

Special Properties:

This material can burn but will not readily ignite. This material will release vapors when heated above the flash point temperature that can ignite when exposed to a source of ignition. In enclosed spaces, heated vapor can ignite with explosive force. Mists or sprays may burn at temperatures below the flash point.

Extinguishing Media:

Use dry chemical, foam, carbon dioxide or water fog.

Protection of Fire Fighters:

Firefighters must use full bunker gear including NIOSH-approved positive pressure self-contained breathing apparatus to protect against potential hazardous combustion or decomposition products and oxygen deficiencies.

SECTION 6 - Accidental Release Measures

Take proper precautions to ensure your own health and safety before attempting spill control or clean-up. For specific information, refer to the Emergency Overview on Page 1, Exposure Controls and Personal Protection in Section 8 and Disposal Considerations in Section 13 of this MSDS.

Do not touch damaged containers or spilled material unless wearing appropriate protective equipment. Slipping hazard; do not walk through spilled material. Stop leak if you can do so without risk. For small spills, absorb or cover with dry earth, sand, or other inert non-combustible absorbent material and place into waste containers for later disposal. Contain large spills to maximize product recovery or disposal. Prevent entry into waterways or sewers. In urban area, cleanup spill as soon as possible. In natural environments, seek cleanup advice from specialists to minimize physical habitat damage. This material will float on water. Absorbent pads and similar materials can be used. Comply with all laws and regulation.

SECTION 7 - Handling and Storage

Handling:

Avoid contamination and extreme temperatures to minimize product degradation. Empty containers may contain product residues that can ignite with explosive force. Do not pressurize, cut, weld, braze solder, drill, grind or expose containers to flames, sparks, heat or other potential ignition sources. Consult appropriate federal, state and local authorities before reusing, reconditioning, reclaiming recycling or disposing of empty containers and/or waste residues of this product.

Storage:

Keep container closed. Do not store with strong oxidizing agents. Do not store at elevated temperatures. Avoid storing product in direct sunlight for extended periods of time. Consult appropriate federal, state and local authorities before reusing, reconditioning, reclaiming, recycling or disposing of empty containers or waste residues of this product.

SECTION 8 - Exposure Controls / Personal Protection

Engineering Controls:

Provide exhaust ventilation or other engineering controls to keep the airborne concentrations of mistss and/or vapors below the recommended exposure limits (see below). An eye wash station and safety shower should be located near the work-station.

Personal Protective Equipment:

Personal protective equipment should be selected based upon the conditions under which this material is used. A hazard assessment of the work area for PPE requirements should be conducted by a qualified professional pursuant to OSHA regulations. The following pictograms represent the minimum requirements for personal protective equipment. For certain operations, additional PPE may be required.

Eye Protection:

Safety glasses equipped with side shields are recommended as minimum protection in industrial settings. Wear goggles and/or face shield if splashing or spraying is anticipated. Wear goggles and face shield if material is heated above 125F (51C). Have suitable eye wash water available.

Oil Base 100 Neutral (MSDS)

09/19/07

Page 5 of 11

Hand Protection:

Use gloves constructed of chemical resistant materials such as neoprene or heavy nitrile rubber if frequent or prolonged contact is expected. Use heat-protective gloves when handling product at elevated temperatures.

Body Protection:

Use clean and impervious protective clothing (e.g., neoprene or Tyvek) if splashing or spraying conditions are present. Protective clothing may include long-sleeve outer garment, apron, or lab coat. If significant contact occurs, remove oil-contaminated clothing as soon as possible and promptly shower. Launder contaminated clothing before reuse or discard. Wear heat protective boots and protective clothing when handling material at elevated temperatures.

Respiratory Protection:

Vaporization is not expected at ambient temperatures. Therefore, the need for respiratory protection is not anticipated under normal use conditions and with adequate ventilation. If elevated airborne concentrations above applicable workplace exposure levels are anticipated, a NIOSH-approved organic vapor respirator equipped with a dust/mists prefilter should be used. Protection factors vary depending upon the type of respirator used. Respirators should be used in accordance with OSHA requirements (29 CFR 1910.134).

General Comments:

Use good personal hygiene practices. Wash hands and other exposed skin areas with plenty of mild soap and water before eating, drinking, smoking, use of toilet facilities, or leaving work. DO NOT use gasoline, kerosene, solvents or harsh abrasives as skin cleaners. Since specific exposure standards/control limits have not been established for this product, the "Oil Mists, Mineral" exposure limits shown below are suggested as minimum control guidelines.

Occupational Exposure Guidelines:

Substance: Oil Mists, Mineral

Applicable Workplace Exposure Levels: ACGIH (United States)

TWA: 5 mg/m3 Stel: 10 mg/m3

OSHA (United States) TWA: 5 mg/m3

SECTION 9 – Physical and Chemical Properties

Physical State: Liquid

Color: Clear to Light Amber
Odor: Mild Petroleum Odor
Specific Gravity: 0.86 (Water =1)

pH: Not Applicable

Vapor Density: >1 (Air = 1)

Boiling Point / Range: Not Available **Melting / Freezing Point:** Not Available

Oil Base 100 Neutral (MSDS)

09/19/07

Page 6 of 11

Vapor Pressure: <0.01 kPa (<0.1 mmHg) (at 20C)

Viscosity: (cSt @ 40C) 20

Solubility in Water: Insoluble in Cold Water **Volatile Characteristics:** Negligible Volatility

Additional Properties: Gravity, API (ASTM D287) = 32.5 @ 60F

Density = 7.18 lbs/gal

Viscosity (ASTM D2161) = 104 SUS @ 100F

SECTION 10 - Stability and Reactivity

Chemical Stability: Stable

Hazardous Polymerization: Not expected to occur

Materials Incompatibility: Strong Oxidizers

Conditions to Avoid:

Keep away from extreme heat, sparks, open flame, and strongly oxidizing conditions.

Hazardous Decomposition Products:

No additional hazardous decomposition products were identified other than the combustion products identified in Section 5 of this MSDS.

SECTION 11 – Toxicological Information

For other health-related information, refer to the Emergency Overview on Page 1 and the Hazards Identification in Section 3 of this MSDS.

Toxicity Data: Distillates, Petroleum, Solvent-Refined <u>Light</u> Paraffiniuc:

Oral (LD50): Acute: >5000 mg/kg [Rat]
Dermal (LD50): Acute: >2000 mg/kg [Rabbit]

Distillates, Petroleum, Solvent-Refined Heavy Paraffinic:

Oral (LD50): Acute: >5000 mg/kg [Rat]
Dermal (LD50): Acute: >2000 mg/kg [Rabbit]

Distillates, Petroleum, Solvent-Refined Light Paraffiniuc:

Mineral oil mists derived from highly refined oils are reported to have low acute and sub-acute toxicities in animals. Effects from single and short-term repeated exposures to high concentrations of mineral oil mists well above applicable workplace exposure levels include lung inflammatory reaction, lipoid granuloma formation and lipoid pneumonia. In acute and sub-acute studies involving exposures to lower concentrations of mineral mists at or near current work place exposure levels produced no significant toxicological effects. In long-term studies (up to two years) no carcinogenic effects have been reported in any animal species tested.

Oil Base 100 Neutral (MSDS)

09/19/07

Distillates, Petroleum, Solvent-Refined Heavy Paraffinic:

Mineral oil mists derived from highly refined oils are reported to have low acute and sub-acute toxicities in animals. Effects from single and short-term repeated exposures to high concentrations of mineral oil in animals. Effects from single and short-term repeated exposure to high concentrations of mineral oil mists well above applicable workplace exposure levels include lung inflammatory reaction, lipoid, granuloma formation and lipoid pneumonia. In acute and sub-acute studies involving exposures to lower concentrations of mineral oil mists at or near current work place exposure levels produced no significant toxicological effects. In long-term studies (up to two years) no carcinogenic effects have been reported in any animal species attested. Analyses conducted by method IP 346 indicate that the polycyclic aromatic concentration of this mineral oil is below 3.0 weight percent.

SECTION 12 - Ecological Information

Ecotoxicity:

Analysis for ecological effects has not been conducted on this product. However, if spilled, this product and any contaminated soil or water may be harmful to human, animal, and aquatic life. Also, the coating action associated with petroleum and petroleum products can be harmful or fatal to aquatic life and waterfowl.

Environmental Fate:

An environmental fate analysis has not been conducted on this specific product. Plants and animals may experience harmful or fatal effects when coated with petroleum-based products. Petroleum-based (mineral) lube oils will normally float on water. In stagnant or slow-flowing waterways, an oil layer can cover a large surface area. As a result, this oil layer might limit or eliminate natural atmospheric oxygen transport into the water. With time, if not removed, oxygen depletion in the waterway may be sufficient to cause a fish kill or create an anaerobic environment.

SECTION 13 - Disposal Considerations

Hazard characteristic and regulatory waste stream classification can change with product use. Accordingly, it is the responsibility of the user to determine the proper storage, transportation, treatment and/or disposal methodologies for spent materials and residues at the time of disposition.

Conditions of use may cause this material to become a "hazardous waste", as defined by federal or state regulations. It is the responsibility of the user to determine if the material is a RCRA "hazardous waste" at the time of disposal. Transportation, treatment, storage and disposal of waste materials must be conducted in accordance with RCRA regulations (see 40 CFR 260 through 40 CFR 271). State and/or local regulations may be more restrictive. Contact the RCRA/Superfund Hotline at 800-424-9346 or your regional U.S. EPA office for guidance concerning case specific disposal issues.

SECTION 14 – Transport Information

The shipping description below may not represent requirements for all modes of transportation, shipping methods or locations outside of the United States.

Oil Base 100 Neutral (MSDS)

09/19/07

Page 8 of 11

U.S. DOT Status:

Not regulated by the U.S. Department of Transportation as a hazardous material

Proper Shipping Name: Not Regulated

Hazard Class: Not Regulated

Packing Group(s): Not Applicable

Un / NA ID: Not Regulated

Reportable Quantity:

A Reportable Quantity (RQ) has not been established for this material.

Placards:

Emergency Response Guide No: Not Applicable

HAZMAT STCC No: 2911990

MARPOL III Status: Not a DOT "Marine Pollutant" per 49 CFR 1718

SECTION 15 – Regulatory Information

TSCA Inventory:

This product and/or its components are listed on the Toxic Substance Control Act (TSCA) inventory.

SARA 302/304:

The Superfund Amendments and Reauthorization Act of 1986 (SARA) Title III requires facilities subject to Subparts 302 and 304 to submit emergency planning and notification information based on Threshold Planning Quantities (TPQs) and Reportable Quantities (RQs) for "Extremely Hazardous Substances" listed in 40 CFR 302.4 and 40 CFR 355. No components were identified.

SARA 311/312:

The Superfund Amendments and Reauthorization Act of 1986 (SARA) Title III requires facilities subject to this subpart to submit aggregate information on chemicals by "Hazard Category" as defined in 40 CFR 370.2. This material would be classified under the following hazard categories: No SARA 311 / 312 hazard categories identified.

SARA 313:

This product contains the following components in concentrations above de minimis levels that are listed as toxic chemicals in 40 CFR Part 372 pursuant to the requirements of Section 313 of SARA: No Components were identified.

CERCLA:

The Comprehensive Environmental Response, Compensation, and Liability Act of 1980 (CERCLA) requires notification of the National Response Center concerning release of quantities of "hazardous substances" equal to or greater than the reportable quantities (RQs) listed in 40 CFR 302.4. As

Oil Base 100 Neutral (MSDS)

09/19/07

Page 9 of 11

defined by CERCLA, the term "hazardous substance" does not include petroleum, including crude oil or any fraction thereof which is not otherwise specifically designated in 40 CFR 302.4. Chemical Substances present in this product or refinery stream that may be subject to this statue are: None Identified.

CWA:

This material is classified as an oil under Section 311 of the Clean Water Act (CWA) and the Oil pollution Act of 1990 (OPA). Discharges or spills which produce a visible sheen on waters of the United States, their adjoining shorelines, or into conduits leading to surface waters must be reported to the EPA's National Response Center at 800-424-8802

California Proposition 65:

This material may contain the following components which are known to the State of California to cause cancer, birth defects or other reproductive harm, and may be subject to the requirements of California Proposition 65 (CA Health and Safety Code Section 25249.5): Toluene: 0.001%

New Jersey Right-to-Know Label: Petroleum Oil

Additional Regulatory Remarks: No additional regulatory remarks

SECTION 16 - Other Information

Refer to Page 1 for the HMIS and NFPA hazard Ratings for this product.

Bill Of Lading #:

81311

Folder ID: Internal Temp Paperwork

Original - Shipper Provided Short Form Straight Bill of Lading - Not Negotiable - Domestic

SHIPPED FROM: TRAILER #210 CES Environmental Services, Inc. (TSDF) 11a) -4904 Griggs Road 11b) Houston, TX 77021 11c) (713) 676-1460 11c)

The property described below, in apparent good order, except as noted (content and condition of packages unknown), marked, consigned, and destined as indicated below, whic said carrier (the word carrier being understood throughout this as meaning any person or corporation authorized to be in possession of the property under the contract) agrees to carry to its unusual place of delivery at said destination, if on its route, otherwise to deliver to another carrier on the route to said destination. This Bill of Lading is a receipt for goods; it is not of itself a contract of carriage. It is mutually agreed, as to each carrier of all or as to any said over all or any portion of said route to destination, and as to each par any time interested in all or any of said property, that every service to be performed hereunder shall be subject to all the terms and conditions contained in the applicable contract between shipper and carrier or intermediary.

For payment: Charges to be billed to Shipper or the "Billed to" party are set forth in the governing contract with Shipper. No charges other than those contained therein may be bi to Shipper or the "Billed to" party without prior written consent of Shipper. The extra copy of this Bill of Lading, furnished at the time of shipment, must be attached to the freight b submitted to Shipper or the "Billed to" party and sent to:

CONSIGNED TO: CARRIER:

CES Environmental Services, Inc. CES Environmental Services, Inc.

4904 Griggs Rd. 4904 Griggs Rd. Houston, TX 77021 Houston, TX 77021

This is to certify that the product stated below are properly classified, described, packaged, marked and labeled and is in proper condition for transportation according to the applicable regulations of the Department of Transportation. If this Shipment moves between to ports by a carrier by water, the law requires that the Bill of Lading shall state whetl it is "carrier's or shipper's weight."

Intermodal Certificate: All information required by Federal Highway Administration regulations at 49 CFR 390.54© implementing the Intermodal Safe Container Act of 1992 is set forth on the face of this bill of lading. The shipper name herein is the tendering party.

METHYL ETHYL KETONE

1. Product Identification

Synonyms: 2-Butanone; ethyl methyl ketone; MEK; Methyl acetone

CAS No.: 78-93-3

Molecular Weight: 72.11

Chemical Formula: CH3COCH2CH3

Product Codes:

J.T. Baker: 5385, 9214, 9319, 9323, 9414, O531

Mallinckrodt: 6206, 6233, 6240, 6243

2. Composition/Information on Ingredients

Ingredient CAS No Percent Hazardous Methyl Ethyl Ketone 78-93-3 99 - 100%

3. Hazards Identification

Emergency Overview

DANGER! EXTREMELY FLAMMABLE LIQUID AND VAPOR, VAPOR MAY CAUSE FLASH FIRE, HARMFUL OR FATAL IF SWALLOWED. HARMFUL IF INHALED OR ABSORBED THROUGH SKIN. AFFECTS CENTRAL NERVOUS SYSTEM, CAUSES IRRITATION TO SKIN, EYES AND RESPIRATORY TRACT.

SAF-T-DATA^(tm) Ratings (Provided here for your convenience)

Health Rating: 2 - Moderate (Life)

Flammability Rating: 3 - Severe (Flammable) Reactivity Rating: 1 - Slight Contact Rating: 2 - Moderate

Lab Protective Equip: GOGGLES & SHIELD; LAB COAT & APRON; VENT HOOD; PROPER GLOVES; CLASS B EXTINGUISHER

Storage Color Code: Red (Flammable)

Potential Health Effects

Inhalation:

Causes irritation to the nose and throat. Concentrations above the TLV may cause headache, dizziness, nausea, shortness of breath, and vomiting. Higher concentrations may cause central nervous system depression and unconsciousness

May produce abdominal pain, nausea. Aspiration into lungs can produce severe lung damage and is a medical emergency. Other symptoms expected to parallel inhalation.

Skin Contact:

Causes irritation to skin. Symptoms include redness, itching, and pain. May be absorbed through the skin with possible systemic effects.

Eye Contact:

Vapors are irritating to the eyes. Splashes can produce painful irritation and eye damage.

Chronic Exposure:

Prolonged skin contact may defat the skin and produce dermatitis. Chronic exposure may cause central nervous system effects,

Aggravation of Pre-existing Conditions:

Persons with pre-existing skin disorders or eye problems or impaired respiratory function may be more susceptible to the effects of the substance

4. First Aid Measures

Inhalation:

Remove to fresh air. If not breathing, give artificial respiration. If breathing is difficult, give oxygen. Get medical attention

Ingestion:

Aspiration hazard. If swallowed, vomiting may occur spontaneously, but DO NOT INDUCE. If vomiting occurs, keep head below hips to prevent aspiration into lungs. Never give anything by mouth to an unconscious person. Call a physician immediately.

Skin Contact:

Immediately flush skin with plenty of soap and water for at least 15 minutes while removing contaminated clothing and shoes. Get medical attention. Wash clothing before reuse. Thoroughly clean shoes before reuse.

Eye Contact:

Immediately flush eyes with plenty of water for at least 15 minutes, lifting upper and lower eyelids occasionally. Get medical attention.

5. Fire Fighting Measures

Fire

Flash point: -9C (16F) CC

Autoignition temperature: 404C (759F) Flammable limits in air % by volume:

lel: 1.4; uel: 11.4

Extremely Flammable

Explosion:

Above flash point, vapor-air mixtures are explosive within flammable limits noted above. Vapors can flow along surfaces to distant ignition source and flash back. Contact with strong oxidizers may cause fire. Sealed containers may rupture when heated. Sensitive to static discharge.

Fire Extinguishing Media:

Dry chemical, foam or carbon dioxide. Water spray may be used to keep fire exposed containers cool, dilute spills to nonflammable mixtures, protect personnel attempting to stop leak and disperse vapors.

Special Information:

In the event of a fire, wear full protective clothing and NIOSH-approved self-contained breathing apparatus with full facepiece operated in the pressure demand or other positive pressure mode. This highly flammable liquid must be kept from sparks, open flame, hot surfaces, and all sources of heat and ignition.

6. Accidental Release Measures

Ventilate area of leak or spill. Remove all sources of ignition. Wear appropriate personal protective equipment as specified in Section 8. Isolate hazard area. Keep unnecessary and unprotected personnel from entering. Contain and recover liquid when possible. Use non-sparking tools and equipment. Collect liquid in an appropriate container or absorb with an inert material (e. g., vermiculite, dry sand, earth), and place in a chemical waste container. Do not use combustible materials, such as saw dust. Do not flush to sewer! If a leak or spill has not ignited, use water spray to disperse the vapors, to protect personnel attempting to stop leak, and to flush spills away from exposures. US Regulations (CERCLA) require reporting spills and releases to soil, water and air in excess of reportable quantities. The toll free number for the US Coast Guard National Response Center is (800) 424-8802.

J. T. Baker SOLUSORB® solvent adsorbent is recommended for spills of this product.

7. Handling and Storage

Protect against physical damage. Store in a cool, dry well-ventilated location, away from any area where the fire hazard may be acute. Outside or detached storage is preferred. Separate from incompatibles. Containers should be bonded and grounded for transfers to avoid static sparks. Storage and use areas should be No Smoking areas. Use non-sparking type tools and equipment, including explosion proof ventilation. Containers of this material may be hazardous when empty since they retain product residues (vapors, liquid); observe all warnings and precautions listed for the product.

8. Exposure Controls/Personal Protection

Airborne Exposure Limits:

-OSHA Permissible Exposure Limit (PEL): 200 ppm (TWA)

-ACGIH Threshold Limit Value (TLV):

200 ppm (TWA), 300 ppm (STEL)

Ventilation System:

A system of local and/or general exhaust is recommended to keep employee exposures below the Airborne Exposure Limits. Local exhaust ventilation is generally preferred because it can control the emissions of the contaminant at its source, preventing dispersion of it into the general work area. Please refer to the ACGIH document, *Industrial Ventilation, A Manual of Recommended Practices*, most recent edition, for details. Use explosion-proof equipment.

Personal Respirators (NIOSH Approved):

If the exposure limit is exceeded and engineering controls are not feasible, a full facepiece respirator with organic vapor cartridge may be worn up to 50 times the exposure limit or the maximum use concentration specified by the appropriate regulatory agency or respirator supplier, whichever is lowest. For emergencies or instances where the exposure levels are not known, use a full-facepiece positive-pressure, air-supplied respirator. WARNING: Air purifying respirators do not protect workers in oxygen-deficient atmospheres.

Skin Protection:

Wear impervious protective clothing, including boots, gloves, lab coat, apron or coveralls, as appropriate, to prevent skin contact. Butyl rubber is a suitable material for personal protective equipment.

Eye Protection:

Use chemical safety goggles and/or a full face shield where splashing is possible. Maintain eye wash fountain and quick-drench facilities in work area.

9. Physical and Chemical Properties

Appearance:

Clear, colorless liquid.

Odor:

Sharp mint-like odor. Solubility:

29 g in 100 g of water.

Specific Gravity: 0.81 @ 20C/4C

pH:

No information found.

% Volatiles by volume @ 21C (70F):

100

Boiling Point:

80C (176F)

Melting Point:

-86C (-123F)

Vapor Density (Air=1):

Vapor Pressure (mm Hg):

78 @ 20C (68F)

Evaporation Rate (BuAc=1):

2.7 (Ether = 1)

10. Stability and Reactivity

Stable under ordinary conditions of use and storage

Hazardous Decomposition Products:

Carbon dioxide and carbon monoxide may form when heated to decomposition.

Hazardous Polymerization:

Will not occur.

Incompatibilities:

Oxidizing materials, caustics, amines, ammonia, strong bases, chloroform, chlorosulfonic acid, oleum, potassium-t-butoxide, heat or flame, hydrogen peroxide, nitric acid. Can attack many plastics, resins and rubber.

Conditions to Avoid:

Heat, flames, ignition sources and incompatibles.

11. Toxicological Information

Toxicological Data:

Oral rat LD50: 2737 mg/kg; inhalation rat LC50: 23,500 mg/m3/8-hr; skin rabbit LD50: 6480 mg/kg; investigated as a mutagen, reproductive effector.

Reproductive Toxicity:

Has shown teratogenic effects in laboratory animals.

\Cancer Lists\			
	NTP	Carcinogen	
Ingredient	Known	Anticipated	IARC Category
Mathyl Ethyl Ketone 178-93-	3) No.	No	None

12. Ecological Information

Environmental Fate:

When released into the soil, this material may leach into groundwater. When released into the soil, this material may evaporate to a moderate extent. When released into water, this material may biodegrade to a moderate extent. When released into water, this material may evaporate to a moderate extent. When released into water, this material is expected to have a half-life between 10 and 30 days. This material is not expected to significantly bioaccumulate. When released into the air, this material is expected to be readily degraded by reaction with photochemically produced hydroxyl radicals. When released into the air, this material is expected to have a half-life between 1 and 10 days.

Environmental Toxicity:

This material is not expected to be toxic to aquatic life. The LC50/96-hour values for fish are over 100 mg/l.

13. Disposal Considerations

Whatever cannot be saved for recovery or recycling should be handled as hazardous waste and sent to a RCRA approved incinerator or disposed in a RCRA approved waste facility. Processing, use or contamination of this product may change the waste management options. State and local disposal regulations may differ from federal disposal regulations. Dispose of container and unused contents in accordance with federal, state and local requirements.

14. Transport Information

Domestic (Land, D.O.T.)

Proper Shipping Name: ETHYL METHYL KETONE

Hazard Class: 3 UN/NA: UN1193 Packing Group: II

Information reported for product/size: 366LB

International (Water, I.M.O.)

Proper Shipping Name: ETHYL METHYL KETONE

Hazard Class: 3 UN/NA: UN1193 Packing Group: II

Information reported for product/size: 366LB

15. Regulatory Information

F, Xi

R11 - Highly flammable

R36 - Irritating to eyes

R66 - Repeated exposure may cause skin drying or cracking

R67 - Vapours may cause drowsiness or dizziness

S2 - Keep out of the reach of children

S9 - Keep container in a well-ventilated place

S16 - Keep away from sources of ignition - No smoking

WHMIS:

This MSDS has been prepared according to the hazard criteria of the Controlled Products Regulations (CPR) and the MSDS contains all of the information required by the CPR.

16. Other Information

NFPA Ratings: Health: 1 Flammability: 3 Reactivity: 0

Label Hazard Warning:

DANGER! EXTREMELY FLAMMABLE LIQUID AND VAPOR. VAPOR MAY CAUSE FLASH FIRE. HARMFUL OR FATAL IF SWALLOWED. HARMFUL IF INHALED OR ABSORBED THROUGH SKIN. AFFECTS CENTRAL NERVOUS SYSTEM. CAUSES IRRITATION TO SKIN, EYES AND RESPIRATORY TRACT.

Label Precautions:

Keep away from heat, sparks and flame.

Keep container closed.

Use only with adequate ventilation.

Wash thoroughly after handling.

Avoid breathing vapor.

Avoid contact with eyes, skin and clothing.

Label First Aid:

Aspiration hazard. If swallowed, vomiting may occur spontaneously, but DO NOT INDUCE. If vomiting occurs, keep head below hips to prevent aspiration into lungs. Never give anything by mouth to an unconscious person. In case of contact, immediately flush eyes or skin with plenty of water for at least 15 minutes while removing contaminated clothing and shoes. Wash clothing before reuse. If inhaled, remove to fresh air. If not breathing, give artificial respiration. If breathing is difficult, give oxygen. In all cases, get medical attention.

Product Use:

Laboratory Reagent

June 26, 2009

Klaus,

After reconciling our book as of the end of April 2009 both CES Environmental and US Oil Recovery shows and agrees on the open balances. Anything CES Environmental and US Oil Recovery has done since May 01, 2009 isn't included in the balance owed by either party.

CES Environmental owes US Oil Recovery \$6,002.50 US Oil Recovery owes CES Environmental \$552.75

CES Environmental proposes instead of paying our base price on centrifuge oil we pay an additional \$0.05 per gallon on top of our base price until our balance is paid off. Any centrifuge oil loads US Oil Recovery owes CES Environmental will be subtracted from our balance. The price scale agreed between both CES Environmental and US Oil Recovery is as followed:

- >85% Oil US Oil Recovery to pay CES Environmental \$0.05/gallon (net oil contained)
 (US Oil Recovery puts towards our balance until our balance is paid off)
- 65% to 85%Oil No Charge to either US Oil Recovery or CES Environmental
- 50% to 65% Oil US Oil Recovery to charge CES Environmental \$0.05/gallon (CES Environmental pays an additional \$0.05 per gallon on top of base price until balance is paid off)
- <50% Oil US Oil Recovery to charge CES Environmental \$0.10/gallon (CES Environmental pays an additional \$0.05 per gallon on top of base price until balance is paid off)

CES Environmental is looking forward to getting our balance resolved with US Oil Recovery. Thank you for helping make this a smooth process and we looking forward to continue to do business with you.

Matt Bowman CES Environmental Services President / Owner

To: Matt Bowman Subject: RE:

Matt

Please find attached a reconciliation of the account as of January 31, 2009. The amount of the phenol surcharge from the City of Pasadena was my initial estimate. The actual number is higher, as shown on the spreadsheet. The City is not showing any interest in waiving the phenol surcharge, as we caused them an

upset twice, once in January and once in February and it resulted in them having a discharge violation for which they will be fined by the TCEQ. We will probably get another invoice for the fine.

Please call me so that we can settle up this matter.

Regards

Klaus

Subject: RE:

Klaus, in response I submit the following:

- 1) I never asked for high emulsion, high TOC, and high phenol wastewater. I merely asked that you not bring the pH back up at the end of the treatment process. That is why I was willing to waive the metals surcharges because I asked you not to bring the pH back up (which would have formed the insoluble metal hydroxides). Further, I assume you are just kidding about me trying to trick you????????
- 2) CES uses phenol test strips to test our wastewater and must assume that what registers on the strips is actually phenol (in lieu of interference). CES handles all wastewaters which fail this test as high phenol containing water and requires significant additional treatment costs. Additionally, we were not supposed to have received back any of the water that we originally sent to you due to odor concerns (otherwise why ship it to you?). Finally, PACES never shipped you anything with phenols until Jan. 10th so we could not have been receiving high phenol containing wastewater the original source of which was PACES.
- 3) Same answer as 2) above
- 4) There were twenty nine loads that you sent to CES after the phenol problem occurred. For this, you have already been issued credit (see my February 10th email in the below string).

Please let me know when you hear back from the City of Pasadena concerning the phenol surcharge. Once this has been determined, we will probably need to meet face to face in order to agree on a final resolution. In the meantime, I will allow my product manager to begin re-shipping the oil at a credit to CES of \$.05/gallon.

To: Matt Bowman **Subject:** RE:

Matt

Your assessment of penalties is not acceptable for the following reasons:

- 1) You insisted of having unprocessed rather than processed water, that is why the material had emulsions and metals. I preferred to send processed water. Were you trying to trick me?
- 2) The phenol is your own phenol that you shipped to us. No other customer shipped phenol to us
- 3) The phenol in our discharge started showing up the day you started shipping in December
- 4) The only reason we had to ship water to you is because of the phenol containing waste you shipped to us, so why should I pay for any disposal?

I am presently negotiating with the City of Pasadena to have the phenol penalty waived. If I am successful I will pass that saving on to you, but this will take time.

In the interim I am prepared to receive your oil and credit 5 cents per gallon of oil contained against your account with us. We can also receive water on a COD basis.

I will let you know how things work out with the City of Pasadena and we can table resolving this until then.

Regards

Klaus

Subject: RE: a trade

Klaus,

I have gone through our records and come up with the following surcharges:

10 loads with high phenol and high TOC with total surcharges at \$.16/gallon (est. 5,000 gallons per load) = \$8,000

4 loads with only emulsion surcharges at \$.14/gallon (est. 5,000 gallons per load) = \$2,800

5 loads with both emulsion and phenol surcharges at \$.24/gallon (est. 5,000 gallons per load) = \$6,000

10 loads with both emulsion and TOC surcharges at \$.20/gallon (est. 5,000 gallons per load) = \$10,000

1 load with phenol and TOC surcharges at \$.16/gallon (est. 5,000 gallons per load) = \$800

1 load with high TOC surcharge at \$.06/gallon (est. 5,000 gallons per load) = \$300

*Note: There are several surcharges for high metals that have not been included

*Note: I have given you a significant discount on the phenol surcharges

*Note: Gallons for each load were approximated at 5,000 gallons each

Total for all surcharges (not including high metals / zinc) = \$27,900

This would show that CES would owe you an approximate balance of \$7,100.

I would propose that instead of CES continue to receive credit on the centrifuge oil of \$.05/gallon, that we pay you \$.05/gallon (a \$.10/gallon swing) until this balance is paid off. Estimating 5,000 gallons per load, this would equate to about 15 loads.

Please let me know if you are amenable to this arrangement.

Thanks, Matt

Subject: RE: a trade

Klaus,

If I am interpreting this information correctly, it appears as though CES currently has billed you \$25,542.68. US Oil has invoiced CES \$10,237.08. Leaving everything else out, this would mean that US Oil would owe CES \$15,305.60.

However, you claim that US Oil has been billed a phenol surcharge of \$24,175 in December and \$25,677 in January. To address this, CES is willing to consider that it conceivably could be accountable for the phenol surcharges in January. However, we will not even consider accepting responsibility for any surcharges in December since we are certain that no phenol containing wastewater was sent until Jan. 10th. We have researched our processing records and have nailed down 4 loads sent on December 10th that could have caused the problem (*Note: see Access trans. Job list, Krissy's spreadsheet for Dec. 08, and Access sulfidic

processing records for Jan.). This being the case, there could have only been 29 loads that you sent to us that were due to your being out of operation due to phenol issues. Your transportation and disposal fees for this would amount to \$20,300. You also mention \$5,000 in lost revenues. This would mean that you would need to bill CES an additional \$50,977.

Confirming the above agreement, the balance of this money at this point would be that CES would owe you approximately \$35,000.

I need to go back and look at the wastewater loads we received. I know that most of them we bad emulsions and/or had a very high TOC. This could amount to as much as \$20,000 in surcharges that we did not yet charge you. I will need to go back and review this information. Also, I think that many of the loads we received were either late or on weekends (overtime hours). This would also need to be reviewed as it could result in significant charges. Let me review this information today and get back with you on a total for money CES has not yet billed.

Subject: RE: a trade

Matt

We have finalized the reconciliation, as follows

Amounts invoiced by CES to USOR

Oil Sales \$4,399.27 (agrees with CES invoices)
Water Disposal \$21,143.41 (agrees with CES invoices)

Amounts invoiced by USOR to CES

Water Disposal \$10,237.08 (invoices will be faxed to you shortly)

Phenol Surcharge December \$24,175 Phenol Surcharge January \$25,677

As mentioned in my prior mail we also need to address the following

USOR lost revenue due to Phenol shut down

Water Disposal cost of USOR to CES due to Phenol Shut Down of

Trucking Cost of USOR trucks to CES due to Phenol Shut Down (\$300 per load X 46 loads)

\$13,800.00

Please call me to discuss how to resolve this matter.
Regards
Klaus
From: klaus genssler [mailto:klaus.genssler@modularpc.com] Sent: Friday, February 06, 2009 5:40 PM To: 'Matt Bowman' Subject: RE: a trade
Matt
We did not receive from your accounting group the documentation that we requested.
The issues to be resolved are as follows:
 Disposal cost for USOR loads at CES during December and January due to City Pasadena shut off for CES phenol Trucking cost related to above Phenol Penalty from City of Pasadena. I have yet to receive the January data.
I am sure we will be able to sort this out and reach an agreement by middle of the week.
In the interim you can start shipping loads of oil and we will pay 5 cents per gallon. Unfortunately I am hearing a lot of bad rumors about the financial condition of CES. My bank requested that we require due to that COD for receipt of water.

Matt

We are in the process of doing our own account reconciliation. I should be able to send you a response later today.

As I mentioned the City of Pasadena has invoiced us a Phenol penalty of \$24,175 for December and it appears we will have additional phenol penalty related to your wastewater in January. Also due to our shut down from the City of Pasadena we were forced to ship water to you and one day lost about \$5,000 in revenue for customer trucks that went to you and LES.

Lam sure we will work this out.

Regards

Klaus

Cc: Juanita Thomas; Greg Bowman; Ryan Thomas; Kim Harmon; Brian Weathers

Subject: a trade

Klaus,

As of today, I am showing that we should owe you approximately 9,500 dollars (although I have not seen any bills). I also show that we have about \$25,000 dollars on our books that you owe us. As a trade off for a problem we may have caused you, I am willing to do the following until the approximate \$15,000 difference is paid off:

Instead of charging you \$.05/gallon for the slop oil we have been sending you, we will pay you \$.05/gallon for receiving this same slop oil. This is a \$.10/gallon swing. This means that we need to send you about another 150,000 gallons of this material (or about 30 trailer loads).

Please let me know if this is acceptable to you so that we can continue sending you the oil.

Also, I am attaching the phenol test on the 12,000 bbl tank of material we are running at Port Arthur. As you can see, the phenol levels are almost non-existent. We would like to begin sending you this water next week (at least 2 loads per day).

Thanks,

Matt

Standard Operating Procedure

THINK USE GOOD JUDGMENT	CES Environmental Services, Inc.	<u>YOUR</u> <u>ATTITUDE</u> <u>COUNTS</u>
Date Issued: <u>10/07/2008</u>	DEPARTMENT(S): -Operations -Processing -Transportation -Tank Wash -Maintenance and Field Services -Sales, Finance, and Administration	Revised Date: <u>00/00/0000</u>
Policy Number: <u>08-063</u>	SOP Title: Odor Flags for Trailers, Roll- Off Boxes, and Frac Tanks	SOP Description: Defines the method for identifying odorous loads on CES Environmental Services, Inc. Property.

This <u>Standard Operating Procedure (SOP)</u> outlines the procedures that should be followed for odorous loads in Trailers, Roll-Off Boxes, and Frac Tanks while on **CES Environmental Services, Inc.** <u>Property.</u>

1 Purpose

The purpose of this <u>SOP</u> focuses on **CES Environmental Services, Inc.** commitment to control odor on the <u>Property</u> by identifying odorous loads that are contained in Trailers, Roll-Off Boxes, and Frac Tanks using an Orange Bicycle Flag.

Therefore, it is imperative that all **CES Environmental Services, Inc. Employees** follow this <u>SOP</u>.

2 General Information

The **Main Processing Facility Laboratory** will have all <u>Orange Bicycle Flags</u> and the **Tank Wash Office** will have all <u>Orange Bicycle Flags</u> with the letters <u>TW</u> on both sides.

All <u>Orange Bicycle Flags</u> will be affixed to the front of Trailers using a clamp and will be affixed to Roll-Off Boxes and Frac Tanks using a magnet.

PROPRIETARY and CONFIDENTIAL Property of CES Environmental Services, Inc.

3 Procedures

When the **Main Processing Facility Laboratory** receives a <u>Bill of Lading</u> and/or a <u>Manifest</u> from a **Driver** then the following steps should be performed:

- 1. The **Laboratory Technician** will review the <u>Bill of Lading</u> and/or <u>Manifest</u> and determine if this load could potentially be odorous.
- 2. If the Laboratory Technician determines the load is odorous then the Laboratory Technician will give an Orange Bicycle Flag to the Drum Processing Technician or Wastewater Processing Technician before sampling the Trailer, Roll-Off Box or Frac Tank. Reference Standard Operating Procedures on Odor Management-Sampling Odorous Materials, on Shipping and Receiving Loads-Sample Management (Main Processing Facility Laboratory), and on Shipping and Receiving Loads-Receiving Loads (Main Processing Facility Laboratory).
- 3. The **Drum Processing Technician** or **Wastewater Processing Technician** will attach the <u>Orange Bicycle Flag</u> to the Trailer, Roll-Off Box or Frac Tank appropriately and tell the **Driver** to park the Trailer, Roll-Off Box or Frac Tank across from the **Tank Wash** and adjacent to the **Motor Oil Facility** off of the <u>Wayland Street Fence</u>.
 - The <u>Orange Bicycle Flag</u> will stay on the Trailer, Roll-Off Box or Frac Tank until it is ready to leave **CES Environmental Services**, Inc. Property.
- When the Trailer, Roll-Off Box or Frac Tank is scheduled to leave CES Environmental Services, Inc. Property then the Driver will remove the Orange Bicycle Flag and return it to the Main Processing Facility Laboratory. Reference Standard Operating Procedure on Shipping and Receiving Loads-Shipping Loads (Main Processing Facility Laboratory).

When the **Tank Wash Office** receives a <u>Bill of Lading</u>, <u>Manifest</u> or <u>Material Safety</u> <u>Data Sheet (MSDS)</u> from a **Driver** then the following steps should be performed:

- 1. The **Tank Wash Supervisor** will review the <u>Bill of Lading</u>, <u>Manifest</u>, and/or <u>MSDS</u> and determine if this load could potentially be odorous. Reference Standard Operating Procedure on <u>Flow of Essential Operating Paperwork</u> (<u>Tank Wash Only</u>).
- 2. If the Tank Wash Supervisor determines the load is odorous then the Tank Wash Supervisor will attach the Orange Bicycle Flag with the letters TW on both sides to the Trailer, Roll-Off Box or Frac Tank appropriately and tell the Driver to park the Trailer, Roll-Off Box or Frac Tank across from the Tank Wash and adjacent to the Motor Oil Facility off of the Wayland Street Fence.

PROPRIETARY and CONFIDENTIAL Property of CES Environmental Services, Inc.

The <u>Orange Bicycle Flag</u> will stay on the Trailer, Roll-Off Box or Frac Tank until it is cleaned.

3. When the Trailer, Roll-Off Box or Frac Tank is cleaned then the **Tank Cleaner** will remove the <u>Orange Bicycle Flag</u> with the letter <u>TW</u> on both sides and return it to the **Tank Wash Office**. Reference Standard Operating Procedure on <u>Odor Management-Cleaning Tanks</u>.

Note: All <u>Orange Bicycle Flags</u> must stay on CES Environmental Services, Inc. <u>Property</u> at all times.

PC

WASTE PACKAGING REQUIREMENTS

FOR HAZARDOUS AND NON-HAZARDOUS WASTES

Outside of container is free from liquid or dried residues. Any spilled material must be removed from container prior to shipment.

Container side and top are free from residue, liquid, sludge, or dried waste, and container must be in good condition.

Information on hazardous waste label and DOT diamond must correspond.

Drum is in good condition with no distortion, holes, or dents.

Drum top is in good condition with a tight fit of lid to drum. Proper fit of the lid provides safe handling with common freight moving equipment.

Bolt on ring must be in down position with nut aligned correctly. Bolt must be the appropriate size per manufacturers testing.

Container top and sides are free from any waste material. Only dry solids may be shipped in cubic yard boxes. Boxes should be in good condition and of good integrity.

Waste residue on container outside is unacceptable.

Waste residue on container outside is unacceptable.

Drums cannot be transported with rust, holes, dents, creases, cracks, or distortion that would compromise the integrity of the container. Possible leakage or spilling could occur.

Container top, sides, or bottom bulging > 1/2 inch above flange level is not acceptable. Bulging indicates pressure or possible overfilling of the container.

Bolt in up position is unacceptable for transport. Bolt may cause damage to other containers or injury to personnel.

Any waste other than dry solids is unacceptable for transport in boxes unless specific packaging allows for liquids. Possible leakage or sloshing could occur in non-specific boxes.

NOTE: It is PCI's policy that all non-hazardous containers reflect the same conditions as above.

In part, regulations require that "each package used for shipment of hazardous materials be ... maintained, filled, its contents limited, and closed so that under conditions normally incident to transportation... there will be no identifiable (without use of instruments) release of hazardous materials to the environment." DOT Regulation HM215E states in part, "there may be no hazardous material residue adhering to the outside of the package during transport." Waste containers offered for shipment must be clean and undamaged. Dented containers with waste or waste residues on the outside of the container may require overpacking or other special handling for compliance.

SHIPPED FROM:	CES Profile #
CES Environmental Services, Inc.	11a)
4904 Griggs Rd	11b)
Houston, TX 77021	11c)
(713) 676-1460	11c)

The property described below, in apparent good order, except as noted (content and condition of packages unknown), marked, consigned, and destined as indicated below, which said carrier (the word carrier being understood throughout this as meaning any person or corporation authorized to be in possession of the property under the contract) agrees to carry to its unusual place of delivery at said destination, if on its route, otherwise to deliver to another carrier on the route to said destination. This Bill of Lading is a receipt for goods; it is not of itself a contract of carriage it is mutually agreed, as to each carrier of all or as to any said over all or any portion of said route to destination, and as to each party at any time interested in all or any of said property, that every service to be performed hereunder shall be subject to all the terms and conditions contained in the applicable contract between shipper and carrier or intermediary.

For payment: Charges to be billed to Shipper or the "Billed to" party are set forth in the governing contract with Shipper. No charges other than those contained therein may be billed to Shipper or the "Billed to" party without prior written consent of Shipper. The extra copy of this Bill of Lading, furnished at the time of shipment, must be attached to the freight bill submitted to Shipper or the "Billed to" party and sent to:

Original – Shipper Provided Sho	rt Form Straight Bill of Lading – Not Negotiable – Domestic
SHIPPED FROM:	CES Profile #
VAM-USA	11a) 2296
19210 Hardy Road	11b) 2295 —
Houston, TX 77073	11c) 2295 -
(281) 230-5747	11c) (16-7

The property described below, in apparent good order, except as noted (content and condition of packages unknown), marked, consigned, and destined as indicated below, which said carrier (the word carrier being understood throughout this as meaning any person or corporation authorized to be in possession of the property under the contract) agrees to carry to its unusual place of delivery at said destination, if on its route, otherwise to deliver to another carrier on the route to said destination. This Bill of Lading is a receipt for goods; it is not of itself a contract of carriage, it is mutually agreed, as to each carrier of all or as to any said over all or any portion of said route to destination, and as to each party at any time interested in all or any of said property, that every service to be performed hereunder shall be subject to all the terms and conditions contained in the applicable contract between shipper and carrier or intermediary.

For payment: Charges to be billed to Shipper or the "Billed to" party are set forth in the governing contract with Shipper. No charges other than those contained therein may be billed to Shipper or the "Billed to" party without prior written consent of Shipper. The extra copy of this Bill of Lading, furnished at the time of shipment, must be attached to the freight bill submitted to Shipper or the "Billed to" party and sent to:

CONSIGNED TO:

CES Environmental Services, Inc.

#### CES Environmental Services, Inc. 4904 Griggs Rd. Houston, TX 77021 Phone (713) 676-1460 Fax (713) 676-1676

March 10, 2008

CES Environmental Services, Inc. 4904 Griggs Rd Houston, TX 77021

To Whom It May Concern:

This letter is in reference to EPA waste manifest numbers 002160012 JJK (Shipped 07/26/07). Please make the following adjustments:

1. Please change the waste code number in section 13-1 of the manifest to reflect 0001403H.

Copies of this letter will be sent and kept on file at the following:

- A. The Generator (Shawcor Pipe Protection)
- B. The Transporter (CES Environmental Services)
- C. The Receiving Facility (US Ecology)
- D. The TCEQ

If you have any questions regarding this matter, please call Dan Bowman at 713-676-1460.

**Thanks** 

Dan Bowman Agent for Pathfinder Energy

_	Port Arthur. A partial PO was made
	For the Cubic yard boxes because we
	did not know the weights on the
	other drums. This Po needed to be
	adjusted anyway as cy boxes are 80/en
	to trans. Drums are \$25.00. I will
	get w/ you on the other manifest.
	I need to show your guys how to
	Fill them out when you load the truck.
	Call w/questions.

Bill Of Lading #:

33326

Folder ID :	Emply RCRA drums			
Original - Shi	ipper Provided Short Form Straig	ght Bill of Lading – Not Negotiable – Domesti	C	
SHIPPED F	ROM:	US Ecology#		
Shawcor Pip	pe Protection.	11a)		
8200 Yacht	Club Dr, Suite B	11b)		
Port Arthur	, TX 77642	11c)		
		11c)	Λ.	

The property described below, in apparent good order, except as noted (content and condition of packages unknown), marked, consigned, and destined as indicated below, which said carrier (the word carrier being understood throughout this as meaning any person or corporation authorized to be in possession of the property under the contract) agrees to carry to its unusual place of delivery at said destination, if on its route, otherwise to deliver to another carrier on the route to said destination. This fill of Lading is a receipt for goods, it is not of itself a contract of carriage. It is mutually agreed, as to each carrier of all or as to any said over all or any portion of said route to destination, and as to each party at any interested in all or any of said property, that every service to be performed hereunder shall be subject to all the terms and conditions contained in the applicable contract between shipper and carrier or intermediary.

For payment: Charges to be billed to Shipper or the "Billed to" party are set forth in the governing contract with Shipper. No charges other than those contained therein may be billed to Shipper or the "Billed to" party without prior written consent of Shipper. The extra copy of this Bill of Lading, furnished at the time of shipment, must be attached to the freight bill submitted to Shipper or the "Billed to" party and sent to:

**CONSIGNED TO:** 

**Shawcor Pipe Protection** 

4501 Knapp Road

Pearland, TX 77511

**CARRIER:** 

CES Environmental Services, Inc.

4904 Griggs Rd.

Houston, TX 77021

This is to certify that the product stated below are properly classified, described, packaged, marked and labeled and is in proper condition for transportation according to the applicable regulations of the Department of Transportation. If this Shipment moves between to ports by a carrier by water, the law requires that the Bill of Lading shall state whether It is "carrier's or shipper's weight."

intermodal Certificate: All Information required by Federal Highway Administration regulations at 49 CFR 390.54© implementing the intermodal 8afe Container Act of 1992 is set forth on the face of this bill of lading. The shipper name herein is the tendering party.

2003-Jul-22

Product Identity

PUR-Flush 100

Product Code Number

J139

**Product Use** 

Flushing Solvent

Version #

2.0

CAS#

Mixture

### 2 Composition / Information on Ingredients

•	·			Exposure Limits	
Ingredient Name	CAS Number	Wgt. %	PEL-OSHA	TLV-ACGIH	Carcinogen
2-PROPANOL, 1-BUTOXY-	5131-66-8	10 - 30	Not Established	Not Established	No
Non-hazardous and other ingredients below reportable levels	Proprietary	80	N/AP	N/AP	NAP

### 3 Hazards Identification

#### Potential Health Effects

Skin

This product may cause irritation to the skin.

Eyes

This product may cause irritation to the eyes. Symptoms include itching, burning, redness

and tearing.

Inhalation

Excessive inhalation of this material causes headache, dizziness, nausea and

incoordination.

Ingestion

Ingestion of this product may cause nausea, vomiting and diarrhea.

#### 4 First Aid Measures

First Aid

Skin

Immediately take off all contaminated clothing. For skin contact, wash immediately with soap

and water. If irritation persists, get medical attention.

Eves

Immediately flush eyes with plenty of water for at least 15 minutes. Get medical attention or

advice.

Inhalation

Move person to fresh air. If not breathing, give artificial respiration, preferably mouth-to-mouth

If breathing is difficult, give oxygen. Seek medical attention.

Ingestion

If the material is swallowed, get immediate medical attention or advice -- Give several

glasses of water or milk.

### 5 Fire Fighting Measures

#### **Hazardous Combustion Products**

Carbon monoxide, carbon dioxide and other hydrocarbon fragments.

#### Extinguishing Media

Alcohol foam. Carbon dioxide, dry chemical or water.

#### General Fire Hazards

Vapors are heavier than air and may travel along the ground to some distant source of ignition and flash back.

#### Fire Fighting Equipment/Instructions

Wear full protective clothing, including helmet, self-contained positive pressure or pressure demand breathing apparatus, protective clothing and face mask.

Flash Point

150 °F Lowest Flashing

CC

**Auto Ignition** 

Component > 459 °F

#### 6 Accidental Release Measures

#### **Containment Procedures**

Eliminate sources of ignition. Stop the flow of material, if this is without risk. Dike the spilled material, where this is possible. Absorb with inert absorbent such as dry clay, sand or diatomaceous earth, commercial sorbents, or recover using pumps.

#### Clean-Up Procedures

Shovel the material into waste container.

# 7 Handling and Storage

#### Handling Procedures

Avoid prolonged or repealed skin contact with this material.

#### Storage Procedures

Keep the container tightly closed and in a cool, well-ventilated place. Manufacturer recommends storing above 15 °C/ 60 °F. Do not freeze.

### 8 Exposure Controls / Personal Protection

Material Name PUR-FLUSH 100

Print Date 22-Jul-2003

Carmen Magana

#### **Engineering Controls**

Use general ventilation and use local exhaust, where possible, in confined or enclosed spaces.

#### Personal Protective Equipment

#### Eyes/Face

Wear safety glasses; chemical goggles (if splashing is possible).

#### Skin

Use impervious gloves. Normal work clothing (long sleeved shirts and long pants) is recommended.

#### Respiratory

Not normally needed. No exposure limits have been established for this product. When dusts or thermal processing fumes are generated and ventilation is not sufficient to effectively remove them, appropriate NIOSH/MSHA approved respiratory protection (organic vapors) should be provided.

#### General

Eye wash fountain and emergency showers are recommended. Use good industrial hygiene practices in handling this material.

### 9 Physical & Chemical Properties

**Boiling Point** 

> 340 °F

**Specific Gravity** 

0.88

Vapor Pressure

< 1 mmHg

**Evaporation Rate** 

Slower than water

Solubility (H2O)

< 10 %

VOC

< 1.5 lbs/gal

Freezing Point

> 5 °C

# 10 Chemical Stability & Reactivity Information

#### Chemical Stability

Stable under normal conditions.

#### Hazardous Decomposition

Hazardous combustion products may include carbon monoxide, carbon dioxide and hydrocarbon fragments.

#### Hazardous Polymerization

Will not occur.

#### Incompatibility

This product may react with oxidizing agents. This product reacts with acids.

## 11 Toxicological Information

Oral LD50 Rat

16.5 g/kg body weight

Jan 05.07 08:27a Carmen Magana 281-485-2657 p.16

#### Toxicological Information

This material is practically non-toxic. Mutagenicity: In vitro mutagenicity studies were negative. Values listed are composite values based on the toxicity data from the raw materials used in this product. The listed value is a minimum value; actual data may produce a higher value. In other words, test data may show that this product is less toxic than indicated, but never more toxic.

#### Carcinogenicity

Not listed by ACGIH, IARC, NIOSH, NTP OR OSHA.

### 12 Ecological Information

#### **Ecological Information**

Movement & Partitioning: Bioconcentration potential is low (less than 100). Degradation & Persistence: Theoretical oxygen demand is calculated to be less than 1.0 p/p. Material is readily biodegradable. Ecotoxicity: Material is practically non-toxic to aquatic organisms on an acute basis.

### 13 Disposal Considerations

#### Disposal Instructions

Dispose of waste material according to Local, State, Federal, and Provincial Environmental Regulations.

### 14 Transportation Information

#### General

This product is not regulated as a hazardous material by the United States (DOT) or Canadian (TDG) transportation regulations.

#### **US DOT HMR Information**

**Proper Shipping Name** 

Not Regulated

# 15 Regulatory Information

#### **US Federal Regulations**

All components are on the U.S. EPA TSCA Inventory List.

#### International Regulations

This product has been classified in accordance with the hazard criteria of the Controlled Products Regulations (CPR) and this MSDS contains all the information required by the CPR.

#### 16 Other Information

#### Disclaimer

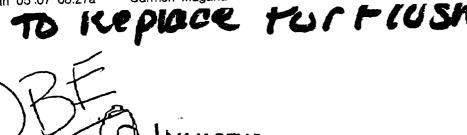

NOTICE: The information presented herein is based on data considered to be accurate as of the date of preparation of this Material Safety Data Sheet. However, MSDS may not be used as a commercial specification sheet of manufacturer or seller, and no warranty or representation, expressed or implied, is made as to the accuracy or comprehensiveness of the foregoing data and safety information, nor is any authorization given or implied to practice any patented invention without a license. In addition, no responsibility can be assumed by vendor for any damage or injury resulting from abnormal use, from any failure to adhere to recommended practices, or from any hazards inherent in the nature of the product.

III. Hazardous Identification:							
Hazard Category:  X Acute	Chronic _	Fire		Press	ure		Reactive

#### Hazardous Identification Information:

Warning!

Pigmented liquid with a low odor.

Contact may cause skin and eye iritation.

Incompatible with strong oxidizers.

The material contains a mercury catalyst. Due to the chronic toxicity of organomercury compounds, careful handling of this material is required.

#### IV. First Aid Measures:

#### Route(s) of Entry:

Inhalation, Ingestion, Skin and Eye contact.

#### Health Hazards (Acute and Chronic):

Acute (Short-Term)

Contact may cause skin and eye irritation.

#### Chronic (Delayed)

On the basis of available information, exposure to this product is not expected to produce any significant adverse human health effects when the recommended safety precautions are followed.

#### Signs and Symptoms:

Skin and eye imitation.

# MSDS - Material Safety Data Sheet

Product Name:

HYPERLAST 2851239

MSDS No.: 342508

#### Medical Conditions Generally Aggravated by Exposure:

None known

#### Emergency and First Aid Procedures:

SKIN CONTACT: Remove contaminated dothing and wash affected area with isopropyl alcohol followed by soap and water.

EYE CONTACT: Flush eyes with water for at least 15 minutes and contact a physician.

INGESTION: Do NOT induce vorniting. Take 1-2 glasses of water and contact a physician. Do not give anything by mouth to an unconscious person.

NHALATION: Remove person to fresh air. If person is not breathing give mouth-to-mouth resuscitation and contact a physician. Other Health Warnings:

This material contains a mercury catalyst. Due to the chronic toxicity of organomercury compounds, careful handling of this material is required.

Wash hands thoroughly after handling this material, before eating, smoking, etc.

#### V. Fire Fighting Measures:

Flash Point

>230°F

Lower Explosive Limit

NE

Upper Explosive Limit

NE

Fire Extinguishing Media:

Foam, water fog, carbon dioxide or dry chemical extinguishers.

#### Special Fire Fighting Procedures:

Firefighters should wear a self-contained breathing apparatus and protective clothing to guard against incompletely combusted carbon products.

#### Unusual Fire and Explosion:

None known

#### VI. Accidental Release Measures:

#### Steps to be Taken in Case Material is Released or Spilled:

Cover liquid with an absorbent material (sawdust, vermiculite or wet sand). After the material is absorbed scoop up and place in containers for disposal.

#### VII. Handling and Storage:

#### Precautions to be Taken:

Store in a cool, dry place in tightly sealed containers. Protect from heat and moisture contamination.

#### Other Precautions

Avoid contact with skin and eyes. Avoid ingestion.

#### VIII. Exposure Controls/Personal Protection:

#### Ventilitation Requirements:

Local Exhaust Provide mechanical (general) and/or local exhaust ventilation to control airborne levels.

#### Personal Protective Equipment

RESPIRATORY PROTECTION: None needed at normal temperatures. Use a self-contained breathing apparatus under emergency conditions,

PROTECTIVE GLOVES: Impervious rubber gloves.

EYE PROTECTION: Wear safety glasses or goggles.

OTHER PROTECTIVE CLOTHING OR EQUIPMENT: An apron or suitable clothing to prevent skin contact.

#### Section 3. Hazards Identification

This material is classified as hazardous under OSHA Hazard Communication Standard (29 CFR 1910.1200).

Physical State and

Liquid.

Appearance

Color

Liquid

Yellow. (Light.)

Emergency Overview

Reacts slowly with water to produce carbon dioxide which may rupture closed containers. This

reaction accelerates at higher temperatures.

Inhalation at levels above the occupational exposure limit could cause respiratory sensitization and risk of serious damage to respiratory system. The onset of the respiratory symptoms may be delayed for several hours after exposure. A hyper-reactive response to even minimal concentrations of

diisocyanates may develop in sensitized persons.

Potential Acute Health

**Effects** 

Eyes Hazardous in case of eye contact (irritant).

Skin Hazardous in case of skin contact (irritant, sensitizer). Skin inflammation is characterized by itching, scaling or reddening.

^{*} Occupational Exposure Limit(s), if available, are listed in section 8

Page: 2/8

inhalation (lung irritant,lung sensitizer).

Ingestion Slightly hazardous in case of ingestion.

**Medical Conditions** 

May cause or aggravate dermititis and asthma.

Aggravated by Overexposure:

GENERAL INFORMATION Read the entire MSDS for a more thorough evaluation of the hazards.

#### Section 4. First Aid Measures

**Eye Contact** Immediately flush eyes with running water for at least 15 minutes, keeping eyelids open. Seek

immediate medical attention.

Skin Contact Remove contaminated clothing. After contact with skin, wash immediately with plenty of warm soapy

> water. If symptoms develop, obtain medical attention. Contaminated clothing should be thoroughly cleaned. An MDI study has demonstrated that a polyglycol-based skin cleanser or corn oil may be

more effective than soap and water.

Inhalation Remove patient from exposure, keep warm and at rest. Obtain immediate medical attention.

> Treatment is symptomatic for primary irritation or bronchospasm. If breathing is labored, oxygen should be given by administered by qualified personnel. Apply artificial respiration if breathing has

ceased or shows signs of failing.

Ingestion Do not induce vomiting. Provided the patient is conscious, wash out mouth with water. Obtain

immediate medical attention.

Notes to Physician Symptomatic and supportive therapy as needed. Following severe exposure medical follow-up should

be monitored for at least 48 hours.

#### Section 5. Fire Fighting Measures

Carbon Monoxide, Carbon Dioxide, Nitrous Oxide and HCN.

Five Hazards in Presence of

Slightly flammable to flammable in presence of open flames, sparks and static discharge or combustible materials

Various Substances

Fire Fighting Media

and lastructions

SMALL FIRE: Use DRY chemical powder.

LARGE FIRE: Use water spray, fog or foam. Do not use water jet.

Protective Clathing (Fire)

Splash goggles. Full suit. Boots. Gloves. A self-contained breathing apparatus should be used to

avoid inhalation of the product.

Page: 3/8

Special Remarks on Fire Hazards Reacts slowly with water to produce carbon dioxide which may rupture closed containers. This reaction accelerates at higher temperatures.

#### Section 6. Accidental Release Measures

Per major spills call Chemtrec (300-424-9300).

Small Spill and Leak

Clean-up should only be performed by trained personnel. People dealing with major spillages should wear full protective clothing including appropriate respiratory protection. Evacuate the area, Prevent further leakage, spillage or entry into drains.

Large Spill and Leak

Contain and absorb large spillages onto an inert, non-flammable adsorbent carrier (such as earth or sand). Shovel into open-top drums or plastic bags for further decontamination, if necessary. Wash the spillage area clean with liquid decontaminant. Test atmosphere for MDI. Neutralize small spillages with decontaminant. Remove and properly dispose of residues. (See Section 13 for disposal considerations.) Notify applicable government authorities if release is reportable. The CERCLA RQ for 4,4-MDI is 5,000 lbs (see CERCLA in Section 15).

Decontaminant

Preparation of Decontamination Solution: Prepare a decontamination solution of 0.2-0.5% liquid detergent and 3-8% concentrated ammonium hydroxide in water (5-10% sodium carbonate may be substituted for the ammonium hydroxide). Follow the precautions on the supplier's material safety data sheets when preparing and using solution. Use of Decontamination Solution: Allow deactivated material to stand for at least 30 minutes before shoveling into drums. Do not tighten the bungs. Mixing with wet earth is also effective, but slower.

#### Section 7. Handling and Storage

Handling

Avoid personal contact with the product or reaction mixture. Use only with adequate ventilation to ensure that the occupational exposure limit is not exceeded. The efficiency of the ventilation system must be monitored regularly because of the possibility of blockage. Avoid breathing aerosols, mists and vapors. (See Section 8--Exposure Control for details.)

Storage

Keep containers properly sealed and when stored indoors, in a well ventilated area. Keep contents away from moisture. Due to reaction with water, producing CO2-gas, a hazardous build-up of pressure could result if contaminated containers are re-sealed. Do not reseal contaminated containers. Uncontaminated containers, free of moisture, may be resealed only after placing under a nitrogen blanket. Do not store in containers made of copper, copper alloys or galvanized surfaces.

Ideal storage temperature is 16-38°C (60-100°F).

Keep stocks of decontaminant (See Section 6) readily available.

#### Section 8. Exposure Controls, Personal Protection

Preventive Measures

Conditions of use, adequacy of engineering or other control measures, and actual exposures will dictate the need for specific protective devices at your workplace.

Engineering Controls

Use local exhaust ventilation to maintain airborne concentrations below the TLV. Suitable respiratory equipment should be used in cases of insufficient ventilation or where operational procedures demand it. For guidance on engineering control measures refer to publications such as the ACGIH current edition of 'Industrial Ventilation, a manual of Recommended Practice.'

Personal Protection

Page: 4/8

Exa Chemical safety goggles. If there is a potential for splashing, use a full face shield.

Beily and Hands The following protective materials are recommended: Gloves - neoprene, nitrile rubber, butyl rubber.

Thin latex disposable gloves should be avoided for repeated or long term, use. Protective clothing should be selected and used in accordance, with 'Guidelines for the Selection of Chemical Protective Clothing' published by ACGIH.

Respiratory When the product is sprayed or heated without adequate ventilation, an approved MSHA/NIOSH positive-pressure, supplied-air respirator may be required. Air purifying respirators equipped with organic vapor cartridges and a HEPA (P100) particulate filter may be used under certain conditions when a cartridge change-out schedule has been developed in accordance with the OSHA respiratory protection standard (29 C.F.R. 1910.134).

Protective Clothing (Pictograms)

Personal Protection in Case of Splash goggles. Full suit. Vapor respirator or a self-contained breathing apparatus. Boots. Gloves, a Large Spill Suggested protective clothing might not be sufficient; consult a specialist BEFORE handling this product.

Product Name

4.4-Diphenylmethane Diisocyanate

**Exposure Cimits** 

ACGIH TLV OSHA PEL Ceiling Limit NIOSH REL/TWA NIOSH REL/CEILING 0.05 mg/m3 (8-hour,40 hours/week) 0.20 mg/m3 0.05 mg/m3 (10-hour,40 hours/week) 0.20 mg/m3 (10-minule)

Exposure controls/personal protection

Medical supervision of all employees who handle or come in contact with respiratory sensitizers is recommended. Persons with respiratory problems including asthmatic-type conditions, chronic bronchitis, other chronic respiratory diseases or recurrent skin eczema or skin allergies should be evaluated for their suitability of working with this product. Once a person is diagnosed as sensitized, no further exposure to the material that caused the sensitization should be permitted. The Occupational Exposure limits do not apply to previously sensitised individuals.

Polymerization may occur at elevated temperatures in the presence of alkalies, tertiary amines and

metal compounds.

#### Section 11. Toxicological Information

Toxicity to Animals

LD50 Rat Oral: >5000 mg/kg LD50 Rabbit Dermal: >5000 mg/kg

Ichalation

This product is a respiratory irritant and potential respiratory sensitizer. Repeated inhalation of vapor or aerosol at levels above the occupational exposure limit could cause respiratory sensitization. Symptoms may include irritation to the eyes, nose, throat, and lungs, possibly combined with dryness of the throat, tightness of chest and difficulty in breathing. The onset of the respiratory symptoms may be delayed for several hours after exposure. A hyper-reactive response to even minimal concentrations of MDI may develop in sensitized persons.

Skin Contact

Moderate irritant. Repeated and/or prolonged contact may cause skin sensitization. There is limited evidence from animal studies that skin contact may play a role in respiratory sensitization. These results emphasize the need for protective clothing including gloves to be worn at all times when handling these chemicals or in maintenance work.

Eye Contact

The vapor, aerosol, and liquid are irritant.

Ingestion

Ingestion may cause irritation of the gastrointestinal tract. Based on the acute oral LD50 this product is considered practically non-toxic by ingestion.

Carcinogenic Effects

The ingredients of this product are not classified as carcinogenic by ACGIH or IARC, not regulated as carcinogens by OSHA, and not listed as carcinogens by NTP.

Mutagenic Effects

There is no substantial evidence of mutagenic potential.

Reproductive bifects

No adverse reproductive effects are anticipated.

Teraingenic effects

No birth defects were seen in two independent animal (rat) studies. Fetotoxicity was observed at doses that were extremely toxic (including lethal) to the mother. Fetotoxicity was not observed at doses that were not maternally toxic. The doses used in these studies were maximal respirable

concentrations well in excess of the defined occupational limits.

Page: 6/8

p.10

#### Remark

A study was conducted where groups of rats were exposed for 6 hours/day, 5 days/week for a lifetime to atmospheres of respirable polymeric MDI aerosol at concentrations of 0, 0.2, 1 or 6 mg/m3. No adverse effects were observed at 0.2 mg/m3. At the 1 mg/m3 concentration, minimal hasal and lung irritant effects were seen. Only at the top concentration (6.0 mg/m3) was there an increased incidence of a benign tumor of the lung (adenoma). One malignant pulmonary tumor (adenocarcinoma) was seen in the 6.0 mg/m3 group. MDI adminsistration to rats in this study did not change the distribution and incidence of tumors from those seen in control animals. The increased incidence of lung tumors is associated with prolonged respiratory imitation and the concurrent accumulation of yellow material in the lung. In the absence of prolonged exposure to high concentrations leading to chronic irritation and lung damage, it is highly unlikely that tumor formation will occur. (MDI)

There are reports that chronic exposure to disocyanates by inhalation may result in permanent decreases in lung function.

#### Section 12. Ecological Information

Ecotoxicity

Polymeric MDI. LC50 (Zebra Fish) > 1000 mg/l . EC50 (Daphnia magna) (24 hour) > 1000 mg/l EC50 (E. Coli) > 100 mg/l

Environmental Fate and Distribution

It is unlikely that significant environmental exposure in the air or water will arise based on consideration of the production and use of the substance.

Persistence and Degradation | Immiscible with water, but will react with water to produce inert and non-biodegradable solids.

#### Section 13. Disposal Considerations

#### Waste Information

The generation of waste should be avoided or minimized wherever possible.

Disposal should be in accordance with local, state, provincial or national regulations. This material is not a hazardous waste under RCRA 40 CFR 261. Small quantities should be treated with a decontaminant solution (See Section 6). The treated waste is not a hazardous material under RCRA 40 CFR 261. Chemical waste, even small quantities, should never be poured down drains, sewers or waterways.

Empty containers should be decontaminated and either passed to an approved drum recycler or destroyed.

#### Section 14. Transport Information

Transportation Emergency Number 1-800-424-9300 (CHEMTREC).

**DOT Classification** 

Single containers less than 5,000 lbs. are not regulated. Single containers with 5,000 lbs. or more of 4,4'-Methylene Diphenyl Diisocyanate are regulated as: Other Regulated Substances, Liquid, N.O.S. (Methylene Diphenyl Diisocyanate), 9, NA3082, PGIII, RQ.

TDG Classification

Not regulated.

IMO/IMDG Classification

Not requiated.

RCAO/IATA Classification

Not regulated.

3.		HAZARDS I	DENTIFICA	MION	

#### LISTED CARCINOGENS (NTP. IARC OR OSHA): NONE

ROUTES OF EXPOSURE AND ACUTE EFFECTS:

NOTE: The following hazards described below are those of the solvent system.

Skin Contact:

Prolonged or repeated contact can defat skin which may cause

irritation or dermatitis. Avoid skin contact.

Eye Contact:

Liquid product splashed in the eye will probably irritate

the eye.

Inhalation:

Vapor concentrations above the TLV may cause nasal and respiratory irritation, dizziness, weakness, fatique,

nausea, and headache. At very high levels, anesthesia and

asphyxiation are possible.

Ingestion:

May cause gastrointestinal (digestive) tract irritation. Acute oral toxicity of the solvent mixture has not been measured but is assumed to be low on the basis of knowledge of the components. If product is accidentally swallowed, DO NOT induce vomiting because of the danger of aspiration of the solvent into the lungs, which can be fatal due to chemical pneumonitis.

CHRONIC EFFECTS: T

There is little or no evidence for adverse effects on humans due to long-term exposure to vapors of the component solvents

at TLV levels or below.

OTHER HAZARDS:

Not Applicable

7

discomfort, tearing, or blurring of vision. Inhalation may cause irritation of the upper respiratory passages, with coughing and discomfort. Some individuals who have been overexposed by inhalation or skin contact experienced blurry vision.

The mechanism of blurred vision in humans is unknown. Based on observed effects from animal studies, we believe that some symptoms of pre-existing eye disease could be aggravated by overexposure to this material.

Carcinogenicity Information

None of the components present in this material at concentrations equal to or greater than 0.1% are listed by IARC, NTP, OSHA or ACGIH as a carcinogen.

#### FIRST AID MEASURES

#### First Aid

#### INHALATION

If inhaled, immediately remove to fresh air. If not breathing, give artificial respiration. If breathing is difficult, give oxygen. Call a physician.

#### SKIN CONTACT

Flush skin with water after contact. Wash contaminated clothing before reuse.

#### EYE CONTACT

In case of contact, immediately flush eyes with plenty of water for at least 15 minutes. Call a physician.

#### INGESTION

If swallowed, do not induce vomiting. Immediately give 2 glasses of water. Never give anything by mouth to an unconscious person. Call a physician.

#### Notes to Physicians

Activated charcoal mixture may be beneficial. Suspend 50 g activated charcoal in 400 mL water and mix well. Administer 5 mL/kg, or 350 mL for an average adult.

Fire Fighting Instructions

Keep personnel removed and upwind of fire. Wear self-contained breathing apparatus. Wear full protective equipment. Cool tank/container with water spray.

ACCIDENTAL RELEASE MEASURES

Safeguards (Personnel)

NOTE: Review FIRE FIGHTING MEASURES and HANDLING (PERSONNEL) sections before proceeding with clean-up. Use appropriate PERSONAL PROTECTIVE EQUIPMENT during clean-up.

Initial Containment

Remove source of heat, sparks, flame, impact, friction or electricity. Dike spill. Prevent material from entering sewers, waterways, or low areas. 

Spill Clean Up

- Recover free liquid for reuse or reclamation. Recover undamaged and minimally contaminated material for reuse and reclamation. Soak up with sawdust, sand, oil dry or other absorbent material.

HANDLING AND STORAGE

Kandling (Personnel)

Avoid breathing vapors or mist. Avoid contact with eyes, skin, or clothing. Wash thoroughly after handling.

Scorage

Do not mix with strong oxidants, acids, or alkalies. Store in a well ventilated place. Keep container tightly closed.

A NIOSH approved air purifying respirator with an organic vapor cartridge or canister may be permissible under certain circumstances where airborne concentrations are expected to exceed exposure limits. Protection provided by air-purifying respirators is limited. Use a NIOSH approved positive pressure air-supplied respirator if there is any potential for an uncontrolled release, exposure levels are not known, or any other circumstances where air-purifying respirators may not provide adequate protection.

#### PROTECTIVE CLOTHING

Wear impervious clothing, such as gloves, apron, boots, or whole bodysuit as appropriate.

Recommended glove and clothing material: Butyl Rubber.

#### Exposure Guidelines

#### Exposure Limits

DRE PEL

TLV

AEL .

(OSHA) : None Established (ACGIH) : None Established : 1.5 ppm, 10 mg/m3, 8 Hr. TWA This limit is for DBE.

* AEL is DuPont's Acceptable Exposure Limit. Where governmentally imposed occupational exposure limits which are lower than the AEL are in effect, such limits shall take precedence.

#### TOXICOLOGICAL INFORMATION

#### Animal Data

Inhalation 4-hour LC50: >11 mg/L in rats
Inhalation 1-hour LC50: >10.7 mg/L in rats
Skin absorption LD50 : >2,250 mg/kg in rabbits
Oral LD50 : 8,191 mg/kg in rats

The mixture is a mild to severe skin irritant and a moderate eye irritant, but is not a skin sensitizer in animals. Toxic effects described in animals from exposure by inhalation include upper respiratory tract irritation. A single 4-hour exposure to 60 ppm caused transient corneal opacity and transient increases in the distance from the cornea to the anterior surface of the lens of the eye. Toxicity described in animals from repeated exposure by inhalation include decreased weight gain, absolute and relative liver weight decrease, and degeneration of olfactory epithelium (nasal tissue). Toxicity described in animals from repeated exposure by ingestion include weight loss, but there were no pathological abnormalities noted.

A single application of 10 uL to the eye caused corneal opacity. The administration of 10-100 uL of a similar mixture caused corneal opacity, transient increases in corneal thickness, and transient corneal anesthesia. A single application of approximately 60 mg/kg to the skin caused transient increases in the distance from the cornea to the anterior surface of the lens of the eye.

The mixture does not produce genetic damage in animals, or in bacterial cell cultures, but it was positive in one study with cultured mammalian cells. Animal testing indicates that this mixture does not have developmental, or reproductive effects.

#### ECOLOGICAL INFORMATION

Ecotoxicological Information

AQUATIC TOXICITY:

D3E

96 hour LC50 - Fathead minnows: 18-24 mg/L. Moderately toxic.

48 hour LC50 - Daphnia magna: 112-150 mg/L

Biodegradation Information:

The DBE components, dimethyl succinate, dimethyl glutarate, and dimethyl adipate were tested for biodegradability using the 28-day closed bottle test. A minimum of 60% biodegradation must be reached in a 14 day window after exceeding the 10% level in order to pass this test and be rated as readily biodegradable. All of the components of DBE pass this test and, therefore, DBE is considered readily biodegradable.

Dimethyl succinate - 67% biodegradability in day 7
Dimethyl glutarate - 70% biodegradability in day 7
Dimethyl adipate - 58% biodegradability in day 7
- 84% biodegradability in day 14

### DISPOSAL CONSIDERATIONS

## Waste Disposal

Treatment, storage, transportation and disposal must be in accordance with applicable Federal, State/provincial and local regulations.

•••••••••••••••••••••••••••••

Recover unusable free liquid and dispose into either an approved and permitted incinerator or approved and permitted biological treatment system.

Recover any DBE contaminated water and dispose of into an approved and permitted biological treatment system.

Do not flush any water or solids into surface water drains or sanitary sewer system.

Remove unusable solid material or contaminated soil for disposal into an approved and permitted landfill.

Registered Trademarks

LYCRA, Stainmaster, Antron, Comforel, Coolmax, Cordura, Supplex, Tactel, Tellon, Thermolite, Adi-Pure, C12 Corfree, DBE, Dytek, NYCO, SolarMax, Elaspan, and Terathane are Registered Trademarks of their respective companies.

#### FIRST AID MEASURES

#### EMERGENCY AND FIRST AID PROCEDURES:

Skin Contact:

Wash with soap and water. Launder contacted clothing before

reuse.

Eve Contact:

Flush with water for at least 15 minutes. Contact a

physician.

Inhalation:

If adverse effects such as dizziness, nausea or irritation

are noted, move to fresh air. Contact physician.

Ingestion:

If product is swallowed, DO NOT induce vomiting. Contact a

physician immediately.

#### FIRE FIGHTING MEASURES

FLASH POINT (deg.F): 20 (Method Used): PENSKY-MARTENS FLAMMABLE LIMITS IN AIR, % BY VOLUME:

LIGHT ALIPHATIC NAPHTHA

LOWER (lel) UPPER (uel)

6.7

DANGER: FLAMMABLE. Keep away from heat, sparks and flames.

EXTINGUISHING MEDIA: Use foam, carbon dioxide or dry chemical.

SPECIAL FIRE FIGHTING PROCEDURES: Wear self-contained breathing apparatus when fire fighting in a confined space.

UNUSUAL FIRE AND EXPLOSION HAZARDS: None known

CONTAINER HANDLING: Do not cut, puncture or weld on empty drum because it may contain explosive or harmful vapors.

#### ACCIDENTAL RELEASE MEASURES

STEPS TO BE TAKEN IN CASE MATERIAL IS RELEASED OR SPILLED:

Small Spills:

Soak up with absorbent material.

Large Spills:

8.

Eliminate all sources of ignition. Vapors are heavier than air and may spread long distances or collect in low spots. Dike area to prevent runoff, recover liquid and soak up

remaining liquid with absorbent material.

#### HANDLING AND STORAGE 7.

PRECAUTIONS TO BE TAKEN IN HANDLING AND STORAGE: Ground all equipment pumping the product. Protect from static electrical sparks or other ignition sources. Store away from strong oxidizers.

Do not store at temperatures above 110 deg. F to avoid vapor pressure in closed containers. Keep containers closed when not in use.

OTHER PRECAUTIONS: None known

#### EXPOSURE CONTROLS / PERSONAL PROTECTION

RESPIRATORY PROTECTION: Good industrial hygiene practices recommend that engineering controls (such as local and/or mechanical ventilation) be used to reduce environmental concentrations to the permissible exposure level.

MSDS Number X7878 LBL# 4B-PMR Chem-Trend Limited Partnership Printed 10/06/05

Page

Chemlease, Mono-Coat, Mono-Lube, Perma-Mold, Power-Lube, Pura, RDP, RPM and Safety-Lube are registered trademarks of Chem-Trend Limited Partnership

8. EXPOSURE CONTROLS / PERSONAL PROTECTION CONTINUED

Respirators may be used when engineering and work practice controls are not technically feasible, when such controls are in the process of being installed, or when they fail and need to be supplemented. If the use of a respirator is necessary use only a MSHA/NIOSH approved air supplied respirator or an air-purifying respirator.

PROTECTIVE GLOVES: Impervious gloves (such as neoprene, polyvinyl alcohol, NBR pitrile).

EYE PROTECTION: Safety glasses with side shields or chemical goggles.

OTHER PROTECTIVE EQUIPMENT: Appropriate clothing to avoid skin contact.

RE: Profile # 288031

Generator: Shawcor Pipe Protection, 8200 Yacht Club Drive, Suite B, Port Arthur, TX

77642

Please revise Profile number 288031 to reflect the use of Methylene Chloride (MSDS Attached) in place of the Pur Flush 100 (at 2-30% attached MSDS). All other processes are the same. The Methylene Chloride is used as the flushing material in attachment B instead of the Pur Flush 100. Please call with any questions (Dan Bowman Cell 713-854-6150).

Thank you,

Dan Bowman

CES Environmental Services, Inc.

## Material Safety Data Sheet Dow

1. CHEMICAL PRODUCT & COMPANY IDENTIFICATION

Page: 1

24-Hour Emergency Phone Number: 989-636-4400

Product: METHYLENE CHLORIDE, TECHNICAL

Product Code: 55590

Effective Date: 08/23/01 Date Printed: 01/14/02 MSD: 000009

The Dow Chemical Company, Midland, MI 48674

Customer Information Center: 800-258-2436

2. COMPOSITION/INFORMATION ON INGREDIENTS

Methylene chloride

CAS# 000075-09-2 99.9%

3. HAZARDS IDENTIFICATION

#### EMERGENCY OVERVIEW

****************** * Colorless liquid. Irritating odor. Toxic fumes are released in * fire situations. Harmful if inhaled. Can cause death if too much * is breathed. Causes eye irritation. Clear all personnel from area. * * Wear full protected equipment. Contain liquid to prevent * contamination of soil, surface water or ground water. *************************

POTENTIAL HEALTH EFFECTS (See Section 11 for toxicological data.)

EYE: May cause pain. May cause moderate eye irritation which may be slow to heal. May cause slight corneal injury. Vapors may irritate eyes.

SKIN: Prolonged or repeated exposure may cause skin irritation, even a burn. Repeated contact may cause drying or flaking of skin. May cause more severe response if confined to skin. Extensive skin contact with methylene chloride, such as immersion, may cause an intense burning sensation followed by a cold, numb feeling which will subside after contact. A single prolonged exposure is not likely to result in the material being absorbed through skin in harmful amounts.

INGESTION: Single dose oral toxicity is considered to be low.

(Continued on page 2 , over) * OR (R) INDICATES A TRADEMARK OF THE DOW CHEMICAL COMPANY MATERIAL SAFETY DATA SHEET

PAGE: 2

Product: METHYLENE CHLORIDE, TECHNICAL

Product Code: 55590

Effective Date: 08/23/01 Date Printed: 01/14/02 MSD: 000009

Small amounts swallowed incidental to normal handling operations are not likely to cause injury; swallowing amounts larger than that may cause injury. If aspirated (liquid enters the lung), may be rapidly absorbed through the lungs and result in injury to other body systems.

INHALATION: In confined or poorly ventilated areas, vapors can readily accumulate and can cause unconsciousness and death. Excessive exposure may cause irritation to upper respiratory tract (nose and throat). Excessive exposure may cause carboxyhemoglobinemia, thereby impairing the blood's ability to transport oxygen. Minimal anesthetic or narcotic effects may be seen in the range of 500-1000 ppm methylene chloride. Progressively higher levels over 1000 ppm can cause dizziness, drunkenness, and as low as 10,000 ppm, unconsciousness and death. These high levels may also cause cardiac arrhythmias (irregular heartbeats).

SYSTEMIC (OTHER TARGET ORGAN) EFFECTS: In animals, effects have been reported on the following organs: central nervous system, kidney and liver. Excessive exposure may cause carboxyhemoglobinemia, thereby impairing the blood's ability to transport oxygen.

CANCER INFORMATION: For hazard communication purposes, under OSHA Standard 29 CFR Part 1910.1200, this chemical is listed as a potential carcinogen by IARC and NTP. Methylene chloride has been shown to increase the incidence of malignant tumors in mice and benign tumors in rats. Studies have shown that tumors observed in mice are unique to that species. Other animal studies, as well as several human epidemiology studies, failed to show a tumorigenic response. Methylene chloride is not believed to pose a measurable carcinogenic risk to man when handled as recommended.

TERATOLOGY (BIRTH DEFECTS): Birth defects are unlikely. Exposures having no effect on the mother should have no effect on the fetus. Did not cause birth defects in animals; other effects were seen in the fetus only at doses which caused toxic effects to the mother.

REPRODUCTIVE EFFECTS: In animal studies, has been shown not to interfere with reproduction.

#### 4. FIRST AID

(Continued on page 3)
* OR (R) INDICATES A TRADEMARK OF THE DOW CHEMICAL COMPANY

Product: METHYLENE CHLORIDE, TECHNICAL

Product Code: 55590

Effective Date: 08/23/01 Date Printed: 01/14/02 MSD: 000009

EYES: Irrigate with flowing water immediately and continuously for 15 minutes. Consult medical personnel.

SKIN: Wash off in flowing water or shower.

INGESTION: Do not induce vomiting. Call a physician and/or transport to emergency facility immediately.

INHALATION: Remove to fresh air. If not breathing, give artificial respiration. If breathing is difficult, oxygen should be administered by qualified personnel. Call a physician or transport to a medical facility.

NOTE TO PHYSICIAN: Because rapid absorption may occur through lungs if aspirated and cause systemic effects, the decision of whether to induce vomiting or not should be made by a physician. If lavage is performed, suggest endotracheal and/or esophageal control. Danger from lung aspiration must be weighed against toxicity when considering emptying the stomach. Exposure may increase "myocardial irritability." Do not administer sympathomimetic drugs unless absolutely necessary. If burn is present, treat as any thermal burn, after decontamination. No specific antidote. Supportive care. Treatment based on judgment of the physician in response to reactions of the patient. Carboxyhemoglobinemia may aggravate any preexisting condition sensitive to a decrease in available oxygen, such as chronic lung disease, coronary artery disease or anemias.

#### 5. FIRE FIGHTING MEASURES

FLAMMABLE PROPERTIES

FLASH POINT: None

METHOD USED: TCC, TOC, COC

AUTOIGNITION TEMPERATURE: 1033 deg F, 556 deg C.

FLAMMABLE LIMITS

LFL: 14% @ 25 deg C. UFL: 22% @ 25 deg C.

HAZARDOUS COMBUSTION PRODUCTS: During a fire, smoke may contain the original material in addition to unidentified toxic and/or irritating compounds. Hazardous combustion products may include and are not limited to hydrogen chloride, carbon monoxide, carbon dioxide. Hazardous combustion products may include trace amounts of phospene, chlorine.

(Continued on page 4 , over)
* OR (R) INDICATES A TRADEMARK OF THE DOW CHEMICAL COMPANY

Product: METHYLENE CHLORIDE, TECHNICAL

Product Code: 55590

Effective Date: 08/23/01 Date Printed: 01/14/02 MSD: 000009

OTHER FLAMMABILITY INFORMATION: Container may vent and/or rupture due to fire. Although this material does not have a flash point, it can burn at room temperature. Vapors are heavier than air and may travel a long distance and accumulate in low lying areas.

EXTINGUISHING MEDIA: Water fog or fine spray, carbon dioxide, dry chemical, foam. Water fog, applied gently may be used as a blanket for fire extinguishment.

FIRE FIGHTING INSTRUCTIONS: Keep people away. Isolate fire area and deny unnecessary entry. Burning liquids may be moved by flushing with water to protect personnel and minimize property damage. Water fog, applied gently may be used as a blanket for fire extinguishment. Use water spray to cool fire exposed containers and fire affected zone until fire is out and danger of reignition has passed. Immediately withdraw all personnel from area in case of rising sound from venting safety device or discoloration of the container. Move container from fire area if this is possible without hazard. Stay upwind. Keep out of low areas where gases (fumes) can accumulate.

PROTECTIVE EQUIPMENT FOR FIRE FIGHTERS: Wear positive-pressure self-contained breathing apparatus (SCBA) and protective fire fighting clothing (includes fire fighting helmet, coat, pants, boots, and gloves). If protective equipment is not available or not used, fight fire from a protected location or safe distance.

6. ACCIDENTAL RELEASE MEASURES (See Section 15 for Regulatory Information)

PROTECT PEOPLE: Clear all personnel from area. Do not breathe vapors. Ventilate area of leak or spill. Wear protective equipment including positive pressure self contained or air supplied breathing apparatus. Follow confined space entry procedures: ASTM D-4276 and OSHA (29 CFR 1910.146).

PROTECT ENVIRONMENT: Contain liquid to prevent contamination of soil, surface water or ground water. Material is heavier than water and has limited water solubility. It will collect on the lowest surface.

CLEANUP: For large spills: contain liquid; transfer to properly

(Continued on page 5)

^{*} OR (R) INDICATES A TRADEMARK OF THE DOW CHEMICAL COMPANY

Product: METHYLENE CHLORIDE, TECHNICAL

Product Code: 55590

Effective Date: 08/23/01 Date Printed: 01/14/02 MSD: 000009

labeled closed metal containers. For small spills: mop or soak up immediately. Place in properly labeled metal containers.

#### 7. HANDLING AND STORAGE

HANDLING: To avoid uncontrolled emissions, vent vapor from container to storage tank. Do not eat, drink, or smoke in working area. Refer to Exposure Controls/Personal Protection, Section 8, of the MSDS. Containers, even those that have been emptied, can contain vapors. Do not cut, drill, grind, weld, or perform similar operations on or near empty containers. Vapors of this product are heavier than air and will collect in low areas such as pits, degreasers, storage tanks, and other confined areas. Do not enter these areas where vapors of this product are suspected unless special breathing apparatus is used and an observer is present for assistance. Manual operations (such as cold cleaning or paint stripping) using methylene chloride should be engineered to provide for confining solvent vapors, adequate ventilation and/or respiratory protection to reduce the potential for overexposure to vapors. Gloves or other protective equipment should be worn if skin contact is likely.

STORAGE: Keep containers tightly closed when not in use. For more Storage and Handling information refer to Bulletin #100-06170. Store in a dry place. Significant vapor pressures (>5 psi) can be generated above 55F. This may result in venting or rupture. Do not store in zinc, aluminum, aluminum alloys, plastics. Product should not be packaged in aluminum aerosol cans or with finely divided aluminum or its alloys in an aerosol can. Product is denser than water. Design storage containers appropriately.

#### 8. EXPOSURE CONTROLS/PERSONAL PROTECTION

ENGINEERING CONTROLS: Provide general and/or local exhaust ventilation to control airborne levels below the exposure guidelines. Lethal concentrations may exist in areas with poor ventilation.

#### PERSONAL PROTECTIVE EQUIPMENT

EYE/FACE PROTECTION: Use chemical glasses. If vapor exposure causes eye discomfort, use a full-face respirator.

SKIN PROTECTION: Use protective clothing impervious to this material. Selection of specific items such as faceshield,

(Continued on page 6 , over)
* OR (R) INDICATES A TRADEMARK OF THE DOW CHEMICAL COMPANY

Product: METHYLENE CHLORIDE, TECHNICAL

Product Code: 55590

Effective Date: 08/23/01 Date Printed: 01/14/02 MSD: 000009

gloves, boots, apron, or full body suit will depend on operation. Remove contaminated clothing immediately, wash skin area with soap and water, and launder clothing before reuse.

RESPIRATORY PROTECTION: For emergency response or for situations where the atmospheric level is unknown, use an approved positive-pressure self-contained breathing apparatus. Atmospheric levels should be maintained below the exposure quideline. When respiratory protection is required for certain operations, use an approved positive-pressure supplied-air respirator. In confined or poorly ventilated areas, use an approved positive-pressure supplied-air respirator.

EXPOSURE GUIDELINE(S): Methylene chloride: ACGIH TLV is 50 ppm, A3. OSHA PEL is 25 ppm TWA, 125 ppm short-term exposure limit.

#### 9. PHYSICAL AND CHEMICAL PROPERTIES

APPEARANCE: Colorless liquid.

VAPOR PRESSURE: 355 mmHg @ 20C

VAPOR DENSITY: 2.93

BOILING POINT: 104F (39.8C)
SOLUBILITY IN WATER: 2.0g/100g @ 25C
SPECIFIC GRAVITY: 1.320 @ 25/25C

#### 10. STABILITY AND REACTIVITY

CHEMICAL STABILITY: Stable under recommended storage conditions. See Storage, Section 7.

CONDITIONS TO AVOID: Product can decompose at elevated temperatures. Avoid open flames, welding arcs, or other high temperature sources which induce thermal decomposition. Avoid direct sunlight or ultraviolet sources.

INCOMPATIBILITY WITH OTHER MATERIALS: Avoid contact with oxidizing materials. Avoid contact with strong bases. Avoid unintended contact with amines. Avoid contact with metals such as zinc powders, aluminum powders, magnesium powders, potassium, sodium. Water contamination may cause corrosion of metals due to formation of hydrochloric acid.

HAZARDOUS DECOMPOSITION PRODUCTS: Hazardous decomposition

(Continued on page 7)

^{*} OR (R) INDICATES A TRADEMARK OF THE DOW CHEMICAL COMPANY

Product: METHYLENE CHLORIDE, TECHNICAL

Product Code: 55590

Effective Date: 08/23/01 Date Printed: 01/14/02 MSD: 000009

products depend upon temperature, air supply and the presence of other materials. Hazardous decomposition products may include and are not limited to hydrogen chloride. Hazardous decomposition products may include trace amounts of chlorine, phosgene.

HAZARDOUS POLYMERIZATION: Will not occur.

11. TOXICOLOGICAL INFORMATION (See Section 3 for Potential Health Effects. For detailed toxicological data, write or call the address or non-emergency number shown in Section 1)

SKIN: The dermal LD50 has not been determined.

INGESTION: The oral LD50 for rats is 1500-2500 mg/kg.

MUTAGENICITY (EFFECTS ON GENETIC MATERIAL): Negative or equivocal results have been obtained in mutagenicity tests with methylene chloride using mammalian cells or animals. This is consistent with the lack of interaction with DNA in rats and hamsters. Although results of Ames bacterial tests have generally been positive, overall the data suggest that genotoxic potential does not appear to be a significant factor in the toxicity of methylene chloride.

12. ECOLOGICAL INFORMATION (For detailed Ecological data, write or call the address or non-emergency number shown in Section 1)

#### ENVIRONMENTAL FATE

MOVEMENT AND PARTITIONING: Bioconcentration potential is low (BCF less than 100 or Log Pow less than 3). Measured log octanol/water partition coefficient (log Pow) is 1.25. Henry's Law Constant (H) is estimated to be 3.69E-03 atm-m3/mol. Potential for mobility in soil is very high (Koc between 0 and 50). Soil organic carbon/water partition coefficient (Koc) is estimated to be 24.

DEGRADATION & PERSISTENCE: Based on the stringent test guidelines, this material cannot be considered as readily biodegradable; however, these results do not necessarily mean that the material is not biodegradable under environmental conditions. Biodegradation rate may increase soil and/or water with acclimation. In the atmospheric environment, material is estimated to have a tropospheric half-life of 79-110 days. Biodegradation reached in Modified MITI Test (I) (OECD Test No. 301C) after 28 days: 5-26%.

(Continued on page 8 , over)

^{*} OR (R) INDICATES A TRADEMARK OF THE DOW CHEMICAL COMPANY

Product: METHYLENE CHLORIDE, TECHNICAL

Product Code: 55590

Effective Date: 08/23/01 Date Printed: 01/14/02 MSD: 000009

ECOTOXICITY: Material is practically non-toxic to aquatic organisms on an acute basis (LC50/EC50 >100 mg/L in most sensitive species).

Acute LC50 in water flea (Daphnia magna) is 244 mg/L.

Acute LC50 in fathead minnow (Pimephales promelas) is 320 mg/L.

Acute LC50 in bluegill (Lepomis macrochirus) is 224 mg/L.

Acute LC50 in mysid (Mysidopsis bahia) is 256 mg/L.

Acute LC50 in golden orfe (Leuciscus idus) is 524 mg/L.

Maximum acceptable toxicant concentration (MATC) in fathead minnow (Pimephales promelas) is 108 mg/L.

Acute immobilization EC50 in water flea (Daphnia magna) is 480 mg/L.

Growth inhibition EC50 in green alga (Selenastrum capricornutum) is >662 mg/L.

Growth inhibition EC50 in marine diatom (Skeletonema costatum) is >662 mg/L.

Acute LC50 in grass shrimp (Palaemonetes pugio) is 110 mg/L.

### 13. DISPOSAL CONSIDERATIONS (See Section 15 for Regulatory Information)

DISPOSAL: DO NOT DUMP INTO ANY SEWERS, ON THE GROUND, OR INTO ANY BODY OF WATER. All disposal methods must be in compliance with all Federal, State/Provincial and local laws and regulations. Regulations may vary in different locations. Waste characterizations and compliance with applicable laws are the responsibility solely of the waste generator. THE DOW CHEMICAL COMPANY HAS NO CONTROL OVER THE MANAGEMENT PRACTICES OR MANUFACTURING PROCESSES OF PARTIES HANDLING OR USING THIS MATERIAL. THE INFORMATION PRESENTED HERE PERTAINS ONLY TO THE PRODUCT AS SHIPPED IN ITS INTENDED CONDITION AS DESCRIBED IN MSDS SECTION 2 (Composition/Information On Ingredients).

FOR UNUSED & UNCONTAMINATED PRODUCT, the preferred options include sending to a licensed, permitted recycler, reclaimer, incinerator or other thermal destruction device.

For additional information, refer to Dow Technical Bulletin discussing considerations for this product. Bulk Lit No 100-06170.

As a service to its customers, Dow can provide names of information resources to help identify waste management companies and other facilities which recycle, reprocess or manage chemicals or plastics, and that manage used drums. Telephone Dow's Customer Information Center at

#### 14. TRANSPORT INFORMATION

DEPARTMENT OF TRANSPORTATION (D.O.T.):

For DOT regulatory information, if required, consult transportation regulations, product shipping papers or contact your Dow representative.

#### CANADIAN TDG INFORMATION:

For TDG regulatory information, if required, consult transportation regulations, product shipping papers, or your Dow representative.

15. REGULATORY INFORMATION (Not meant to be all-inclusive--selected regulations represented)

NOTICE: The information herein is presented in good faith and believed to be accurate as of the effective date shown above. However, no warranty, express or implied is given. Regulatory requirements are subject to change and may differ from one location to another; it is the buyer's responsibility to ensure that its activities comply with federal, state or provincial, and local laws. The following specific information is made for the purpose of complying with numerous federal, state or provincial, and local laws and regulations. See other sections for health and safety information.

#### U.S. REGULATIONS _____

SARA 313 INFORMATION: This product contains the following substances subject to the reporting requirements of Section 313 of Title III of the Superfund Amendments and Reauthorization Act of 1986 and 40 CFR Part 372:

CAS NUMBER CONCENTRATION CHEMICAL NAME DICHLOROMETHANE (METHYLENE CHLORIDE) 000075-09-2 99.9

SARA HAZARD CATEGORY: This product has been reviewed according to the EPA "Hazard Categories" promulgated under Sections 311 and 312 of the Superfund Amendment and Reauthorization Act of 1986 (SARA Title III) and is considered, under applicable definitions, to meet the following categories:

#### REGULATORY INFORMATION (CONTINUED)

This product is a "Hazardous Chemical" as defined by the OSHA Hazard Communication Standard, 29 CFR 1910.1200.

COMPREHENSIVE ENVIRONMENTAL RESPONSE COMPENSATION AND LIABILITY ACT (CERCLA, or SUPERFUND):

This product contains the following substance(s) listed as "Hazardous Substances" under CERCLA which may require reporting of releases: Category:

Chemical Name CAS# RQ % in Product
Methylene chloride 000075-09-2 1000 99.9%

## CANADIAN REGULATIONS

WHMIS INFORMATION: The Canadian Workplace Hazardous Materials Information System (WHMIS) Classification for this product is:

D1B - poisonous substance defined by TDG regulations

D2A - possible, probable or known human carcinogen according to classifications by IARC or ACGIH

D2B - eve or skin irritant

Refer elsewhere in the MSDS for specific warnings and safe handling information. Refer to the employer's workplace education program.

CPR STATEMENT: This product has been classified in accordance with the hazard criteria of the Canadian Controlled Products Regulations (CPR) and the MSDS contains all the information required by the CPR.

HAZARDOUS PRODUCTS ACT INFORMATION: This product contains the following ingredients which are Controlled Products and/or on the Ingredient Disclosure List (Canadian HPA section 13 and 14):

COMPONENTS:

CAS # AMOUNT(%w/w)

Methylene Chloride CAS# 000075-09-2 99.9%

#### 16. OTHER INFORMATION

HAZARD RATING SYSTEM:

(Continued on page 12) , over)
* OR (R) INDICATES A TRADEMARK OF THE DOW CHEMICAL COMPANY

Product: METHYLENE CHLORIDE, TECHNICAL

Product Code: 55590

Effective Date: 08/23/01 Date Printed: 01/14/02 MSD: 000009

NATIONAL FIRE PROTECTION ASSOCIATION (NFPA) RATINGS:

Health 2 Flammability 1 Reactivity 0

Process water in contact with solvent and/or water separators of cleaning or distillation equipment should be treated as hazardous waste. Do not discharge water from water separators to drain.

Dow does NOT recommend the use of this product in applications where:

- soil or ground water contamination is likely (direct applications to the ground, sink drains, sewers, or septic tanks).
- where over exposure is likely (small rooms or confined space, or where there would be inadequate ventilation).
- where skin contact is likely (adhesive tape removal from skin or as hand cleaner to remove oils and greases).
- where there is direct food contact.
- where vapor concentrations would be in the flammable range.
- where disposal of waste would pose an environmental or health risk.
- where chemical reactivity poses a danger (contact with strong alkali, or in areas where welding is done).

For more Storage and Handling information refer to bulletin "100-06170".

The Consumer Products Safety Commission has issued a Statement of Policy for household products containing methylene chloride. The policy statement established labeling guidelines for consumer products containing methylene chloride (including paint strippers, wood stains and varnishes, spray paints, adhesives and glues, and a number of other household products). The policy requires labels to include statements of principal hazard and indicate that the risk to the user is related to the level and duration of exposure. It appeared in the Federal Register, Vol. 52, No. 177, on Monday, September 14, 1987.

MSDS STATUS: Revised Section 15 (added NJ definitions).

* OR (R) INDICATES A TRADEMARK OF THE DOW CHEMICAL COMPANY The Information Herein Is Given In Good Faith, But No Warranty, Express Or Implied, Is Made. Consult The Dow Chemical Company For Further Information.

### Attachment B

Generating Description for PCI Profile # 288031 Shawcor Pipe Protection

Hyperlast 281239 is fed into a mixer from an isolated line. Rubinate 2427 (Iso) is fed into the same mixture through a separate line. The two products are combined together into a mixer reacting out the Isocyanates in the Rubinate. The combined materials from the mixer are fed into a field joint mold until the mold fills. The excess material left in the mold must be purged into a drum before it completely solidifies in the mixer and tubing. The flushing agent, Pur Flush 100 must be quickly introduced into the mixer and feeding tubes (Tube feeding to the mold) before the material solidifies in the mixer and tube. Once the mold cures, the excess flashing is cut off the mold.

Note: All Iso material should be reacted out.
